African Americans

Ordinary people don't experience history as it is taught by historians. They live across the convenient chronological divides we impose on the past. The same people who lived through the Civil War and the eradication of slavery also dealt with the hardships of Reconstruction, so why do we almost always treat them separately? In *Children of Fire*, renowned historian Thomas C. Holt challenges this form to tell the story of generations of African Americans through the lived experience of the subjects themselves, with all of the nuances, ironies, contradictions, and complexities one might expect. Building on seminal books like John Hope Franklin's *From Slavery to Freedom* and many others, Holt captures the entire African American experience from the moment the first twenty African slaves were sold at Jamestown in 1619. Each chapter focuses on a generation of individuals who shaped the course of American history, hoping for a better life for their children but often confronting the ebb and flow of their civil rights and status within society. Many familiar faces grace these pages—Frederick Douglass, W.E.B. DuBois, Martin Luther King, and Barack Obama—but also some overlooked ones. Figures like Anthony Johnson, a slave who bought his freedom in late seventeenth century Virginia and built a sizable plantation, only to have it stolen away from his children by an increasingly racist court system. Or Frank Moore, a WWI veteran and sharecropper who sued his landlord for unfair practices, but found himself charged with murder after fighting off an angry white posse. Taken together, their stories tell how African Americans fashioned a culture and identity amid the turmoil of four centuries of American history.

Making Black History

A Concise History of American Antisemitism shows how Christianity's negative

views of Jews pervaded American history from colonial times to the present. The book describes the European background to American anti-Semitism, then divides American history into time periods, and examines the anti-Semitic ideas, personalities, and literature in each period. It also demonstrates that anti-Semitism led to certain behaviors in some United States officials that resulted in the deaths of hundreds of thousands of Jews during the Holocaust. Clear and forceful, A Concise History of American Antisemitism is an important work for undergraduate course use and for the general public interested in the roots of the current rash of anti-Semitism.

Reconstruction

Presents an epic history that covers the period from the end of World War I through the 1970s, chronicling the decades-long migration of African Americans from the South to the North and West through the stories of three individuals and their families.

African Americans

Chronicles the history of the laws enacted following the conclusion of the Civil War that segregated the South into white and non-white segments, discussing how they were established, justified, and finally dismantled.

Torchbearers of Democracy

Born on the Links encompasses the entire 600-year history of golf, from the links in Scotland in the fifteenth century up to the present. It not only covers golf's origins, evolution, and development of the rules, equipment, and playing fields, but also features accounts of its greatest players and historic events.

The Color Line

In this historical handbook, readers will virtually hear the voices of select African-American religious leaders and learn of the events, movements, and organizations that have contributed to the formations and development of African-American Christianity.

Creating Black Americans

In the Jim Crow era, along with black churches, schools, and newspapers, African Americans also had their own history. *Making Black History* focuses on the engine behind the early black history movement, Carter G. Woodson and his Association for the Study of Negro Life and History (ASNLH). Author Jeffrey Aaron Snyder shows how the study and celebration of black history became an increasingly important part of African American life over the course of the early to mid-twentieth century. It was the glue that held African Americans together as “a people,” a weapon to fight racism, and a roadmap to a brighter future. *Making Black History* takes an expansive view of the historical enterprise, covering not just the production of black history but also its circulation, reception, and performance. Woodson, the only professional historian whose parents had been born into slavery, attracted a strong network of devoted members to the ASNLH, including professional and lay historians, teachers, students, “race” leaders, journalists, and artists. They all grappled with a set of interrelated questions: Who and what is “Negro”? What is the relationship of black history to American history? And what are the purposes of history? Tracking the different answers to these questions, Snyder recovers a rich public discourse about black history that took shape in journals, monographs, and textbooks and sprang to life in the pages of the black press, the classrooms of black schools, and annual celebrations of Negro History Week. By lining up the Negro history movement’s trajectory with the wider arc of African American history, Snyder changes our understanding of such signal aspects of twentieth-century black life as segregated schools, the Harlem Renaissance, and the emerging modern civil rights movement.

To Make Our World Anew

The Color Line provides a concise history of the role of race and ethnicity in the US, from the early colonial period to the present, to reveal the public policies and private actions that have enabled racial subordination and the actors who have fought against it. Focusing on Native Americans, African Americans, Asian Americans, and Latino Americans, it explores how racial subordination developed in the region, how it has been resisted and opposed, and how it has been sustained through independence, the abolition of slavery, the civil rights movement, and subsequent reforms. The text also considers the position of European immigrants to the US, interrogates relevant moral issues, and identifies persistent problems of public policy, arguing that all four centuries of racial subordination are relevant to understanding contemporary America and some of its most urgent issues. This book will be of interest to students and scholars of American history, the history of race and ethnicity, and other related courses in the humanities and social sciences.

