Long Way Round

Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe,

Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

Explorer was the original American space program and Explorer 1 its first satellite, launched in 1958. Sixty years later, it is the longest continuously running space program in the world, demonstrating to the world how we can explore the cosmos with small spacecraft. Almost a hundred Explorers have already been launched. Explorers have made some of the fundamental discoveries of the Space Age. Explorer 1 discovered Earth's radiation belts. Later Explorers surveyed the Sun, the X-ray and ultraviolet universes, black holes, magnetars and gamma ray bursts. An Explorer found the remnant of the Big Bang. One Explorer chased and was the first

to intercept a comet. The program went through a period of few launches during the crisis of funding for space science in the 1980s. However, with the era of 'faster, cheaper, better,' the program was reinvented, and new exciting missions began to take shape, like Swift and the asteroid hunter WISE. Discovering the Cosmos with Small Spacecraft gives an account of each mission and its discoveries. It breaks down the program into its main periods of activity and examines the politics and debate on the role of small spacecraft in space science. It introduces the launchers (Juno, Thor, etc.), the launch centers, the ground centers and key personalities like James Van Allen who helped develop and run the spacecraft's exciting programs.

A Fellowship of Men and Women

'A highly readable and spiritually uplifting book about a dream come true' Wanderlust 'Touching and memorable one for armchair travellers and bike freaks' Daily Mail From London to New York, Ewan and Charley chased their shadows through Europe, the Ukraine, Kazakhstan, Mongolia and Russia, across the Pacific to Alaska, then down through Canada and America. But as the miles slipped beneath the tyres of their big BMWs, their troubles started. Exhaustion, injury and accidents tested their strength. Treacherous roads, unpredictable weather and turbulent politics challenged their stamina. They were chased by paparazzi in Kazakhstan, courted by men with very large guns in the Ukraine, hassled by the

police, and given bulls' testicles for supper by Mongolian nomads. And yet despite all these obstacles they managed to ride more than twenty thousand miles in four months, changing their lives forever in the process. As they travelled they documented their trip, taking photographs, and writing diaries by the campfire. Long Way Round is the result of their adventures - a fascinating, frank and highly entertaining travel book about two friends riding round the world together and, against all the odds, realising their dream.

Agricultural drones are expected to revolutionize the way we conduct agronomic procedures and maintain natural vegetation on earth. This book explores the increasing importance of the role of aerial robots in managing agricultural farms and natural resources. Agricultural Drones: A Peaceful Pursuit provides a wealth of information on drone usage in agriculture. The book discusses the advanced sensors and imaging capabilities of drones that give farmers new ways to increase yields and reduce crop damage. An introductory chapter provides historical data, with details about various models of drones as well as the most recent and popular agricultural drones in usage. The book goes on to look at such topics as the use of drones for soil fertility, production agronomy, irrigation, weed control, pest and disease control, grain yield forecasting, and economic advantages from drone use. This timely and useful volume will be a valuable resource for faculty, agricultural

extension officers, and farmers and farm consultancy agencies. This book would also serve as an excellent textbook for students in agriculture, engineering, geography, etc. Key features:

- outlines the advantages of using drones in agriculture, such as for the management of soil fertility, the study of natural resources and vegetation, the maintenance of adequate irrigation, and the control of weeds and pests
- covers the economic advantages of using drones in agriculture
- examines the regulatory aspects of agricultural drones
- provides actual examples of drone usage in agriculture

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences:

When Dan set out to drive his Jeep from the Northern tip of Alaska to Tierra del Fuego on the Southern tip of South America, he had no idea how much the adventure would change his life. Over the course of two years, Dan's expedition spanned forty thousand miles through sixteen countries. Now he will never be the same. After years of saving, dreaming and planning, Dan wanted to find out if an ordinary guy can achieve the extraordinary. With no sponsorship, a modest savings account and a willingness to learn Spanish, Dan threw himself in. Going solo, with no GPS and sleeping in a ground tent, Dan wanted to experience everything the Americas have to offer. From poking lava with a stick and hiking among world-famous mountains to corrupt military and camping with Ecuadorian locals - every day provided something new. With his eyes and ears open to the world around

him, Dan met many interesting and thought-provoking characters. With their guidance and prodding, and by using their unique perspective, Dan was able to learn many valuable life lessons. Running to the beat of a different drum, Latin America was the perfect classroom for Dan to view our modern work-a-day world through an entirely new lens.

