Annual Report - Manitoba Department of Health and Social Development

Providing a state-of-the-art overview of research on regional competition and co-operation, this title attempts to fully develop the understanding of the new role of regions and their behaviour, addressing questions such as how and why do regions compete.

Annual Report 2012 on the European Union's Development and External Assistance Policies and Their Implementation in 2011

Annual report of the Department of Social Welfare Western Region for the year

There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation. This important book considers the factors that influence and shape the competitive performance of regions. This is not just an issue of academic interest and debate, but also of increasing policy deliberation and action. However, as the readings in this book make clear, the very idea of regional competitiveness is itself complex and contentious. Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured. Policy formulation has tended to rush ahead of understanding and analysis, and the purpose of this book is to close this important gap in understanding. This book was previously published as a special issue of Regional Studies.

Regional Development Strategies

Report on Global Environmental Competitiveness (2013)

Annual Report of the Department of Agriculture and Conservation

This is the only annual study of Indonesia's sub-national competitiveness landscape of 34 Indonesian provinces that is conducted impartially and aimed towards Indonesian policymakers as well as the international audience. With 103 indicators covering four environments and 12 sub-environments of competitiveness, the study's unique methodology incorporates comparative strengths and weaknesses, and "what-if" policy simulations aimed at policy suggestions for each province. This edition also features a new structure and graphical presentation that offer investors an overview of each province's competitiveness landscape.

Annual Report

Indonesia's diverse economic landscape and growing importance in the global and regional stages warrant deeper understanding of the economy at sub-national levels. This book by the Asia Competitiveness Institute (ACI) is an update of ACI's annual study of the competitiveness landscape of 34 Indonesian provinces. With 100 indicators covering four environments and 12 sub-environments of competitiveness, the study's unique methodology incorporates comparative strengths and weaknesses, and 'what-if' policy simulations aimed at policy suggestions for each province. This fifth instalment will continue to feature a structure and graphical presentation that offer investors an overview of each province's competitiveness landscape. A novel addition to this update is the chapter co-authored by academics from Indonesian provinces, which details recent developments in 34 provinces of Indonesia. This latest edition also introduces a novel approach of weights assignment in the form of Shapley values as a robustness test to our findings. Additionally, a new appendix has been included which provides a richer visual representation of each province's competitiveness profile. Finally, our study on the impact of exchange rates on foreign direct investment inflows to the provinces of Indonesia is also featured as a chapter in this book. Coupled with practical insights and policy implications, this book is a recommended read for policymakers, researchers, and the general audience interested in Indonesia's economic development.

2014 Provincial and Inaugural Regional Competitiveness Analysis

2017 Annual Competitiveness Analysis and Impact of Exchange Rates on Foreign Direct Investment Inflows to Sub-National Economies of Indonesia

Leading Research Universities in a Competitive World

This report analyses the objectives, targeting, instruments and inter-governmental role sharing used by 26 regional cluster programmes in 14 OECD countries.

2016 Annual Competitiveness Analysis And Development Strategies For Indonesian Provinces

This book explores the environmental competitiveness of 133 countries around the world, presenting an index evaluation system to facilitate a comparative analysis of environmental competitiveness on a global scale. This is a new way to measure competitiveness in the light of the contradiction between world economic development and environmental protection. Global environmental competitiveness covers five aspects: the ecological environment, resources environment, environmental management, environmental impacts and environmental coordination. The authors use longitudinal study and horizontal analysis, combining qualitative and quantitative analysis methods so as to conduct an in-depth study of theoretical, empirical and methodological issues of global environmental competitiveness. The work is presented here in three main parts beginning with the theory, technical road-map and analytical approach used. The second part reports on the countries as evaluation objects, analyzing the development status of global environmental competitiveness as a whole and revealing the strengths and weaknesses of each country's environmental competitiveness. Basic paths and strategies to enhance the competitiveness level are presented. In the third part the reader will discover a sub-report and evaluation of the environmental competitiveness for 133 countries around the world, revealing the characteristics and relative differences of countries representing different levels of development, in order to provide an important decision-making reference to those considering environmental economic policies, especially those considering accelerating a green economic transformation and enhancing environmental competitiveness. This book will appeal to scholars and professionals with an interest in environmental issues and environmental competitiveness at a global level, as well as those with an interest in each of the 133 countries analyzed in this text, including environmental policy makers in those countries.

Annual Report on Mines

Innovation, Agglomeration and Regional Competition

Steel Industry Annual Report on Competitive Conditions in the Steel Industry and Industry Efforts to Adjust and Modernize

This OECD Territorial Review of Toronto proposes a new sustainable competitiveness agenda to enhance productivity, focusing on innovation, cultural diversity and infrastructure, as well as on green policies for this key economic region of Canada.

