Essentials of Financial Management

"I thought I knew who I was, but I was wrong." The Silver Swan - 1. A girl who is tarnished. Tainted. One who does not fit into the confinement of legend. The Silver Swan -2. Madison Montgomery. I was lied to. I was cheated. Resigned to pick up

the scraps of empty memories and disarrayed thoughts, I left. After finally cutting the strings of manipulation, I resorted to do what I've done since I was a child, something my father drilled into my brain since I could handle my first rifle. Run. I'm a mere shadow of the girl they all knew. Lies and deceit change you. They alter your entire outlook on life. I'm Madison Montgomery, and I want to play a game. Here's what happens when I win. Riddle me this, Mads. What goes bump in the night, but is something you can't see with sight? You may run, and you may hide. If by happily ever after, you mean Bonnie & Clyde.

The End of Wall Street

Getting It Write

Expanding the world of his classic-in-the-making debut novel *Early Work*, Andrew Martin's *Cool for America* is a hilarious collection of overlapping stories that explores the dark zone between artistic ambition and its achievement. The collection is bookended by the misadventures of Leslie, a young woman (first introduced in *Early Work*) who moves from New York to Missoula, Montana to try to draw herself out of a lingering depression, and, over the course of the book, gains painful insight into herself through a series of intense friendships and relationships.

Other stories follow young men and women, alone and in couples, pushing hard against, and often crashing into, the limits of their abilities as writers and partners. In one story, two New Jersey siblings with substance-abuse problems relapse together on Christmas Eve; in another, a young couple tries to make sense of an increasingly unhinged veterinarian who seems to be tapping, deliberately or otherwise, into the unspoken troubles between them. In tales about characters as they age from punk shows and benders to book clubs and art museums, the promise of community acts—at least temporarily—as a stay against despair. Running throughout *Cool for America* is the characters' yearning for transcendence through art: the hope that, maybe, the perfect, or even just the good-enough sentence, can finally make things right.

Shaping the Digital Enterprise

This Book Addresses All The Major And Latest Techniques Of Data Mining And Data Warehousing. It Deals With The Latest Algorithms For Discussing Association Rules, Decision Trees, Clustering, Neural Networks And Genetic Algorithms. The Book Also Discusses The Mining Of Web Data, Temporal And Text Data. It Can Serve As A Textbook For Students Of Computer Science, Mathematical Science And Management Science, And Also Be An Excellent Handbook For Researchers In The Area Of Data Mining And Warehousing.

The Way of Tea and Justice

Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.

Thermal Analysis of Polymers

This book presents fundamental concepts and general approaches to City Logistics. City Logistics is the process of totally optimising urban logistics activities by

considering the social, environmental, economic, financial and energy impacts of urban freight movement. City Logistics initiatives are required to solve urban freight transport problems including high levels of traffic congestion, negative environmental impacts, high energy consumption and a shortage of labour. The focus of this work is on modelling City Logistics. Modelling is of crucial importance, since estimates of the impacts generated by City Logistics measures are required for evaluating them. It highlights the formulation of mathematical models of vehicle routing and scheduling with Intelligent Transport Systems (ITS), optimal terminal locations and impact estimation by City Logistics measures. Heuristics techniques such as genetic algorithms, simulated annealing and tabu search are also given to identify approximate optimal solution of these combinatorial optimisation problems. ITS provides powerful tools for efficiently managing and operating vehicle fleets. Sophisticated logistics systems can now be developed by integrating Global Positioning Systems (GPS) and Geographical Information Systems (GIS) in conjunction with application software. In this context, the book presents a theoretical and practical treatment of modelling City Logistics based on ITS.

Cane River Bohemia

Written by an experienced trader and consultant, Frans de Weert's Exotic Options Trading offers a risk-focused approach to the pricing of exotic options. By giving

