Heartbreaking stories from survivors along the Texas Gulf Coast Hurricane Harvey was one of the worst American natural disasters in recorded history. It ravaged the Texas Gulf Coast, and left thousands of people homeless in its wake. In Hurricane Harvey's Aftermath, Kevin M. Fitzpatrick and Matthew L. Spialek offer first-hand accounts from survivors themselves, providing a rare, on-the-ground perspective of natural disaster recovery. Drawing on interviews from more than 350 survivors, the authors trace the experiences of individuals and their communities, both rich and poor, urban and rural, white, Latinx, and Black, and how they navigated the long and difficult road to recovery after Hurricane Harvey. From Corpus Christi to Galveston, they paint a vivid, compelling picture of heartache and destruction, as well as resilience and recovery, as survivors slowly begin rebuilding their lives and their communities. An emotionally provocative read, Hurricane Harvey's Aftermath provides insight into how ordinary people experience and persevere through a disaster in an age of environmental vulnerability.

Based on a highly successful series of articles published through the "Optician" journal, this text outlines the range of clinical ocular investigative techniques available to the optometrist and dispensing optician. High-quality, full-color illustrations accompany clear descriptions of all clinical procedures associated with effective ocular examination, from the basics of how to use the slit lamp to more complex visual field assessments such as the examination of ocular blood flow. Clinical, comprehensive and contemporary, this practical text relates knowledge to practice by outlining the benefits, advantages, disadvantages, and pitfalls of each procedure, as well as when and where to use it. This book is an invaluable clinical handbook for anyone involved in the examination of the eye. Content builds from the basics, detailing easier procedures and concepts before moving on to more complex clinical ocular investigative techniques. An evidence-based approach frequently cites expert sources. Original articles from the Optician series have been extensively edited to form an easy-to-follow, cohesive book on investigative techniques. Key point and summary tables highlight important points for quick reference. Practical advice is offered on procedures and interpretation of results, with tips on potential pitfalls.

More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities, infrastructure, and natural systems. In *A New Coast*, Jeffrey Peterson draws a comprehensive picture of how storms and rising seas will change the coast. Peterson offers a clear-eyed assessment of how governments can work with the private sector and citizens to be better prepared for the coming coastal inundation. Drawing on four decades of experience at the Environmental Protection Agency and the United States Senate, Peterson presents the science behind predictions for coastal impacts. He explains how current policies fall short of what is needed to effectively prepare for these changes and how the Trump Administration has significantly weakened these efforts. While describing how and why the current policies exist, he builds a strong case for a bold, new approach, tackling difficult topics including: how to revise flood insurance and disaster assistance programs; when to step back from the coast rather than build protection structures; how to steer new development away from at-risk areas; and how to finance the transition to a new coast. Key challenges, including how to protect critical infrastructure, ecosystems, and disadvantaged populations, are examined. Ultimately, Peterson offers hope in the form of a framework of new national policies and programs to support local and state governments. He calls for engagement from the private sector and local and national leaders in a "campaign for a new coast." *A New Coast* is a compelling assessment of the dramatic changes that are coming to America's coast. Peterson offers insights and strategies for policymakers, planners, and business leaders preparing for the intensifying impacts of climate change along the coast.

No. 3 in the 2002 Academy of Parish Clergy Top Ten Books of the Year! Cities--the anvil of civilization, the center of power, the metaphor for society itself--have been with us for thousands of years. Here converge piety and trade, security and politics. Yet just two hundred years ago only 3 percent of the world's population lived in cities. Today half does. Despite this tremendous explosion of urban growth,

the work of the church has generally lagged behind. The city presents serious challenges that cry out for answers: poverty, racism, human exploitation and government corruption. How can the church move ahead in the midst of these demands with the gospel of hope? Here, in one comprehensive volume, Harvie Conn and Manuel Ortiz, two noted scholars and proven practitioners of urban ministry, address the vital work of the church in the city. Their dual goal: to understand the city and God's work in it. Through four great waves of development, Conn and Ortiz trace the history of the city around the world. Then they tackle the critical issue of a biblical basis for urban mission. How does the Bible view the city? Are we closer to God in the country than the city? Does the Bible have an anti-urban bias? These questions are given a thorough analysis that unveils God's urban mandate as reflected in both Old and New Testaments. From this foundation the authors unpack the multifaceted nature of the city as place, as process, as center, as power, and as a place of change and stability. They move us beyond fragmented stereotypes to a new way of seeing that is holistic enough for a fully biblical ministry to develop. In addition, Conn and Ortiz lay out what the social sciences have to offer urban mission, including ethnographic and demographic studies. While showing how such studies have identified unreached cities and unreached groups within cities, they do not become captive to research but demonstrate how to keep kingdom priorities in view. Finally, Urban Ministry focuses on the essential element of leadership. While there are many books on the topic, little has been said about the particular issues and needs of urban leadership. Therefore, the authors give significant attention to developing and mentoring leaders while equipping the laity for ministry in the city. This is the essential text for bringing God's kingdom to the city through the people of God.

The Chicago Legal News

Urban mass transportation act of 1963

In the wake of the monstrous projects of Hitler, Stalin, Mao, and others in the twentieth century, the idea of utopia has been discredited. Yet, historian Jay Winter suggests, alongside the 'major utopians' who murdered millions in their attempts to transform the world were disparate groups of people trying in their own separate ways to imagine a radically better world. This original book focuses on some of the twentieth-century's 'minor utopias' whose stories, overshadowed by the horrors of the Holocaust and the Gulag, suggest that the future need not be as catastrophic as the past. The book is organized around six key moments when utopian ideas and projects flourished in Europe: 1900 (the Paris World's Fair), 1919 (the Paris Peace Conference), 1937 (the Paris exhibition celebrating science and light), 1948 (the Universal Declaration of Human Rights), 1968 (moral indictments and student revolt), and 1992 (the emergence of visions of global citizenship). Winter considers the dreamers and the nature of their dreams as well as their connections to one another and to the history of utopian thought. By restoring minor utopias to their rightful place in the recent past, Winter fills an important gap in the history of social thought and action in the twentieth century.
