The PC Engineer's Reference Book

"This publication provides a much needed and timely tool to assist us in our collective effort to find new and better solutions to address the various threats to our marine biological diversity and productivity. It provides evidence-based recommendations on improving and accelerating actions on delivering ocean protection and management through marine protected areas and facilitates the sharing of experiences and lessons learned"--P. 4.

Everyday Electronics Databook

The heavily-revised Practical Handbook of Marine Science, Fourth Edition continues its tradition as a state-of-the-art reference that updates the field of marine science to meet the interdisciplinary research needs of physical oceanographers, marine biologists, marine chemists, and marine geologists. This edition adds an entirely new section devoted to Climate Change and Climate Change Effects. It also adds new sections on Estuaries, Beaches, Barrier Islands, Shellfish, Macroalgae, Food Chains, Food Webs, Trophic Dynamics, System Productivity, Physical-Chemical-Biological Alteration, and Coastal Resource Management. The Handbook assembles an extensive international collection of marine science data throughout, with approximately 1,000 tables and illustrations. It provides comprehensive coverage of anthropogenic impacts in estuarine and marine ecosystems from local, regional, and global perspectives. Maintaining its user-friendly, multi-sectional format, this comprehensive resource will also be of value to undergraduate and graduate students, research scientists, administrators, and other professionals who deal with the management of marine resources. The ARRL Antenna Compendium

Amidst rumors that the Paris opera house is haunted, Christine Daaé, a young Swedish girl, performs at a gala and attracts attention from both her childhood sweetheart, Raoul, and the Phantom, who is living underground. Suddenly, mysterious circumstances abound at the opera house: a stagehand is found dead, managers receive letters demanding that Christine sing the lead role, and a chandelier crashes down into the audience. When Christine reunites with Raoul, the phantom grows dangerously jealous. Will Christine stay on the stage or disappear into the opera house's dark cellars and grim secrets? Gaston Leroux's Gothic novel was first published in French in 1911. This is an unabridged version of

the translation by Alexander Teixeira de Mattos, published the same year.

W1FB's QRP Notebook

World's Best Hobby is an unusual title for a memoir, which is exactly what this book is. It's my life in the fascinating hobby of Amateur Radio. Much of my professional life is spent producing documentary and reality programs for television (including more than a few about Ham Radio) where I learned that the purpose of a title is to attract an audience and if it was also true, all the better. The challenge with documentary films is to make them entertaining first and foremost, and informational if possible. I've tried very hard to make this book entertaining, and from feedback I've gotten (from Hams and wannabee Hams who found it posted online as I was writing it) I've succeeded, at least to some extent. I tried to make the book fun because Ham Radio is fun. And Ham Radio has more facets than a cheap diamond, as you'll discover as you dig into World's Best Hobby. Enjoy! PS. Let me know what you think of World's Best Hobby - especially if you like it. 73, Dave Bell, W6AQ
