The German Tiger I was the most feared battle tank of the Second World War. Its invincibility lay in its main 8.8cm gun and heavy defensive armour. Tiger Tank gives a rare insight into acquiring, owning and operating one of these awesome fighting machines, using the UK's Tank Museum's Tiger 131 – the only Tiger I in the world that has been restored to full running order. In addition to offering unique insights into maintenance and driving the Tiger, the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57-ton giant in combat. It was written by a team of experts from the Tank Museum who were closely involved with the strip-down and rebuild of the Tiger I. David Fletcher is a historian, a prolific author and a world expert on tanks. David Willey is a curator, and Mike Hayton is workshop manager. Other members of the writing team include volunteers Darren Hayton and Steven Vase, Mike Gibb of the SdKfz Military Vehicle Foundation and David Schofield, a specialist in forensic science.

Small Engine Repair Manual

This new book is more than a simple engine repair manual. Designed for the beginner with little or no mechanical experience, Small Engines & Outdoor Power Equipment is a graphically appealing, step-by-step guide that covers all of the most important engine maintenance and repair skills you'll need to keep your equipment running at peak performance. It also shows exactly how to perform mechanical upkeep and repairs on the most common outdoor power implements, including lawn mowers, snow blowers, chain saws, power washers, generators, leaf blowers, rototillers, wood splitters, lawn edgers, and weed whips. With clear 'how-to' photos and detailed diagrams, you'll see exactly what needs to be done. A comprehensive troubleshooting guide helps you define problems and enact solutions. With Small Engines & Outdoor Power Equipment in your library, you won't need to haul the lawn mower off to the repair center and wait a few weeks

just because a filter is plugged or the old gas needs to be replaced. Among the many skills you'll learn are seasonal tune-ups, changing oil, servicing spark plugs, cleaning filters, replacing muffler, servicing the fuel tank, overhauling the carburetor, servicing brakes, inspecting flywheels, replacing the fuel pump, and replacing a rewind cord.

Training for firefighters must be planned so that they experience reasonably realistic situations in which they encounter the hazards likely to be met in operational incidents, whilst the risk of resultant injury is controlled and all unnecessary risks avoided. One hazard is that of high environmental temperature, which can present an acute risk of burn injury (eg through contact with hot debris) and a less acute risk of physiological heat stress; it is this latter risk which is addressed in this document. The guidance is based on a study of environmental temperatures during training sessions, together with the resultant body temperatures of those taking part. Measures outlined include: pre-exposure procedures; monitoring and control procedures during training; post-exposure control. An appendix describes the effects of heat on the body and heat-related disorders.

The Black Panther Party represents Black Panther Party members' coordinated responses over the last four decades to the failure of city, state, and federal bureaucrats to address the basic needs of their respective communities. The Party pioneered free social service programs that are now in the mainstream of American life. The Party's Sickle Cell Anemia Research Foundation, operated with Oakland's Children's Hospital, was among the nation's first such testing programs. Its Free Breakfast Program served as a model for national programs. Other initiatives included free clinics, grocery giveaways, school and education programs, senior programs, and legal aid programs. Published here for the first time in book form, The Black Panther Party makes the case that the programs' methods are viable models for addressing the persistent, basic social injustices and economic problems of today's American cities and suburbs.
