This IBM® Redbooks® publication helps you install, configure, and use the IBM z/OS® Management Facility (z/OSMF). z/OSMF is a product for z/OS that simplifies, optimizes, and modernizes the z/OS system programmer experience. z/OSMF delivers solutions in a task-oriented, web browser-based user interface with integrated user assistance. The goal of z/OSMF

is to improve system programmer productivity, and make functions easier to understand and use. This improvement makes system programmers more productive as quickly as possible with the least amount of training. You can automate tasks, reduce the learning curve, and improve productivity through a modern, simplified, and intuitive task-based, browser-based interface. z/OSMF is aimed at a mixed skills workforce: It is suited to professionals who are new to z/OS and those who are skilled in z/OS. Each professional has their own needs and faces their own challenges. Novice system programmer might need to understand the "big picture" and how procedures are done. Novices also need access to documentation about procedures and tasks, and implement them according to the rules of the enterprise. Experienced system programmers are familiar with tasks and procedures. Therefore, the goal is to make their work less error-prone and easier. This goal allows them to be more productive and contribute more to their business. Although z/OS delivered simplification since it was introduced, z/OSMF brings a new dimension and focus to simplification. z/OSMF simplifies and modernizes the user experience and helps make pertinent information readily available and easily accessible.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8;

universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Field Manual (FM) 6-02, Signal Support to Operations, is the premier Signal doctrine publication, and only field manual. FM 6-02 compiles Signal Corps doctrine into three chapters with supporting appendices that address network operations in support of mission command and unified land operations and the specific tactics and procedures associated with organic and nonorganic Signal forces. The fundamental idea of Signal Corps tactics is the employment and ordered arrangement of Signal forces in a supporting role to provide LandWarNet across the range of military operations. The detailed techniques regarding the ways and methods to accomplish the missions, functions or tasks of the Signal Corps indicated in this FM will be addressed in supporting Army techniques publications (ATPs). Army forces operate worldwide and require a secure and reliable communications capability that rapidly adapts to changing demands.

The Service Trainer Gurus are here to give you the tools you need to help pull your service department ahead of the pack. G-Man, AKA Gary Daniel, and I started recording this show once a week because advisors deserve advice and training that works, and that comes from advisors who have been successful on the job. It all started while I was watching a competitor's Advisor Training. It was painful and became obvious by the tactics he was teaching, that he had never actually written service, or been an advisor. I made the comment, "We give away better content for free than what they charge money for." The car industry is changing, and car sales have become the lost leader. To survive in this environment it becomes all about fixed op's performance, and we want to keep you up to date with the "New Stuff," and tricks, that you need to know. I have built a reputation in our industry of being the #1 Expert in Fixed Operations and Service Trainer. I am a Fixer, Trainer and Coach.

My passion for this industry helps produce RESULTS my clients never dreamed possible. Chris Collins is a self-taught, business performance expert. He's the #1 Expert in Fixed Operations and Service Trainer. He had the #1 BMW dealership in America for years running, and is the leader in turning around businesses in the automotive industry. The computer services industry has worldwide annual revenues of nearly a trillion dollars and employs millions of workers,

but is often overshadowed by the hardware and software products industries. In this book, Jeffrey Yost shows how computer services, from consulting and programming to data analytics and cloud computing, have played a crucial role in shaping information technology -- in making IT work. Tracing the evolution of the computer services industry from the 1950s to the present, Yost provides case studies of important companies (including IBM, Hewlett Packard, Andersen/Accenture, EDS, Infosys, and others) and profiles of such influential leaders as John Diebold, Ross Perot, and Virginia Rometty. He offers a fundamental reinterpretation of IBM as a supplier of computer services rather than just a producer of hardware, exploring how IBM bundled services with hardware for many years before becoming service-centered in the 1990s. Yost describes the emergence of companies that offered consulting services, data processing, programming, and systems integration. He examines the development of industry-defining trade associations; facilities management and the firm that invented it, Ross Perot's EDS; time sharing, a precursor of the cloud; IBM's early computer services; and independent contractor brokerages. Finally, he explores developments since the 1980s: the transformations of IBM and Hewlett Packard; the offshoring of enterprises and labor; major Indian IT service providers and the changing geographical deployment of U.S.-based companies; and the paradigm-changing phenomenon of cloud service.

Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup’s research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers’ unique demands. Gallup’s 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers’ potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

The global offshore outsourcing market for IT and business services exceeded \$55 billion in 2008 and some estimates suggest an annual growth rate of 20% over the next five years. Furthermore, over 200 firms from the Forbes 2000 companies and 50 per cent of the Fortune Global 500 had offshored IT and business process activities through captive centres, making a total of about \$9bn of business. The phenomenon of offshoring and offshore-outsourcing is certainly expanding. It has become increasingly important to understand the phenomenon, not least as a basis for suggesting what directions it will take, its impacts, how it has been conducted, and how its management can be better facilitated. This book offers a broad perspective on various issues relating to the sourcing of systems and business processes in a national and global context. The authors examine both the client's and the vendor's involvement in sourcing relationships by putting the emphasis on the capabilities that each side should develop prior to entering a relationship but also that they should develop as a result of their interactions with each other.

Making IT Work

Mission Transition is an essential career-change guide for any transitioning veteran that wants to avoid false starts and make optimal career choices following active duty. Every year, about a quarter of a million veterans leave the military - most of whom are grossly unprepared for the transition. These servicemembers have developed incredible leadership, problem-solving, and practical skills that are underutilized once they reach the civilian world, a detriment to both themselves and society. Well-intentioned Transition Assistance Programs and other support structures within the armed forces often leave veterans fending for themselves. And the mission-first culture of the military results in servicemembers focusing on their active duty roles in the year leading up to their separation, leaving them little time to adequately prepare to join the civilian world. Mission Transition guides military personnel through the entire process of making a successful move into civilian professional life. This book will:

- Guide you through the process of discovering what path you want to take going forward
- Teach you the strategies that will make your résumé stand out
- Provide suggestions to help you prepare for and ace the interview
- Discuss ways to acclimate to your new organization's culture and pay it forward to other veterans

Each chapter includes advice from other veterans, illustrations of key concepts, summaries, and suggested resources.

Human Resources topics are gaining more and more strategic importance in modern business management. While most other management disciplines have their standards and procedures, Human Resources still lacks a broadly accepted basis for its work. - operational perspective Both the structured collection of reflected real-life experience and the multi-perspective view support readers in making informed and well-balanced decisions. This workbook is a cornerstone of training and technical assistance activities related to jail staffing conducted by the U.S. Dept of Justice. Many legitimate methods can be used to conduct a jail staffing analysis. The first edition of this workbook presented a new methodology in an attempt to allow both the expert and the novice equal opportunities for success. It encouraged more jails to implement comprehensive staffing analysis, which have now become standard practice in many jurisdictions. This workbook simplifies the jail staffing analysis and allocation process, clarifies terms, and incorporates the experience of the field in the 12 years since the first edition was published. In 1986, Congress reformed U S immigration laws These reforms, the result of a bipartisan effort, preserved the tradition of legal immigration while seeking to close the door to illegal entry The employer sanctions provisions, found in section 274A of the Immigration and Nationality Act (INA), were added by the Immigration Reform and Control Act of 1986 (IRCA) These provisions further changed with the passage of the Immigration Act of 1990 and the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996 Employment is often the magnet that attracts individuals to reside in the United States illegally The purpose of the employer sanctions law is to remove this magnet by requiring employers to hire only individuals who may legally work here: US citizens, noncitizen nationals, lawful permanent residents, and aliens authorized to work To comply with the law, employers must verify the identity and employment authorization of each person they hire, complete and retain a Form I-9, Employment Eligibility Verification, for each employee, and refrain from discriminating against individuals on the basis of national origin or citizenship (See Part Four for more information on unlawful discrimination) Form I-9 helps employers to verify individuals who are authorized to work in the United States You, as an employer, must complete a Form I-9 for every new employee you hire after November 6, 1986 This Handbook provides guidance on how to properly complete Form I-9 and answers frequently asked questions about the law as it relates to Form I-9.