readers the necessary tools to understand exotic options, this book serves as a manual to equip the reader with the skills to price and risk manage the most common and the most complex exotic options. De Weert begins by explaining the risks associated with trading an exotic option before dissecting these risks through a detailed analysis of the actual economics and Greeks rather than solely stating the mathematical formulae. The book limits the use of mathematics to explain exotic options from an economic and risk perspective by means of real life examples leading to a practical interpretation of the mathematical pricing formulae. The book covers conventional options, digital options, barrier options, cliquets, quanto options, outperformance options and variance swaps, and explains difficult concepts in simple terms, with a practical approach that gives the reader a full understanding of every aspect of each exotic option. The book also discusses structured notes with exotic options embedded in them, such as reverse convertibles, callable and puttable reverse convertibles and autocallables and shows the rationale behind these structures and their associated risks. For each exotic option, the author makes clear why there is an investor demand; explains where the risks lie and how this affects the actual pricing; shows how best to hedge any vega or gamma exposure embedded in the exotic option and discusses the skew exposure. By explaining the practical implications for every exotic option and how it affects the price, in addition to the necessary mathematical derivations and tools for pricing exotic options, Exotic Options Trading removes the mystique surrounding exotic options in order to give the reader a full understanding of every

aspect of each exotic option, creating a useable tool for dealing with exotic options in practice. “Although exotic options are not a new subject in finance, the coverage traditionally afforded by many texts is either too high level or overly mathematical. De Weert's exceptional text fills this gap superbly. It is a rigorous treatment of a number of exotic structures and includes numerous examples to clearly illustrate the principles. What makes this book unique is that it manages to strike a fantastic balance between the theory and actual trading practice. Although it may be something of an overused phrase to describe this book as compulsory reading, I can assure any reader they will not be disappointed.” —Neil Schofield, Training Consultant and author of *Commodity Derivatives: Markets and Applications* “Exotic Options Trading does an excellent job in providing a succinct and exhaustive overview of exotic options. The real edge of this book is that it explains exotic options from a risk and economical perspective and provides a clear link to the actual profit and pricing formulae. In short, a must read for anyone who wants to get deep insights into exotic options and start trading them profitably.” —Arturo Bignardi

Honest Weight

Honest Weight is the 20th century story of Toledo Scale, beginning with their fight in the first decade for weights and measures laws to outlaw dishonest scales. In narrative form, it tells the living history of the company, beginning with the

founder after he was dramatically fired by National Cash Register Company. Henry Theobald then started a scale and cash register company to compete with his old boss, the legendary John Patterson of NCR. It's the story of the inventors, leaders, craftsmen and technical breakthroughs, beginning in the first year of the 20th century up to current times. Included is the story of the innovative sales techniques developed by Theobald that led to tight-fisted merchants being willing to spend four and five times as much for a Toledo "No Springs—Honest Weight" scale than for the scale it replaced. This led to Toledo becoming the best known scale brand in the nation. It includes the story of how a plastic came to be developed for Toledo Scale under the leadership of the company's second president Hubert Bennett that led him to establish a separate, wholly owned company. This company, Plaskon, became the largest plastic company in the United States for a brief time. It tells of Toledo Scale's World War II contributions in which the company played a top-secret part in the production of the Norden bombsight and the atomic bomb. The story includes quotations from both retired company executives and current employees. It includes information obtained from an unpublished factual manuscript covering the company's first 50 years, other company archives and the Toledo Blade. A dozen historical photos are displayed, which include the first DeVilbiss computing scale, a Toledo Cash Register, and a Phinney scale which was the first patented computing scale. A few Phinney scales were manufactured in 1870. Since Toledo Scale couldn't locate one to prove they were actually manufactured, they lost a huge lawsuit to Dayton Scale that almost

broke the company. Also shown is a photo of Norman Bel Geddes' 1929-30 radical designs of a new factory and plant campus for Toledo Scale, never built due to the depression. The story includes the transition to electronic scales begun by the company's third president Harris McIntosh. This transition was completed in the final quarter of the century. And finally, the human story that resulted from the evolution of several different ownership's is told, until just a few years ago, Toledo Scale disappeared as a separate brand and was merged into Mettler-Toledo, Inc.

Case Studies in Finance

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Faith Is Not Blind

New York Magazine

This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

Learning with Cases

The Broken Puppet

Tea is the world's most popular beverage. Yet there are disturbing truths to be

faced about our morning cuppa. Priest and social activist Becca Stevens tells the remarkable story of how a local café run by women recovering from abuse, prostitution and addiction is helping to bring freedom and fair wages to the tea industry.

Data Mining Techniques

"Written with enthusiasm and dedication, Analysis for Financial Management, 9th edition, presents Financial Management in a clear and conversational style that both business students and non-financial executives comprehend." --Book Jacket.

