In witty slice-of-life vignettes and laugh-out-loud cultural riffs, Elizabeth Warner shares her divinely demented view of the world. Raised by a mild-mannered psychiatrist father and a slightly off-kilter mother, Warner opted out of the life that awaited the youth of WASP heaven (aka Philadelphia's Main Line)—that is, to be “typically weaned, whelped, and privately schooled, whereupon you move on to the roost-and-spawn phase.” Yet no matter how far afield she ventures—to New York to become a master junk-mail marketer or to L.A. to do a little acting—Warner can't help but feel that sometimes she's getting nowhere fast on “some kind of Protestant monorail to doom.” Whether she's spelling out the invisible word “help” on a guy's shoulder blades during unfulfilling sex, getting out of jury duty by smearing herself with soy sauce, or convincing her mother that the words “career girl” are not her death knell, Warner proves that sometimes it doesn't matter where you go in life—just as long as you've got a killer punch line.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

Striking a unique balance between skills and theory, Intercultural Competence provides readers with the background and confidence to succeed in today's multi-cultural environment. Blending both the practical and the theoretical, the concrete and the abstract, this book is both enjoyable to read and thoroughly researched. By clearly explaining different theories and the significance of cultural patterns and having readers practice what they learn via examples in the book, Intercultural Competence better prepares readers to interact in intercultural relationships. The book also provides a discussion of important ethical and social issues relating to intercultural communication. The authors cover American multiculturalism as well as global cultural issues.

Poverty has dire consequences on the ability to fulfil one's aspirations for life. Poverty has strong implications for social cohesion and societies' abilities to function in harmonious ways. This book presents the readers with the core concepts, latest development and knowledge about policies that work to eliminate absolute poverty. This volume shows what the consequences are for the quality of life of those living in poverty. It describes life for people in poverty in general, but also deals more specifically with children, in-work poverty and the elderly, thus providing a life, generational and global perspective on poverty, including the impact on people's happiness levels. The book also discusses policies aimed at

poverty reduction, such as changes to the labour market – including the risk of working poor – and shows that there is a variety of possible instruments available to reduce poverty. These range from direct provision of social security to ensuring education and a better functioning labour market. Written in an engaging and accessible style, the book provides a succinct insight into the concept of poverty, how to measure it, the situation of poverty around the globe as well as different types of possible interventions to cope with poverty. Supporting theory with examples and case studies from a variety of contexts, suggestions for further reading, and a detailed glossary, this text is an essential read for anyone approaching the study of poverty for the first time.

J. D. Bernal's monumental work, *Science in History*, was the first full attempt to analyse the reciprocal relations of science and society throughout history, from the perfection of the flint hand-axe to the hydrogen bomb. In this remarkable study he

illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, 'Science in History is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic histories of science. After reading it, it is easy to agree with C. P. Snow's orotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: The Emergence of Science, Volume 2: The Scientific and Industrial Revolutions, Volume 3: The Natural Sciences in Our Time, Volume 4: The Social Sciences: Conclusion. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.'
