Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

### **Kawaii Nightmare**

For the first time, one of the major names in Italian car design tells his story from the beginning; from when he made his first sketches on paper, unbeknown to his parents and not only of cars, to reaching a point at which his name became synonymous with some of the best known and most important cars on the international front. In his 23-year career at Pininfarina, Leonardo Fioravanti, who was first a designer and architect, then managing director and director general of 'Studi & Ricerche' department, created some of the most beautiful Ferraris of all time; they ranged from the 1965 250 LM sports coupe Speciale to the immortal 1968 Daytona through to the 1975 308 GTB and GTS and the 1984 288 GTO, as well as the P5 and P6 of 1968. While continuing his Ferrari essay during his Pininfarina career, Fioravanti also guided the creation of numerous other projects, among them the Dino road car, the 1980 Pinin four-door prototype and went on to the 1984 Testarossa and the 1987 F40. He worked for the Fiat Group from 1988 until 1991, during which time he took on the roles of deputy director general of Ferrari, later became responsible for advanced design CRF and then head of the Fiat Styling Centre. In 1987, he founded Fioravanti srl, an architectural studio, and in 1991 he extended his services to industry, in particular the design of means of transport. Images of an epoch, designs from his own personal archive never previously seen and, above all, a passionate first person account. Those are the key elements of this outstanding book which, through the creations of Leonardo Fioravanti, covers over 50 years of the history of automobile style and culture.

### **Fiat and Lancia Twin Cams**

Revised and updated to 2007, "Alfa Romeo - Production Cars" was first published in 1996, written by two experts: Stefano d'Amico (President of RIAR, the Alfa Romeo Italian Register) and Maurizio Tabucchi (consultant at both RIAR and ASI, the Italian Vintage Automobile Association). This fascinating story of Alfa Romeo's cars is told model by model by a text that results from precise reconstruction of the facts, enriched with detailed technical specifications (chassis numbering included) and rare archive illustrative material. All of Alfa's recent production can also be found in the book, starting with the 155, the last car in the previous edition, the following 156, 145, 146, 147, 166, 159, up to the last "Brera" and "Spider"; A long-awaited new edition that no Alfa Romeo fan should miss. Written in English and Italian.

### **Ignition and Timing**

Originally published under the title, The Book of the Villiers Engine, by C. Grange. This re-print of the 1956 tenth edition has been updated with the inclusion of the 1959 supplement from the eleventh edition, the remainder of the engine type information being identical in all respects in both editions.

### **Alleggerita**

Nobody knows Alfa Romeo like the people at Sports Car Market, especially Keith Martin, who started the magazine as Alfa Romeo Market Letter almost 20 years ago. This book brings together the magazine's best articles on Alfas over the years giving detailed coverage of every car from the four-door 164s of the 90s to the Spiders of the 50s and 60s to the earliest pre-war 6C and 8C classics; from Giulias, Giuliettas, Duetto, Sprints, Zagatos, and more. Here aficionados and curious amateurs alike will find a full slate of insider information (why, for instance, is one GTV a good deal at \$30,000, and another a horrible buy at \$10,000?), in-person reviews of Alfas that have actually sold at auction, and exactly what the SCM experts think of the prices they brought. Whether you're thinking of buying your first Alfa or your tenth, you'll find information inside Keith Martin on Collecting Alfa Romeo that you won't get anywhere else and that will help you make the right decision, the very first time.

Introduced in 1955 as a replacement for the aged TF Midget, the MGA won instant acclaim with its modern styling and sporting performance. The car was a great success, and sold well over 100,000 examples in a seven-year production run. This book includes full specifications for each model, details of the works MGAs as well as production models, and advice on buying and owning an MG.

### **Le Zagato**

Exactly 100 years ago in 1910 at Portello on the outskirts of Milan, a new company was established in the still young world of motoring of the period: Alfa Romeo. A name which, in those 100 years, has become synonymous with cars, so important has its presence been both on the industrial and sports fronts as well as culturally. In this long period of time, the celebrated Italian marque brought to life cars that have entered by right into the history of the automobile and not only that of Italy, like the 1900, the Giulietta and the Giulia. Yet at the same time the company was able to write its own unrepeatable pages in the annuals of motor sport, winning all the most important races: from the Mille Miglia to Le Mans, from the Tourist Trophy to the World Sports Car Championship. An epic about which just almost everything has been written; but this volume by a great authority on the subject in Maurizio Tabucchi aims to be a tribute to this tremendous story, told above all by pictures, many of them previously unpublished, and supported by brief but exhaustive texts.