Loose Leaf for Introductory Financial Accounting for Business

Twelve Years a Slave

"[A] winningly obsessive history of our relationship with underground places" (The Guardian), from sacred caves and derelict subway stations to nuclear bunkers and ancient underground cities--an exploration of the history, science, architecture, and mythology of the worlds beneath our feet NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR When Will Hunt was sixteen years old, he discovered an

abandoned tunnel that ran beneath his house in Providence, Rhode Island. His first tunnel trips inspired a lifelong fascination with exploring underground worlds, from the derelict subway stations and sewers of New York City to sacred caves, catacombs, tombs, bunkers, and ancient underground cities in more than twenty countries around the world. Underground is both a personal exploration of Hunt's obsession and a panoramic study of how we are all connected to the underground, how caves and other dark hollows have frightened and enchanted us through the ages. In a narrative spanning continents and epochs, Hunt follows a cast of subterraneaphiles who have dedicated themselves to investigating underground worlds. He tracks the origins of life with a team of NASA microbiologists a mile beneath the Black Hills, camps out for three days with urban explorers in the catacombs and sewers of Paris, descends with an Aboriginal family into a 35,000-year-old mine in the Australian outback, and glimpses a sacred sculpture molded by Paleolithic artists in the depths of a cave in the Pyrenees. Each adventure is woven with findings in mythology and anthropology, natural history and neuroscience, literature and philosophy. In elegant and graceful prose, Hunt cures us of our "surface chauvinism," opening our eyes to the planet's hidden dimension. He reveals how the subterranean landscape gave shape to our most basic beliefs and guided how we think about ourselves as humans. At bottom, Underground is a meditation on the allure of darkness, the power of mystery, and our eternal desire to connect with what we cannot see. Praise for Underground "A mesmerizingly fascinating tale . . . I could not stop reading this beautifully written

book."--Michael Finkel, author of *The Stranger in the Woods* "Few books have blown my mind so totally, and so often. In Will Hunt's nimble hands, excursion becomes inversion, and the darkness turns luminous. There are echoes of Sebald, Calvino, and Herzog in his elegant and enigmatic voice, but also real warmth and humor. . . . An intrepid--but far from fearless--journey, both theoretically and terrestrially."--Robert Moor, New York Times bestselling author of *On Trails*

Analysis for Financial Management

No Marketing Blurb

A Yellow Dog

This book will enable readers to understand the principles underpinning the management of pain which a particular emphasis upon the care of the older adult. The chapters will explore concepts that are recognised to be involved in the pain experience but each author will then add their own unique perspective by applying the principles to their specialist area of practice and the care of the older adult. It is structured to include the aims and outcomes of the chapter at the beginning so that readers can track their progress, and provides chapter outlines and further reading suggestions for this unique topic area.

Exotic Options Trading

The past twenty years have seen great theoretical and empirical advances in the field of corporate finance. Whereas once the subject addressed mainly the financing of corporations--equity, debt, and valuation--today it also embraces crucial issues of governance, liquidity, risk management, relationships between banks and corporations, and the macroeconomic impact of corporations. However, this progress has left in its wake a jumbled array of concepts and models that students are often hard put to make sense of. Here, one of the world's leading economists offers a lucid, unified, and comprehensive introduction to modern corporate finance theory. Jean Tirole builds his landmark book around a single model, using an incentive or contract theory approach. Filling a major gap in the field, *The Theory of Corporate Finance* is an indispensable resource for graduate and advanced undergraduate students as well as researchers of corporate finance, industrial organization, political economy, development, and macroeconomics. Tirole conveys the organizing principles that structure the analysis of today's key management and public policy issues, such as the reform of corporate governance and auditing; the role of private equity, financial markets, and takeovers; the efficient determination of leverage, dividends, liquidity, and risk management; and the design of managerial incentive packages. He weaves empirical studies into the book's theoretical analysis. And he places the corporation in its broader environment, both microeconomic and macroeconomic, and examines the two-way

interaction between the corporate environment and institutions. Setting a new milestone in the field, *The Theory of Corporate Finance* will be the authoritative text for years to come.

Freudian Slip

This book sheds light on cross-industry and industry-specific trends in today's digital economy. Prepared by a group of international researchers, experts and practitioners under the auspices of SAP's Digital Thought Leadership & Enablement team within SAP's Business Transformation Services (BTS) unit, the book furthermore presents relevant use cases in digital transformation and innovation. The book argues that breakthrough technologies have matured and hit scale together, enabling five defining trends: hyper-connectivity, supercomputing, cloud computing, a smarter world, and cyber security. It presents in detail how companies are now reimagining their products and services, business models and processes, showcasing how every business today is a digital business.

