### **Progress in Geography: Key Stage 3**

This revision guide is matched to the new Key Stage 3 Programme of Study for Geography. It contains clear and accessible explanations of all the essential content, with lots of practice opportunities for each topic throughout the book to ensure the best results.

### **Collins New KS3 Science**

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to

discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

## **Letts Key Stage 3 Success Maths**

## **KS3 Maths Year 8**

Motivate pupils to develop their geographical skills, knowledge and understanding as they become engaged and accomplished geographers, ready for the demands of GCSE. Specifically designed to provide a solid foundation for the 2016 GCSE specifications, this Student Book takes an enquiry-based approach to learning within each unit and lesson. - Easily and cost-effectively implement a new KS3 scheme of work: this coherent single-book course covers the latest National Curriculum content, providing 150 ready-made lessons that can be used flexibly for a two or three-year KS3 - Build and improve the geographical knowledge and skills that pupils need: every double-page spread represents a lesson, with rich geographical data and place contexts for pupils to interpret, analyse and evaluate - Lay firm foundations for GCSE: key vocabulary, command words and concepts are introduced gradually, preparing pupils for the content and question types they will encounter at GCSE, with a particular focus on analysis and evaluation questions - Effectively assess, measure and demonstrate progress: formative assessments throughout each lesson and summative end-of-unit reviews include questions that show whether pupils are 'working towards', 'meeting' or 'exceeding' expectations - Encourage pupils to check and drive their own progress: learning objectives and end-of-unit learning outcomes help pupils reflect on their learning and make connections between key concepts and skills throughout the course

## **KS3 Revision Science**

Level: KS3 Subject: Geography

## **Key Stage 3 Science**

Help pupils build skills for KS3 Science practical work to be ready for the AQA GCSE 9-1 Required Practicals. Provide a consistent and supportive approach to KS3 Biology, Chemistry and Physics practicals with clear methods, questions that test understanding and applying skills in different contexts. Establish a consistent approach to KS3 Science practicals with everything together in one write-in book. Help build confidence and familiarity from Year 7 upwards with a focus on scientific vocabulary, drawing and analysing graphs, and GCSE 9-1 command words. Cheaper than photocopying, the lab book can be used flexibly with any scheme of learning. Each practical activity: \* Explains the purpose of the practical and relates it to the science \* Develops core skills including maths skills \* States common mistakes and how to avoid them \* Supports pupils to record and evaluate results \* Checks understanding with key questions \* Develops scientific reasoning with spot the mistake questions \* Encourages pupils to apply their skills to unfamiliar scientific contexts \* Helps pupils to evaluate their learning with self-reflection sections
