" I read on. And then it happens. On page 89. Mary is humiliated, and I know I have to step in. There she is, in an ill-fitting, wine-colored gown that doesn't do anything for her mousy complexion, gathering up her music, when I pass by, and spill my glass of punch right on her dress. I turn, and there is Kevin, dressed in a scarlet coat and all the rest of the uniform of a British Soldier, circa 1811. 'What are you doing here?' I ask. 'Well, this is the part I'm up to in the book.'" The smart middle child in a blue-collar family identifies with Mary, the middle child in Jane Austen's *Pride and Prejudice*. When Alice enters Mary's world and makes changes in both their lives, she learns that first impressions aren't always right.

A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. the relationship between employment growth and output growth is greatly affected by the functioning, efficiency and institutional structure of the labor market. --Joseph Stiglitz, Chief Economist

Despite the resumption of economic growth in most LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries, renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment, and to restore wages to pre-crisis levels. The focus of this book is on: • the performance of labor markets in the LAC region since the beginning of significant structural reforms

The Invention of the Automobile - (Karl Benz and Gottlieb Daimler)

“ My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the

general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript. The Daimler-Benz Aktiengesellschaft of Germany has been indefatigable in providing me with material in regard to certain facts connected with the early experiments of both Benz and Daimler. Mr. Frederick R. Simms, too, has spared no effort to help me with some of the inner details of Daimler's engineering career." (ST. John C. Nixon - September, 1936)

As the European Union (EU) launches its common currency (the Euro), Central European (CE) nations are searching for best practices in public liability management in order to smooth their integration into the EU. This work addresses that concern, examining borrowing policies, institution building, portfolio optimization, and the implications of the Euro and EU accession for public debt management. To help the CE countries achieve their goals, the World Bank and the European Commission held a two-day seminar in Brussels in mid-December 1997. For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

While some of the stories actually are about cars found in barns or sheds, author Wyss has taken the liberty of expanding the definition of "barn find" to include any collector car found derelict, ignored, in pieces, or generally found in circumstances belying its stature. This could include cars parked in fields, found in cellars, left in parking garages, or even found under a pile of cars in a junkyard. What the cars do have in common is that they are valuable and exotic and have histories chock full of unimaginable twists and turns. Take, for instance the Two Rotor Corvette, a car that cost GM \$2 million to build and then they flat gave it away to the first guy that asked. Same thing for a GT40 roadster, one of four built, and Ford goes and hands the keys to a movie car customizer who kept it for decades and never quite got it up on the big screen. That car today is worth \$4 million. So, if you're into collector cars and love the thrill of the hunt, then you'll truly appreciate the 50 stories Wyss has selected for this first in the series.