Digitalization, defined as the process of moving to a digital business, is no longer a choice but an imperative for all businesses across all industries and regions. Taking a step toward becoming a digital enterprise is demanding and challenging. The dimensions of customer centricity, leadership and strategy, business models, including offerings (products and services), processes, structure and governance, people and skills, culture, and technology foundation can serve as orientation for

digitalization. The articles in this book touch on all dimensions of this digital innovation and transformation framework and offer possible answers to some of the pressing questions that arise when practitioners seek to digitalize their business.

Early Wings Over Maine

Early Wings Over Maine provides a great introduction to the beginning of aviation in Maine. From Lindbergh to the lesser known Beryl Markham, from the Spirit of St. Lewis to the Dawn, John D. Davis has unearthed great stories and spectacular historical photographs. Sit back and enjoy a flight back in time when the shout of, "It's a plane" caused all to run out to gaze at the sky. John D. Davis was born and grew up in Freeport, Maine. He studied at Bowdoin, Boston University and the University of New Hampshire and spent a decade teaching at Bowdoin and Smith Colleges. His interest in aviation began at an early age when he attended the Maine State Air Meet at Augusta in 1937. Davis has authored six books ranging from environmental and biographical to historical subjects. In addition, he scripted and directed, Admiral Robert E. Peary: The Man and His Island, a video program featured on the Maine Public Broadcasting Network. Davis lives with his wife Eleanor in Yarmouth, Maine where he devotes his efforts to writing and landscape painting.

Strategic Retail Management

Photographs of paintings and sculpture from the 2012 exhibition Aggie Zed: Keeper's keep at the Halsey Institute of Contemporary Art, College of Charleston, South Carolina. Includes artist interview.

Neuromarketing

Presents a solid introduction to thermal analysis, methods, instrumentation, calibration, and application along with the necessary theoretical background. Useful to chemists, physicists, materials scientists, and engineers who are new to thermal analysis techniques, and to existing users of thermal analysis who wish expand their experience to new techniques and applications. Topics covered include Differential Scanning Calorimetry and Differential Thermal Analysis (DSC/DTA), Thermogravimetry, Thermomechanical Analysis and Dilatometry, Dynamic Mechanical Analysis, Micro-Thermal Analysis, Hot Stage Microscopy, and Instrumentation. Written by experts in the various areas of thermal analysis. Relevant and detailed experiments and examples follow each chapter.

Case Problems in Finance

Read PDF Blaine Kitchenware Inc Case Excel Solution

The Go-Go Years "The Go-Go Years is not to be read in the usual manner of Wall Street classics. You do not read this book to see our present situation reenacted in the past, with only the names changed. You read it because it is a wonderful description of the way things were in a different time and place." --From the Foreword by Michael Lewis The Go-Go Years is the harrowing and humorous story of the growth stocks of the 1960s and how their meteoric rise caused a multitude of small investors to thrive until the devastating market crashes in the 1970s. It was a time when greed drove the market and fast money was being made and lost as the "go-go" stocks surged and plunged. Included are the stories of such high-profile personalities as H. Ross Perot who lost \$450 million in one day, Saul Steinberg's attempt to take over Chemical Bank, and the fall of America's "Last Gatsby," Eddie Gilbert. Praise for The Go-Go Years "Those for whom the stock market is mostly a spectator sport will relish the book's verve, color, and memorable one-liners." --New York Review of Books "Please don't take The Go-Go Years too much for granted: as effortlessly as it seems to fly, it is nonetheless an unusually complex and thoughtful work of social history." --New York Times "Brooks's great contribution is his synthesis of all the elements that made the 1960s the most volatile in Wall Street history . and making so much material easily digestible for the uninitiated." --Publishers Weekly "Brooks is about the only writer around who combines a thorough knowledge of finance with the ability to perceive behind the dance of numbers 'high, pure, moral melodrama on the themes of possession, domination, and belonging.'" --Time

The Management of Pain in Older People

Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.

The Reason for God

Offers information on developing a screenwriting career, including practical advice on how to progress from writing to pitching screenplays, with tangible avenues for screenwriting success.

