For the students are pursuing of BSc. Engineering, B.E. & B.Tech in electronics and electrical engineering, diploma in electronics & communication etc. The Basic Electrical and Electronics Engineering book covers the production and distribution of power and the manufacturing of electrical and electronics components used in a number of sectors including construction, building and technology. The book covers basics of electricity, electrical circuits, laws of electricity, electromagnetism, electrical mechanics, Sinusoid and Phasor. It also provides basic laws of

electronics, semiconductors and digital electronics.

Indian National Bibliography

Over the last decade as the importance of vocational qualifications has been firmly established, the system has become increasingly complex and hard to grasp. Now in its sixth edition, this popular and accessible reference book provides up-to-date information on over 3500 vocational qualifications in the UK. Divided into five parts, the first clarifies the role of the accrediting and major awarding bodies and explains the main types of vocational qualifications available. A directory then lists over 3500 vocational qualifications, classified by professional and career area, giving details of type of qualification, title, level, awarding body and, where possible, the course code and content. The third section comprises a glossary of acronyms used, together with a comprehensive list of awarding bodies, industry lead bodies, professional institutes and associations, with their contact details. Section four is a directory of colleges offering vocational qualifications in the UK, arranged alphabetically by area. Finally, section five is an index of all qualifications, listed alphabetically by title.

Electrical Circuits and Measurements Ohm's law, Kirchoff's laws, Steady state solution of DC circuits, Introduction to AC circuits, Waveforms and RMS value, Power and power factor, Single phase and three phase balanced circuits. Operating principles of moving coil and moving iron instruments (Ammeters and voltmeters), Dynamometer type watt meters and energy meters. Electrical Machines Construction, Principle of operation, Basic equations and applications of DC generators, DC motors, Single phase transformer, Induction motors and stepper motors. Semiconductor Devices and Applications Characteristics of PN junction diode, Zener effect, Zener diode and its characteristics, Half wave and full wave rectifiers, Voltage regulation. Bipolar junction transistor, CB, CE, CC configurations and characteristics, Necessity of biasing, Principles of biasing circuits, Elementary treatment of small signal amplifier. Characteristics and simple applications of SCR, DIAC, TRIAC and UJT. Digital Electronics Binary number system, Logic gates, Boolean algebra, Half and full adders, Flip-flops, Registers and counters, A/D and D/A conversions. Fundamentals of Communication Engineering Types of signals : Analog

and digital signals - Modulation and demodulation : Principles of amplitude and frequency modulations. Communication systems : Radio, TV, Fax, Microwave, Satellite and optical fibre.

This Volume Presents The Basic Details Of Digital Integrated Circuits, The Processing Of Signals For Digital Communication, The Working Principles Of Electronic Digital Telephone Exchanges, Fibre Optic Communications And Radio Systems Including Those Working On Microwaves. It Further Describes The Working Principles Of Radar, Telephoto And Tv Systems Including Colour Tv. It Highlights Also The Principles Of Satellite Communication And The Launching Of Satellite Repeaters. In Addition The Book Explains The Working Principles Of Cellular Radio Mobile Telephone System And Paging Services. Several Worked-Out Examples And Model Questions Have Also Been Included For Self-Study.

The Journal of the Institution of Engineers, Australia

"The name Sonagachi evokes a variety of reactions in a variety of people – distaste, contempt, curiosity, lust, greed...and so on. But how many spare a

thought to the real lives of the very real women who have made Asia's largest red-light area so famously infamous? What tragedies and compulsions, and sheer helplessness drive them into this detestable trade? Would any woman choose such a life if she had a choice of another of security, safety and dignity? Even while mired in the slush of their own condemned lives, how do these women gather the strength to keep another from being doomed to it? A baby girl brings joy and meaning to the life of a lonely old man... A street-smart oldman who has been quite successful in acquiring money, proves to be defenceless against the wiles of a scheming young woman... Written with a deep understanding of the workings of the human mind, with charity and compassion, and spiced with adventure, thrill, humour, and satire, this collection of stories is a celebration of women in their many avatars - cherished daughter, impressionable young girl, loving mother, scheming wife, reluctant beggar, and what not... "

Communication Engineering. This book is designed for comprehensively covering all topics relevant to the subject. Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education, Karnataka. This book is divided into eight chapters: Chapter 1 – Basics of Electricity Chapter 2 – Electrostatics Chapter 3 – Electromagnetic Induction Chapter 4 – AC Fundamentals Chapter 5 – AC Circuits Chapter 6 – Transformers Chapter 7 – Batteries, Relays and Motors Chapter 8 – Passive Components The text provides detailed explanations and uses numerous easy-to-follow examples accompanied by diagrams and step-by-step solutions. Illustrative problems are presented in terms of commonly used voltages and current ratings. To enhance the utility of the book, important points and review questions (objective and descriptive type) have been included at the end of each chapter. Model question papers have been provided to help students prepare better for the semester examinations. Multiple choice questions along with answers have been given towards the end of the book for the benefit of students taking up competitive tests. It is hoped that this book will be of immense use to teachers and students of Polytechnics. Suggestions for improvement in the future editions of this book will be appreciated. I wish to express my gratitude to MEI Polytechnic, Bangalore for providing me an opportunity to bring out this text book. I am grateful to Sri. Nitin S. Shah, M/s Sapna Book House, Bangalore for publishing this book. I am thankful to M/s Datalink, Bangalore for meticulous processing of the manuscript of this book.
