When a sack of letters that were thought to have disappeared in a train crash nineteen years earlier reappears under mysterious circumstances, the inhabitants of a secluded Pakistani village wait anxiously to see what secrets may come to light. Could the letters hold any information about Judge Anwar's murder? the town--from the surviving family of the judge to a journalist reporting on the delivery of the mail packet. ### **As He Saw it**

Since its emergence in 1998, the concept of Network Centric Warfare (NCW) has become a central driver behind America's military 'transformation' and seems to offer the possibility of true integration between multinational military formations. Even though NCW, or variations on its themes, has been adopted by most armed services, it is a concept in operational and doctrinal development. It is shaping not only how militaries operate, but, just as importantly, what they are operating with, and potentially altering the strategic landscape. This paper examines how the current military dominance of the US over every other state means that only it has the capacity to sustain military activity on a global scale and that other states participating in US-led coalitions must be prepared to work in an 'interoperable' fashion. It explores the application of computer networks to military operations in conjunction with the need to secure a network's information and to assure that it accurately represents situational reality. Drawing on an examination of how

networks affected naval operations in the Persian Gulf during 2002 and 2003 as conducted by America's Australian and Canadian coalition partners, the paper warns that in seeking allies with the requisite technological capabilities, but also those that it can trust with its information resources, the US may be heading towards a very secure digital trap.

With this book, Karin Roseblatt presents a gendered history of the politics and political compromise that emerged in Chile during the 1930s and 1940s, when reformist popular-front coalitions held power. While other scholars have focused on the economic realignments and novel political pacts that characterized Chilean politics during this era, Roseblatt explores how gender helped shape Chile's evolving national identity. Roseblatt examines how and why the aims of feminists, socialists, labor activists, social workers, physicians, and political leaders converged around a shared gender ideology. Tracing the complex negotiations surrounding the implementation of new labor, health, and welfare policies, she shows that professionals in health and welfare agencies sought to regulate gender and sexuality within the working class and to consolidate the male-led nuclear family as the basis of societal stability. Leftists collaborated in these efforts because they felt that strong family bonds would generate a sense of class belonging and help unify the Left, while feminists perceived male familial

responsibility as beneficial for women. Diverse actors within civil society thus reworked the norms of masculinity and femininity developed by state agencies and political leaders--even as others challenged those ideals.

Hu Shih (1891-1962),. In the 1910s, Hu studied at Cornell University and later Columbia University, both in the United States. At Columbia, he was greatly influenced by his professor, John Dewey, and became a lifelong advocate of pragmatic evolutionary change. He received his Ph.D. in Philosophy in 1917 and returned to lecture at Peking University. Hu soon became one of the leading and most influential intellectuals during the May Fourth Movement and later the New Culture Movement. His most widely recognized achievement during this period was as a key contributor to Chinese liberalism and language reform in his advocacy for

the use of written vernacular Chinese. Hu Shih was the Republic of China's Ambassador to the United States of America (1938-1942) and later Chancellor of Peking University (1946-1948). In 1939 Hu Shih was nominated for a Nobel Prize in literature and in 1958 became president of the "Academia Sinica" in Taiwan, where he remained until his death in Nangang at the age of 71. This diverse collection brings together his English essays, speeches and academic papers, as well as book reviews, all written between 1919 and 1962. English Writings of Hu Shih represents his thinking and insights on such topics as scientific methodology, liberalism and democracy, and social problems. It can also serve as a helpful resource for those who study Hu Shih and his views on ancient and modern China. The first volume "Chinese Philosophy and Intellectual History" allows readers to trace the development of Chinese thought and see the historical methodology applied therein. The second volume "Literature and Society" mainly includes Hu Shih's works on language reform, which owing to his advocacy for the use of written vernacular Chinese were a success in both the educational and literary fields. The third volume "National Crisis and Public Diplomacy" mainly collects Hu's articles and speeches from his term as Ambassador of China to the U.S.A. between 1938 and 1942

A great read for fans of PBS's Poldark and Downton Abbey—first in the saga of a

man returning from battle to an estate in the pre-WWI English countryside. After serving his country in the Boer War, injured Lieutenant Paul Craddock returns to England to resume civilian life. But things have changed since he joined the Imperial Yeomanry three years ago. His father has died, leaving Paul as heir to a scrap metal business he has no intention of continuing. Instead, he purchases an auctioned-off thirteen-hundred-acre estate in a secluded corner of Devon. Neglected and overgrown, Shallowford becomes the symbol of all that Paul has lost—and a reminder of the gentle place his homeland once was. And here, on this sprawling stretch of land, he will be changed by his love for two women: fiercely independent Grace Lovell, and lovely, demure Claire Derwent. Set in the English countryside in the first part of the previous century—from the long “Edwardian afternoon” following the death of Queen Victoria, to the gathering storm of World War I—*Long Summer Day* is the story of a man, his family, and a people struggling to adapt to life in a new world. *Long Summer Day* is the first novel in R. F. Delderfield’s saga *A Horseman Riding By*, which continues with *Post of Honour* and *The Green Gauntlet*.

### **Season of the Rainbirds**

The story of the brave officers and men of the nuclear attack submarine USS *Queenfish*, who made the first survey of an extremely important and remote region of the Arctic Ocean, covering 3100 miles over a period of some 20 days at a

laborious average speed of 6.5 knots or less. The unpredictability of deep-draft sea ice, shallow water, and possible Soviet discovery, all played a dramatic part in this fascinating 1970 voyage. Inspired by this polar experience, Captain McLaren later became one of the world's foremost Arctic scientists.--From publisher description.

Hu Shih and Intellectual Choice in Modern China sets out to analyze the life and

thought of Hu Shih as a key to understanding China in his lifetime. The study focuses on the inner tensions and dimensions of Hu's life and attempts to reconstruct the intellectual and emotional dilemmas that his life encompassed. By describing Hu's pessimism and alienation aroused by an age of chaos, the study reveals what is meant to be a transitional figure in twentieth-century China. By extension, the book is a study of the tragedy of a Chinese cosmopolitan intellectual who could find no satisfying role in the life of his own turbulent nation.

The shocking truth about how state governments and their private industry partners are profiting from the social programs meant to support disadvantaged Americans. Government aid doesn't always go where it's supposed to. Foster care agencies team up with companies to take disability and survivor benefits from abused and neglected children. States and their revenue consultants use illusory schemes to siphon Medicaid funds intended for children and the poor into general state coffers. Child support payments for foster children and families on public assistance are converted into government revenue. And the poverty industry keeps expanding, leaving us with nursing homes and juvenile detention centers that sedate residents to reduce costs and maximize profit, local governments buying nursing homes to take the facilities' federal aid while the elderly languish with poor care, and counties hiring companies to mine the poor for additional funds in modern day debtor's prisons. In *The Poverty Industry*, Daniel L. Hatcher shows us how state governments and their private industry partners are profiting from the social safety net, turning America's most vulnerable populations into sources of

revenue. The poverty industry is stealing billions in federal aid and other funds from impoverished families, abused and neglected children, and the disabled and elderly poor. As policy experts across the political spectrum debate how to best structure government assistance programs, a massive siphoning of the safety net is occurring behind the scenes. In the face of these abuses of power, Hatcher offers a road map for reforms to realign the practices of human service agencies with their intended purpose and to prevent the misuse of public taxpayer dollars. With more Americans than ever before seeking unemployment benefits, it is essential to remedy the nefarious practices that will impede them from receiving the full government support they are due. The Poverty Industry shows us the path to rectify this systemic inequality to ensure that government aid truly gets to those in need.
