The Law of Contribution and Reimbursement

Blackstone's Statutes on Employment Law 2019-2020

Mediation is rapidly becoming a norm in cross-border dispute resolution among European Union (EU) Member States. Accordingly, an important question for legal advisers to ask themselves is: Which jurisdiction offers the best legal framework to support a potential future mediation of my client's dispute? This book responds to this question by examining the law on mediation in each Member State on a chapter-by-chapter basis. Each country analysis applies the book's overarching principle of a specially designed Regulatory Robustness Rating System, which is thoroughly explained in an introductory chapter. This framework offers a highly effective way to analyse the quality and robustness of each of the EU's twenty-nine national jurisdictions' legal frameworks relevant to mediation (including legislation, case law, practice directions, codes of conduct, standards, and other regulatory instruments) and factor such an analysis into choices about governing law in mediation clauses and other agreements. Among the issues and topics covered are the following: • congruence of domestic and international legal frameworks; • transparency and clarity of content of mediation laws; • standards and qualifications for mediators; • rights and obligations of participants in mediation; • access to mediation services; • access to internationally recognised and skilled mediators; • enforceability of clauses and mediated settlement agreements; • confidentiality and flexibility; • admissibility of evidence from mediation in subsequent proceedings; • impact of commencement of mediation on litigation limitation periods; • relationship and attitude of courts to mediation; and • regulatory incentives for legal advisers to engage in mediation. This detailed analysis clearly allows users and other regulatory stakeholders to look closely and critically at regulatory regimes for mediation in order to make informed choices and develop appropriate strategies in relation to the law that governs their mediation. This is the first book to consider authoritatively what makes good mediation law and what makes a jurisdiction attractive for cross-border mediation purposes in terms of its regulatory framework. As a resource that identifies potential strengths and weaknesses of each EU Member State's regulatory regime, it has no peers and will be welcomed and put to use by the alternative dispute resolution community in Europe and beyond.

The Corpus Iuris Civilis, a distillation of the entire body of Roman law, was directed by the Emperor Justinian and published in a.d. 529. The Institutes, the briefest of the four works that make up the Corpus, is considered to be the cradle of Roman law and remains the best and clearest introduction to the subject. A Companion to Justinian's "Institutes" will assist the modern-day reader of the Institutes, and is specifically intended to accompany the translation by Peter Birks and Grant McLeod, published by Cornell in 1987. The book offers an intelligent and lucid guide to the legal concepts in the Institutes. The essays follow its structure and take up its principal subjects—for example, slavery, marriage, property, and capital and noncapital crimes—and give a thorough account of the law relating to each of them. Throughout, the authors explain technical Latin vocabulary and legal terms.

Avizandum Statutes on Scots Commercial and Consumer Law

The English law of contribution and reimbursement is essentially concerned with any situation where two parties must both pay a debt to a third party, compensate him for harm that he has suffered at their hands, or restore an enrichment which they have unjustly gained at his expense. These situations give rise to questions of how the parties' common liability should be shared and how their relationships with the third party, and with one another, should be adjusted so as to ensure that they each pay their proper share. This book is based on the rules of English law which determine the answers to these questions. Contribution and reimbursement claims often arise in the course of complex multi-party litigation and the rules which govern their determination are scattered through the law reports and statute books. This book provides a clear guide through this maze of legislation and case law, and gives a detailed account of all the substantive and procedural rules in the area. It is an essential source of information for legal practitioners and academics seeking practical advice on this notoriously complex subject.