Born on the Links

The twin acts of singing and fighting for freedom have been inseparable in African American history. May We Forever Stand tells an essential part of that story. With lyrics penned by James Weldon Johnson and music composed by his brother Rosamond, "Lift Every Voice and Sing" was embraced almost immediately as an

anthem that captured the story and the aspirations of black Americans. Since the song's creation, it has been adopted by the NAACP and performed by countless artists in times of both crisis and celebration, cementing its place in African American life up through the present day. In this rich, poignant, and readable work, Imani Perry tells the story of the Black National Anthem as it traveled from South to North, from civil rights to black power, and from countless family reunions to Carnegie Hall and the Oval Office. Drawing on a wide array of sources, Perry uses "Lift Every Voice and Sing" as a window on the powerful ways African Americans have used music and culture to organize, mourn, challenge, and celebrate for more than a century.

Patient-Centered Clinical Care for African Americans

In civil-rights-era Chicago, a dedicated group of black activists, educators, and organizations employed black public history as more than cultural activism. Their work and vision energized a black public history movement that promoted political progress in the crucial time between World War II and the onset of the Cold War. Ian Rocksborough-Smith's meticulous research and adept storytelling provide the first in-depth look at how these committed individuals leveraged Chicago's black public history. Their goal: to engage with the struggle for racial equality. Rocksborough-Smith shows teachers working to advance curriculum reform in public schools, while well-known activists Margaret and Charles Burroughs pushed for greater recognition of black history by founding the DuSable Museum of African American History. Organizations like the Afro-American Heritage Association, meanwhile, used black public history work to connect radical politics and nationalism. Together, these people and their projects advanced important ideas about race, citizenship, education, and intellectual labor that paralleled the shifting terrain of mid-twentieth century civil rights.

Through the Storm, Through the Night

This title is an easy-to-read guide outlining specific differences in communication, clinical therapies, medications, protocols, and other critical approaches to the care of African Americans. The book discusses a wide range of disorders impacting African Americans and takes a comprehensive and evidence-based approach to the clinical support of providers that see African American patients. Recording the worst medical outcomes of any racial/ethnic group in America, African Americans have the highest mortality, longest hospital length of stay, worst compliance with medications and referrals, and the lowest trust of the healthcare system. Indeed, there are countless well-designed studies that validate verified differences in the clinical care of a number of pervasive diseases in African Americans, including hypertension, heart disease, kidney disease, obesity, cancer, and more. Despite the widespread acknowledgement of the existence of health disparities among racial/ethnic groups, the overall outcomes for African Americans are still the most shocking. From high infant mortality to death by almost any cause, African Americans have the worst data of any other racial or ethnic group. Patient-Centered Clinical Care for African Americans, a highly practical and first-of-its-kind title, illuminates these alarming issues and represents a major contribution to the clinical literature. It will be of significant interest to all physicians, clinicians, and allied health personnel.

Enhanced by nearly 150 images of painting, sculptures, photographs, quilts, and other work by black artists, offers a survey of African American history which covers the predominant political, economic, and demographic conditions of black Americans.

May We Forever Stand

An introduction to the complex relationship between African Americans and the African continent What is an "African American" and how does this identity relate to the African continent? Rising immigration levels, globalization, and the United States' first African American president have all sparked new dialogue around the question. This book provides an introduction to the relationship between African Americans and Africa from the era of slavery to the present, mapping several overlapping diasporas. The diversity of African American identities through relationships with region, ethnicity, slavery, and immigration are all examined to investigate questions fundamental to the study of African American history and culture.

African Americans and Africa

For the 380,000 African American soldiers who fought in World War I, Woodrow Wilson's charge to make the world "safe for democracy" carried life-or-death meaning. Chad L. Williams reveals the central role of African American soldiers in the global conflict and how they, along with race activists and ordinary citizens, committed to fighting for democracy at home and beyond. Using a diverse range of sources, Torchbearers of Democracy reclaims the legacy of African American soldiers and veterans and connects their history to issues such as the obligations of citizenship, combat and labor, diaspora and internationalism, homecoming and racial violence, "New Negro" militancy, and African American memories of the war.

African-American History

The African-American Odyssey is a compelling story of agency, survival, struggle and triumph over adversity. The authors highlight what it has meant to be black in America and how African-American history is inseparably woven into the greater context of American history. The text provides accounts of the lives of ordinary men and women alongside those of key African-Americans and the impact they have had on the struggle for equality to illuminate the central place of African-Americans in U.S. history more than any other text.

Caring for Equality

"A Black Women's History of the United States is a critical survey of black women's complicated legacy in America, as it takes into account their exploitation and victimization as well as their undeniable and substantial contributions to the country since its inception"--