"Fabrics of Freedom" is the saga of a family whose origins are in the Marches of Scotland. Tragedy, born of the desire to live free, gives birth to one desperate challenge after another as Robbie Liddle is swept toward his destiny on the battlegrounds of America's War for Independence. The deaths of his father and maternal grandfather conspire to send his mother, grandmother, and uncle on the perilous journey across the Atlantic in hopes of founding a tailor shop. This dream was inspired by the contents in his grandfather's chest of tools of the trade. Through shipwreck and financial hardship, they are led to the possibility of freedom in the Township of Leacock, County of Lancaster, Proprietorship of Pennsylvania. In spite of physical challenges, Robbie displays hereditary skills in the demands of tailoring. Bondage to his uncle, however, arouses in him the first yearning for freedom. With his best friend, Robbie flees northeastward to West Jersey. His wit and charm, inherited from the father he never knew, combined with the skills learned at his mother's knee, enable Robbie to find a new kind of freedom

in the arms of the maiden who captured his heart--Miss Isabella Barclay. The Jerseys, however, are directly in the path of the coming conflict for a national freedom. Back and forth across what would become the third State among the United States, the forces of the British and the Continentals bloody the soils of this tiny colony. For the sake of freedom from such bondage to England, Robbie enlists in the New Jersey Militia. His military experiences in places like Brandywine and Monmouth and Valley Forge provide fodder for the tales he will spin throughout the rest of his long life. The tailor becomes the teller of tales. Heroes of such world-changing conflicts are not entirely the general officers, but the citizens who answer the call to risk their lives in the cause of freedom. Every chapter of Robbie Liddle's story is loosely connected with the various fabrics and materials with which he worked and in which he and his family dressed. Together they create that wonderful quilt of a life that rejoices in a liberty that is never free.

*** Shortlisted for the Edward Stanford Travel Writing Award 2016 in the category of Adventure Travel *** In 2013, three friends set off on a journey that they had been told was impossible: the north-south crossing of the Congo River Basin, from Kinshasa, in the Democratic Republic of Congo, to Juba, in South Sudan. Traversing 2,500 miles of the toughest terrain on the planet in a twenty-five year-old Land Rover, they faced repeated challenges, from kleptocracy and fire ants to non-existent roads and intense suspicion from local people. Through imagination and teamwork -- including building rafts and bridges, conducting makeshift surgery in the jungle and playing tribal politics -- they got through. But the Congo is raw, and the journey took an unexpected psychological toll on them all. Crossing the Congo

is an offbeat travelogue, a story of friendship and what it takes to complete a great journey against tremendous odds, and an intimate look into one of the world's least-developed and most fragile states, told with humor and sensitivity.

Animating this book is a twofold question: In what ways are adult and popular educators responding to various harsh economic, political, cultural and environmental conditions? In doing so, are they planting seeds of hope for and imaginings of alternative futures which can connect individuals and communities locally and globally to achieve economic, ecological and social justice? The book illustrates how transformative politics of solidarity often involve actors across vastly different backgrounds. Solidarity is therefore a political relationship that is forged through particular struggles situated in place and time across power differentials. The authors put popular education to work by describing and analysing their strategies and approaches. They do so using accessible language and engaging styles. Popular education is a medium for dreaming, for imagining other futures. It is also essential for countering the wilful spreading of fake news and propagation of ignorance. Pedagogies of solidarity are necessary to building connections amongst people at a time when competitive individualism and alienation are rampant. Forging solidarity with and amongst communities is a means towards that end, and, indeed, an end in itself. "Corporate mines and agribusiness poison the water we drink, the air we breathe and the food we eat. Together with their political proxies they destroy the earth and her peoples - too many are killed because of their military, economic, religious and information wars. How do we stand up for ourselves and the earth that nourishes us against this

global system? Forging Solidarity shares inspiring stories that feed our deep connection and power.” – Pregs Govender: Author of Love and Courage: A Story of Insubordination “Forging Solidarity is a critical and timely collective intervention that ponders, prods, pokes, and plays in the most generative ways. In so doing, it invites us to continue deepening our engagements with questions of responsibility and justice in relation to education everywhere.” – Richa Nagar, author of Muddying the Waters: Co-authoring Feminisms across Scholarship and Activism “This book inspires people to realize that not fighting against socio-economic injustices is to side with oppressors.” – Ntombi Nyathi, Programme Director of Training for Transformation

In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate

the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

If you feel empty and your faith has run dry, don't panic you're not alone. Some of the greatest heroes of the Bible had the same experience. They saw their faith dwindle to almost nothing. They found themselves questioning beliefs that once seemed unshakable. The great news is that God gives free refills. The same Jesus who spoke with the sinful woman at the well, restored by walking on the water, calmed his disciples' fears during a storm, demonstrated love by washing dirty feet, and forgave one caught in adultery is ready to meet you today. And when you bring your cup back to him, he's more than able to tip it off.