The Theory of Corporate Finance

The basis for the Academy Award®-winning movie! Kidnapped into slavery in 1841, Northup spent 12 years in captivity. This autobiographical memoir

represents an exceptionally detailed and accurate description of slave life and plantation society. 7 illustrations. Index.

Mastermind Marketing System

A New York Times bestseller people can believe in—by "a pioneer of the new urban Christians" (Christianity Today) and the "C.S. Lewis for the 21st century" (Newsweek). Timothy Keller, the founding pastor of Redeemer Presbyterian Church in New York City, addresses the frequent doubts that skeptics, and even ardent believers, have about religion. Using literature, philosophy, real-life conversations, and potent reasoning, Keller explains how the belief in a Christian God is, in fact, a sound and rational one. To true believers he offers a solid platform on which to stand their ground against the backlash to religion created by the Age of Skepticism. And to skeptics, atheists, and agnostics, he provides a challenging argument for pursuing the reason for God.

American Literature and Culture, 1900 - 1960

Intimidated by corporate finance? The numbers (and the jargon) can feel overwhelming—but you have to understand them to manage effectively. Finance Basics explains the fundamentals simply and quickly, introducing you to key terms

and concepts such as: • How to navigate financial statements • How to weigh costs and benefits • What's involved in budgeting and forecasting • How to gauge a company's financial health About HBR's 20-Minute Manager Series: Don't have much time? The Lost Man

INSTANT NEW YORK TIMES BESTSELLER Two brothers meet in the remote Australian outback when the third brother is found dead, in this stunning new standalone novel from Jane Harper Brothers Nathan and Bub Bright meet for the first time in months at the remote fence line separating their cattle ranches in the lonely outback. Their third brother, Cameron, lies dead at their feet. In an isolated belt of Australia, their homes a three-hour drive apart, the brothers were one

another's nearest neighbors. Cameron was the middle child, the one who ran the family homestead. But something made him head out alone under the unrelenting sun. Nathan, Bub and Nathan's son return to Cameron's ranch and to those left behind by his passing: his wife, his daughters, and his mother, as well as their long-time employee and two recently hired seasonal workers. While they grieve Cameron's loss, suspicion starts to take hold, and Nathan is forced to examine secrets the family would rather leave in the past. Because if someone forced Cameron to his death, the isolation of the outback leaves few suspects. A powerful and brutal story of suspense set against a formidable landscape, *The Lost Man* confirms Jane Harper, author of *The Dry* and *Force of Nature*, is one of the best new voices in writing today.

Keeper's Keep

This book attempts to set out the fundamental principles to become a great gardener with careful observation and practical experience. "A garden is for its owner's pleasure."

Finance Basics (20-Minute Manager Series)

Project Report from the year 2007 in the subject Business economics - Business

Ethics, Corporate Ethics, grade: 85%, Macquarie University (Graduate Accounting and Commerce Centre), course: Veranstaltung International Marketing (post-graduate unit), 34 entries in the bibliography, language: English, abstract: This report examines Airbus, one of two major players in the global aircraft manufacturing industry. Recent findings indicate that Airbus might have showed unethical business behavior in convincing customers to purchase its aircraft. After presenting and analyzing these allegations and updating potentially unethical conduct by Airbus to the present day, this report continues to discuss the topic of ethics in general. It is then elaborated how ethics are applied within the aircraft manufacturing industry by its two main players Boeing and Airbus. Following this, tools such as a PESTLE analysis and a SWOT analysis of Airbus are presented. Based on the findings of these analyses, recommendations for Airbus are formulated and examined with regard to practicability and feasibility aspects. Recommendations will be divided into short-, medium- and long-term strategies. Finally, this report will conclude by summarizing the findings and giving an outlook to Airbus' position in the global marketplace.

The Go-Go Years

Watch a Video Watch a video Download the cheat sheet for Roger Lowenstein's The End of Wall Street » The roots of the mortgage bubble and the story of the Wall Street collapse-and the government's unprecedented response-from our most