Children of Fire

The first popular history of the former American slaves who founded, ruled, and lost Africa's first republic In 1820, a group of about eighty African Americans reversed the course of history and sailed back to Africa, to a place they would

name after liberty itself. They went under the banner of the American Colonization Society, a white philanthropic organization with a dual agenda: to rid America of its blacks, and to convert Africans to Christianity. The settlers staked out a beachhead; their numbers grew as more boats arrived; and after breaking free from their white overseers, they founded Liberia—Africa's first black republic—in 1847. James Ciment's *Another America* is the first full account of this dramatic experiment. With empathy and a sharp eye for human foibles, Ciment reveals that the Americo-Liberians struggled to live up to their high ideals. They wrote a stirring Declaration of Independence but re-created the social order of antebellum Dixie, with themselves as the master caste. Building plantations, holding elegant soirees, and exploiting and even helping enslave the native Liberians, the persecuted became the persecutors—until a lowly native sergeant murdered their president in 1980, ending 133 years of Americo rule. The rich cast of characters in *Another America* rivals that of any novel. We encounter Marcus Garvey, who coaxed his followers toward Liberia in the 1920s, and the rubber king Harvey Firestone, who built his empire on the backs of native Liberians. Among the Americoes themselves, we meet the brilliant intellectual Edward Blyden, one of the first black nationalists; the Baltimore-born explorer Benjamin Anderson, seeking a legendary city of gold in the Liberian hinterland; and President William Tubman, a descendant of Georgia slaves, whose economic policies brought Cadillacs to the streets of Monrovia, the Liberian capital. And then there are the natives, men like Joseph Samson, who was adopted by a prominent Americo family and later presided over the execution of his foster father during the 1980 coup. In making Liberia, the Americoes transplanted the virtues and vices of their country of birth. The inspiring and troubled history they created is, to a remarkable degree, the mirror image of our own.

100 African-Americans Who Shaped American History

Paul Harvey illustrates how black Christian traditions provided theological, institutional, and personal strategies for cultural survival during bondage and into an era of partial freedom. At the same time, he covers the ongoing tug-of-war between themes of "respectability" versus practices derived from an African heritage; the adoption of Christianity by the majority; and the critique of the adoption of the "white man's religion" from the eighteenth century to the present. The book also covers internal cultural, gendered, and class divisions in churches that attracted congregants of widely disparate educational levels, incomes, and worship styles. *Through the Storm, Through the Night* provides a lively overview of the history of African American religion, beginning with the birth of African Christianity amidst the Transatlantic slave trade, and tracing the story through its growth in America. Paul Harvey successfully uses the history of African American religion to portray the complexity and humanity of the African American experience.

Making Black Scientists

While making up a smaller percentage of Minnesota's population compared to national averages, African Americans have had a profound influence on the history and culture of the state from its earliest days to the present. Author David Taylor chronicles the rich history of Blacks in the state through careful analysis of census

and housing records, newspaper records, and first-person accounts. He recounts the triumphs and struggles of African Americans in Minnesota over the past 200 years in a clear and concise narrative. Major themes covered include settlement by Blacks during the territorial and early statehood periods; the development of urban Black communities in St. Paul, Minneapolis, and Duluth; Blacks in rural areas; the emergence of Black community organizations and leaders in the late-nineteenth and early-twentieth centuries; and Black communities in transition during the turbulent last half of the twentieth century. Taylor also introduces influential and notable African Americans: George Bonga, the first African American born in the region during the fur trade era; Harriet and Dred Scott, whose two-year residence at Fort Snelling in the 1830s later led to a famous, though unsuccessful, legal challenge to the institution of slavery; John Quincy Adams, publisher of the state's first Black newspaper; Fredrick L. McGhee, the state's first Black lawyer; community leaders, politicians, and civil servants including James Griffin, Sharon Sayles Belton, Alan Page, Jean Harris, and Dr. Richard Green; and nationally influential artists including August Wilson, Lou Bellamy, Prince, Jimmy Jam, and Terry Lewis. *African Americans in Minnesota* is the fourth book in *The People of Minnesota*, a new series dedicated to telling the history of the state through the stories of its ethnic groups in accessible and illustrated paperbacks.

Black Faces, White Spaces

"Spanning more than two hundred years, *An African American and Latinx History of the United States* is a revolutionary, politically charged narrative history, arguing that the "Global South" was crucial to the development of America as we know it. Scholar and activist Paul Ortiz challenges the notion of westward progress as exalted by widely taught formulations such as "manifest destiny" and "Jacksonian democracy," and shows how placing African American, Latinx, and Indigenous voices unapologetically front and center transforms US history into one of the working class organizing against imperialism. Drawing on rich narratives and primary source documents, Ortiz links racial segregation in the Southwest and the rise and violent fall of a powerful tradition of Mexican labor organizing in the twentieth century, to May 1, 2006, known as International Workers' Day, when migrant laborers--Chicana/os, Afrocubanos, and immigrants from every continent on earth--united in resistance on the first "Day Without Immigrants." As African American civil rights activists fought against Jim Crow laws and Mexican labor organizers warred against the suffocating grip of capitalism, Black and Spanish-language newspapers, abolitionists, and Latin American revolutionaries coalesced around movements built between people from the United States and people from Central America and the Caribbean. And in stark contrast to the resurgence of "America first" rhetoric, Black and Latinx intellectuals and organizers today have urged the United States to build bridges of solidarity with the nations of the Americas. Incisive and timely, this bottom-up history, told from the interconnected vantage points of Latinx and African Americas, reveals the radically different ways that people of the diaspora have addressed issues still plaguing the United States today, and it offers a way forward in the continued struggle for universal civil rights."--Dust jacket.
