In this stirring follow-up to the award-winning *Fostering Resilient Learners*, Kristin Van Marter Souers and Pete Hall take you to the next level of trauma-invested practice. To get there, they explain, educators need to build a "nest"—a positive learning environment shaped by three new Rs of education: relationship, responsibility, and regulation. Drawing from their extensive experience working with schools, students, and families throughout the country, the authors Explain how to create a culture of safety in which everyone feels valued, important, and capable of learning. Describe the four areas of need—emotional, relational, physical, and control—that drive student behaviors and show how to meet these needs with interventions framed around the new three Rs. Illustrate trauma-invested practices in action through real scenarios that identify students' unmet needs, examine the situation from five stakeholder perspectives, and suggest interventions to support students and their families. Offer opportunities to challenge your beliefs and develop deeper and different ways of thinking about your role in your students' lives. Educators have a unique opportunity to influence students' learning, attitudes, and futures. This book will invigorate your practice and equip you to empower those you serve—whatever their personal histories.

Study Guide to Accompany Maternal and Child Health Nursing

This book provides content that arms clinicians with the core knowledge and competencies necessary to be effective informatics leaders in health care organizations. The content is drawn from the areas recognized by the American Council on Graduate Medical Education (ACGME) as necessary to prepare physicians to become Board Certified in Clinical Informatics. Clinical informaticians transform health care by analyzing, designing, selecting, implementing, managing, and evaluating information and communication technologies (ICT) that enhance individual and population health outcomes, improve patient care processes, and strengthen the clinician-patient relationship. As the specialty grows, the content in this book covers areas useful to nurses, pharmacists, and information science graduate students in clinical/health informatics programs. These core competencies for clinical informatics are needed by all those who lead and manage ICT in health organizations, and there are likely to be future professional certifications that require the content in this text.