trusted business journalist. The End of Wall Street is a blow-by-blow account of America's biggest financial collapse since the Great Depression. Drawing on 180 interviews, including sit-downs with top government officials and Wall Street CEOs, Lowenstein tells, with grace, wit, and razor-sharp understanding, the full story of the end of Wall Street as we knew it. Displaying the qualities that made When Genius Failed a timeless classic of Wall Street-his sixth sense for narrative drama and his unmatched ability to tell complicated financial stories in ways that resonate with the ordinary reader-Roger Lowenstein weaves a financial, economic, and sociological thriller that indicts America for succumbing to the siren song of easy debt and speculative mortgages. The End of Wall Street is rife with historical lessons and bursting with fast-paced action. Lowenstein introduces his story with precisely etched, laserlike profiles of Angelo Mozilo, the Johnny Appleseed of subprime mortgages who spreads toxic loans across the landscape like wild crabapples, and moves to a damning explication of how rating agencies helped gift wrap faulty loans in the guise of triple-A paper and a takedown of the academic formulas that-once again- proved the ruin of investors and banks. Lowenstein excels with a series of searing profiles of banking CEOs, such as the ferretlike Dick Fuld of Lehman and the bloodless Jamie Dimon of JP Morgan, and of government officials from the restless, deal-obsessed Hank Paulson and the overmatched Tim Geithner to the cerebral academic Ben Bernanke, who sought to avoid a repeat of the one crisis he spent a lifetime trying to understand-the Great Depression. Finally, we come to understand the majesty of Lowenstein's theme of liquidity and

capital, which explains the origins of the crisis and that positions the collapse of 2008 as the greatest ever of Wall Street's unlearned lessons. The End of Wall Street will be essential reading as we work to identify the lessons of the market failure and start to reb

Ethics and Airbus

Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with smoother coverage of topics, and the increased quality in the problem material.

City Logistics

Learning Financial Accounting can often feel like learning a foreign language to students, in particular when terminology and procedure is piled on before core concepts are truly mastered. Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over the rote memorization of terms, such as “debits” and “credits”. The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. The authors focus initially on conceptual underpinnings -- the reasons why we approach procedures the way we do -- rather than confusing students by front-loading the material with over-complicated details. Author Chris Edmonds has also created a highly popular and widely used series of video lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately. With a straightforward writing style and highly engaging video lectures, this dynamic author team leads students down a streamlined learning path focused on critical thinking, clarity of concept, and applicability of material to the real world.

Underground

This introduction to American literature and culture from 1900 to 1960 is organized around four major ideas about America: that is it “big”, “new”, “rich”, and “free”. Illustrates the artistic and social climate in the USA during this period. Juxtaposes discussion of history, popular culture, literature and other art forms in ways that foster discussion, questioning, and continued study. An appendix lists relevant primary and secondary works, including websites. An ideal supplement to primary texts taught in American literature courses.

The Garden Expert

I think we accepted it at Rattlers Ridge without question. The matter of ownership was more difficult to settle; and although the dog I have in my mind at the present writing attached himself impartially and equally to everyone in camp, no one ventured to exclusively claim him; while, after the perpetration of any canine atrocity, everybody repudiated him with indecent haste.

Cool for America

A National Historic Landmark with a complex and remarkable two-hundred-year

history, Melrose Plantation near Natchitoches, Louisiana, was home to many notable women, including freedwoman and entrepreneur Marie Thérèse Coincoin and artist Clementine Hunter. Among that influential group, Cammie Henry, the mistress of Melrose during the first half of the twentieth century, stands out as someone who influenced the plantation's legacy in dramatic and memorable ways. In *Cane River Bohemia*, Patricia Austin Becker provides a vivid biography of this fascinating figure. Born on a sugar plantation in south Louisiana in 1871, Cammie Henry moved with her husband to Melrose in 1899 and immediately set to work restoring the property. She extended her impact on Melrose, the surrounding community, and the region when she began to host an artist colony in the 1920s and 1930s. Writers and painters visiting the bucolic setting could focus on their creative pursuits and find encouragement for their efforts. The most frequent visitors—considered by Cammie to be her circle of “congenial souls”—included writer/journalist Lyle Saxon, naturalist Caroline Dormon, author Ada Jack Carver, and painter Alberta Kinsey. Artists and artisans such as Harnett Kane, Roark Bradford, William Spratling, Doris Ulmann, and Sherwood Anderson also found their way to Melrose. In addition to hosting well-known guests, Henry began a collection of history books, nineteenth-century manuscripts, and scrapbooks of clippings and memorabilia that later brought her attention from the wider world. Researchers and writers contacted Henry frequently as the reputation of her library grew, and today the Cammie G. Henry Research Center at Northwestern State University houses this impressive collection that serves as a lasting tribute to Henry's passion

for the preservation of words as well as for the South's material culture, including quilting, spinning, and gardening.
