The Practice of Research in Criminology and Criminal Justice

Open Book: The Inside Track to Law School Success, 2E is a book that every JD and LLM law student needs to read, either before classes start or as they get going in their 1L year. Now in an expanded second edition, the book explains in a clear and easygoing, conversational manner what law professors expect from their students both in classes and exams. The authors, award-winning teachers with a wealth of classroom experience, give students an inside look at law school by explaining how, despite appearances to the contrary, classes connect to exams and exams connect to the practice of law. Open Book introduces them to the basic structure of our legal system and to the distinctive features of legal reasoning. To prepare students for exams, the book explains in clear and careful detail what exams are designed to test. It then

devotes a single, clearly written chapter to each step of the process of answering exams. It also contains a wealth of material, both in the book and digitally, on preparing for exams. Finally, and perhaps most importantly, Open Book comes with a free suite of 18 actual law school exams in Civil Procedure, Constitutional Law, Contracts, Criminal Law, Property and Torts, written and administered by law professors. These exams include not only questions, but: (1) annotations from the professors explaining what they were looking for; (2) model answers written by the professors themselves; and (3) actual student answers, with professor comments that explain why certain answers were stronger or weaker. As Open Book explains, there is no better way to prepare for exams than by practicing, and these unique materials will enable students to get the most out of their pre-exam practice.

The Trust Revolution

This book is about the South African amnesty process.

Many of the most well-known cases are investigated: the Cradock Four, the Pebco Three, the St James' Church, Heidelberg Tavern, Bisho, Boipatong, Trust Feeds and KwaMakutha massacres; the killing of Amy Biehl, Chris Hani, Steve Biko, Stanza Bopape, Fabian and Florence Ribeiro; the Motherwell, Magoo's Bar, Ellis Park Rugby Stadium, Church Street and Wimpy bombings, the Craig Duli coup, the applications of Craig Williamson, Trevor Tutu, Eugene de Kock and Jeffrey Benzien, the collective applications of the ANC 37 and APLA leaders, the Jerry Richardson case involving Winnie Madikizela-Mandela, and amnesty cases stemming from the Magnus Malan trial. The content of many of the amnesty decisions are investigated to see how the Amnesty Committee applied the amnesty law and whether the decisions were fair and consistent. The book examines the amnesty application numbers - the number of 'legitimate' applications, the spread across political affiliation, the number of female applicants, and who is a victim and who is a perpetrator. It looks at the extent to which the indemnity process that occurred between 1990 and 1995 undermined the 'carrot' of amnesty, whether the criminal justice system offered a sufficient 'stick' to coax potential applicants into the process, and how timing of events and attitudes of political parties influenced applications. Also considered is the timing of hearings, the role of the Investigations Unit, and the way in which the Amnesty Committee dealt with offences committed outside of South Africa, witchcraft applications and gender crimes. The subject of the final chapter is what happens next. Will those who were refused amnesty or who did not apply be prosecuted? A few significant

themes or debates permeate the text; the extent to which the TRC was victim-centred or perpetratorfriendly; the extent to which the TRC and the amnesty process in particular, contributed to the discovery of 'sufficient' truth, a prerequisite for reconciliation; and the extent to which the TRC and its amnesty process actively attempted to facilitate national unity and reconciliation.

Introduction to Ethnographic Research streamlines learning the process of research, speaks to the student at a foundational level, and helps the reader conquer the apprehensions of mastering research methods. Written in a conversational style, authors Kimberly Kirner and Jan Mills use a focus on scaffolding across the chapters to help the student transition from step to step in the research process. Case studies and first-hand accounts are also featured in each chapter, allowing the student to see the early steps, successes and at times failures that accomplished researchers experienced in their past. These real examples further encourage the student that even the best researchers failed along the way, and more importantly, learned from those mistakes. This text is designed to be used as a stand alone book, but is enhanced by the use with the supplemental workbook, *Doing Ethnographic Research* by the same authors. This text has call-outs to the supplemental text, which allow for application and practice of the material learned. **INSTRUCTORS!** *Doing Ethnographic Research: Activities and Exercises* by Kimberly Kirner and Jan Mills is \$5 when you bundle with the core text, *Introduction to Ethnographic Research: A Guide for Anthropology*. Old Irish is the language of Ireland in the period from the 8th to the 10th century AD, and is the oldest Celtic language well enough attested for adequate grammatical study. The book provides the only available detailed linguistic analysis of the syntactic structure of the Old Irish sentence. The basic form of the simple sentence, with the usual order of elements, verb-subject-object, is unproblematic from a synchronic viewpoint, but certain sentence types show more complex patterns of syntax, which have important implications for the typological, diachronic and comparative-historical analysis of Old Irish in particular, and Celtic and Indo-European languages in general. Sentence types which contain obligatory cataphoric pronouns referring to elements later in the same sentence are examined in detail, as well as constructions with marked initial topics, and the focussing construction of the cleft sentence. The approach is functional and typological, on the basis of a text corpus from the glosses on the Pauline epistles at Würzburg, with further material from Old Irish legal texts. The emphasis is on the communicative content and intent of the sentences of the corpus. The book is a newly edited version of MacCoisdealbha's Bochum dissertation of 1974, previously unpublished due to the author's death in 1976, and includes textual notes by the editor indicating progress, and indeed lack of progress, in the meantime, in areas covered by the book.

It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that ma.