2015 Annual Competitiveness Analysis and Development Strategies for Indonesian Provinces

Indonesia's diverse economic landscape and growing importance in the global and regional stages warrant deeper understanding of the economy at sub-national levels. This book by the Asia Competitiveness Institute (ACI) is an update of ACI's annual study of the competitiveness landscape of 34 Indonesian provinces. With 100 indicators covering four environments and 12 sub-environments of competitiveness, the study's unique methodology incorporates comparative strengths and weaknesses, and "what-if" policy simulations aimed at policy suggestions for each province. This fourth instalment continues to feature a structure and graphical presentation that offer investors an overview of each province's competitiveness landscape. Coupled with evidence-based findings and analyses, this book is a recommended read for policymakers, stakeholders and general audience interested in the economic developments of Indonesia's provinces.

2014 Annual Provincial and Regional Competitiveness Analysis for Greater China Economies

This book is a world-class report by the Asian Competitiveness Institute (ACI), updated annually to analyse Indonesia's competitiveness at both the 33 provincial levels and six regional groupings based on the central government's Master Plan for Acceleration and Expansion of Indonesia's Economic Development (MP3EI). With 104 indicators covering four environments, the study's unique methodology incorporates comparative strengths and weaknesses as well as applies Geweke causality analysis to a subset of indicators. Apart from scores and rankings, what-if policy simulations offer various provinces practical prescriptions to improve overall competitiveness to accelerate economic growth and development in a balanced, fair and sustainable way. Such qualitative and quantitative analyses in collaboration with various stakeholders generates an exciting pathway for Indonesia to attain its rightful place in both the Asian region and global contexts.

This book is an update of the annual flagship study by the Asia Competitiveness Institute at the Lee Kuan Yew School of Public Policy, National University of Singapore, that dissects Indonesia's sub-national competitiveness at both the provincial level (covering 34 provinces) and the regional level (covering six major island groups). Based on a rich dataset of 100 indicators, the study covers four environments of competitiveness: (1) Macroeconomic Stability, (2) Government and Institutional Setting, (3) Financial, Businesses, and Manpower Conditions, and (4) Quality of Life and Infrastructure Development. It also presents each province and region's comparative strengths and weaknesses, and conducts "what-if" policy simulations to propose policy suggestions. Aside from exploring competitiveness, the book also features empirical research on the determinants of growth slowdown in Indonesian provinces and its impact on policy implications. It also features the inaugural Ease of Doing Business Index on Attractiveness to Investors, Business Friendliness and Competitive Policies (EDB Index ABC) for Indonesian provinces. Coupled with practical insights and policy implications, this book is a recommended read for policymakers, researchers, and the general audience interested in Indonesia's economic development. 2014 Annual Competitiveness Analysis And Development Strategies For Indonesian Provinces

Guide to Petroleum Statistical Information

The Canadian Annual Review of Politics and Public Affairs is an acclaimed series that offers informed commentary on important national events and considers their significance in local and international contexts. This latest instalment covers a year of dramatic activity in provincial politics. In 2007 the economy continued on its remarkable run of growth, allowing the new Conservative government to continue its predecessor's tradition of presenting a balanced budget while further reducing Canadians' taxes and increasing government spending. With the opposition Liberals not looking to engineer a quick election, federal politics was both cautious and static. In the provinces, however, the Liberals won electoral victories in Quebec and Ontario, while the NDP won a third consecutive election in Manitoba. The Canadian dollar rose past parity

2016 Growth Slowdown Analysis, Ease Of Doing Business Index, And Annual Competitiveness Studies Of Indonesia's Sub-national Economies

Although research universities represent only fifteen to twenty per cent of national university systems worldwide, they provide the bulk of fundamental research and doctoral training. Written by two veteran university administrators, *Leading Research Universities in a Competitive World* focuses on the international ranking systems' uneven distribution of these institutions in industrialized countries, and the organizational factors affecting their efficacy, prestige, and performance. Robert Lacroix and Louis Maheu argue that research universities, despite being embedded within academia's mindset and rules, have to master market influences and relationships in order to produce new knowledge and attract the rare talent and limited financial assets required for successful research and education activities. Comparing the configuration of higher education systems in the US, UK, France, and Canada, the authors outline the ways in which research universities, which need public funding and have to engage diverse forms of state regulation, may possess sufficient autonomy to behave as independent actors. They demonstrate that reaching an equilibrium between autonomy and state regulation, though challenging, is an essential element in the success of high performing research universities. *Leading Research Universities in a Competitive World* illuminates the operation of these institutions through substantive quantitative and qualitative datasets to address the fundamental question of why universities perform differently.

Interregional Competition in Canadian Cereal Production

Regional development strategies have become the focus of attention in many countries in the 1990s. This textbook provides a conceptual, theoretical and empirical analysis of regional development strategies within a European context It

Download File PDF Annual Provincial And Regional Competitiveness Analysis For Greater China Economies 2014 Development Strategies Under The New Normal

examines the various regional development strategies which are currently being pursued within the regions of Europe - defined in its loosest term to include East and West. The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies, and there is also private sector approach to regional economic development. There are many case studies from Europe and from other parts of the world, including Japan, thereby providing lessons that different countries and regions can learn from each other.