## **The Alfa Romeo V6 Engine High-Performance Manual**

### **Jaguar Xk120, 140, 150 and Mk. 7, 8 and Workshop Manual**

There is one direct link between Alfa Romeo and Ferrari, its name is Enzo Anselmo Ferrari. Born on the 18th of February 1898, he joined Alfa Romeo in the early 1920s to become one of their many race drivers. In the beginning he participated in local events, but thanks to his positive results; later also competed in more prestigious races. Nevertheless, his real talent had been the management. Thanks to this, he founded in '29 the Scuderia Ferrari, which became the official Alfa Romeo racing team. Until 1932 Enzo continued as race driver and after this, he concentrated on being the team manager. In '37 Alfa Romeo reduced his position to sports director, what means practically that his possibility to take decisions had been drastically limited. For Enzo this was not tolerable and as consequence he left the company in '39. Apart from this, the ways of both manufactures still crossed many times, as key employees changed from one company to the other or as both used the same coach-builders to design their fast and elegant creations. Even technology transfer happened up to today. Alfa Romeo, Ferrari, Art & History" is not just another publication, but tells the history of these two iconic Italian car manufactures, from one of their first creations in 1911 until today. The author uses official die-cast model cars. You will not only find texts and boxes of technical specifications, but images celebrating the unique design of the vehicles, which reflect their engineers' visions and eras. More than ordinary automobiles, even more than sports cars; both, Alfa Romeo and Ferrari produced design objects for the global pop culture, sometimes reflecting the actual zeitgeist, other times being ahead of it and sometimes even creating the fashion. As each of the more than 370 presented cars is unique, they all have their own story. This is not limited to Alfa Romeo and Ferrari, but also relates to other companies as Fiat, Lancia, Lamborghini, General Motors and Ford. Famous design studios included Pininfarina, Zagato and Bertone. To have a complete picture, besides presenting production cars, the book also includes the racing machines and rare show cars.

### **Alfa Romeo Production Cars from 1910**

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success.

This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

The first book of its kind, How to Rebuild the Honda B-Series Engines shows exactly how to rebuild the ever-popular Honda B-series engine. The book explains variations between the different B-series designations and elaborates upon the features that make this engine family such a tremendous and reliable design. Honda B-series engines are some of the most popular for enthusiasts to swap, and they came in many popular Honda and Acura models over the years, including the Civic, Integra, Accord, Prelude, CRX, del Sol, and even the CR-V. In this special Workbench book, author Jason Siu uses more than 600 photos, charts, and illustrations to give simple step-by-step instructions on disassembly, cleaning, machining tips, pre-assembly fitting, and final assembly. This book gives considerations for both stock and performance rebuilds. It also guides you through both the easy and tricky procedures, showing you how to rebuild your engine and ensure it is working perfectly. Dealing with considerations for all B-series engines-foreign and domestic, VTEC and non-VTEC-the book also illustrates many of the wildly vast performance components, accessories, and upgrades available for B-series engines. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendices are packed full of valuable reference information, and the book

includes a Work-Along-Sheet to help you record vital statistics and measurements along the way. You'll even find tips that will help you save money without compromising top-notch results.

### **Autocar**

Allan Moffat is one of the legends of Australian motor sport. His extraordinary driving career, which lasted from the mid-1960s to the late 1980s, coincided with the heyday of touring car racing. His achievements included 32 Australian Touring Car wins, four of them at Bathurst, and four Championships. His Trans Am Mustang, surely the definitive racing touring car of all time, claimed more than 100 victories. But Moffat's impact went well beyond the winner's podium. He brought a new level of business professionalism to motor racing, pioneering the use of sponsorship in a way that would change the sport forever. Moffat, intense, reserved and driven, has been known as a man of few words. For years motor-sport fans have wanted to hear his story, and now Allan is telling it for the first time. His book is the compelling account of a young Canadian who moved to Australia with his family as a boy and became one of our greatest racing drivers. It's a tale of the epic rivalry with Peter Brock, which surprisingly culminated in a driving partnership and huge mutual respect, and it's about nostalgia for the glory days of motor sport in this country, when the concept of Holden versus Ford really did divide the nation, and when Mount Panorama was the true Mecca for hundreds of thousands, if not millions, of Australians. Filled with intense rivalries, huge egos, on-course stories and incidents, and all against the backdrop of our motor sport history over more than forty years, this is THE book for all fans of Australian motor racing.

### **Ottagono**

“ My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript. The Daimler-Benz Aktiengesellschaft of Germany has been indefatigable in providing me with material in regard to certain facts connected with the early experiments of both Benz and Daimler. Mr. Frederick R. Simms, too, has spared no effort to help me with some of the inner details of Daimler’s engineering career.” ( ST. John C. Nixon - September, 1936)
