### **The Adventures of Tom Sawyer & Huckleberry Finn - Complete Edition**

This was one of the first books to appear after the sinking of the Titanic, published just 37 days after the disaster, and despite the haste it is one of the most stylish and well-written of the early works. Its author, Filson Young, was a respected journalist who had already used his columns in the London Saturday Review and the Pall Mall Gazette to call for better safety at sea, and for all ships to have properly-manned radios. Having sailed the Atlantic himself, and knowing several of the passengers on board the doomed liner, his book combines an imaginative telling of the first few days on board, with a vivid account of the sinking based on early survivor interviews. In 1932 the BBC asked Filson to dramatise the book for radio, but a public outcry forced them to reconsider: even after twenty years, his recreation of the sinking was still too powerful for many of their audience.

This is the story of Australian Yacht EDNBAL sailing and admiring the Marvels of the World. The cruising life style gave the Authors a great opportunity to meet many and get to know people of the World belonging to various societies and coming from all walks of life. The Authors were eager to learn about countries travelled, learn about humans' history in various

parts of the world, and they often experienced the nature and wilderness surrounding the vast expanse of Oceans. The cruising adventures described in this book are collected from the stories told by a number of cruisers, they include the best and the worst experiences in cruising seen, heard of, listened to, and definitively savoured by the Authors in the last ten years. The famous World traveller Marco Polo described his extensive travels in a similar exact, accurate but somewhat unbelievable description in his "Marvels of the World." Ednbal's Marvels of the World is indeed a TRUE Cruiser Story and will hopefully gain respect and appreciation easier than Marco's! "Wishing in my secret thoughts that the things I had seen and heard should be made public for the benefit of those who could not see them with their own eyes." Marco Polo

Do you find fun in pun? Perhaps you are looking for a few puns on the run? Follow the characters of Comedic Destruction in Daze and Knights as they take you on a mind-stimulating, language-enhancing journey. Puntastic and fantastic, this book will massage your intellect, and provide your laugh muscles some 'much-kneaded' exercise via wordplay vignettes!The book is divided into several chapters. The first chapter, "Their Eyes Were Watching Job," is a collection of stories in an occupational setting or regarding a business transaction. "I Think Yet I Cram" features tales of students and teachers and, more generally, intellectual high jinks. The third chapter, "Empty Cow or Rheas: I Love My Shakes Pear," is, as you'd imagine, a collection of tales involving food; although it should be noted that these wordplays have little or no nutritional value. The final chapter, "I've Been Around: Whirled without End," features stories of characters in motion.Daze and Knights contains fun puns for everyone, enhanced by talented illustrator, Megan Nolton. This wild and witty work promises a few dozen laughs along the journey, as you'll discover, from cover to cover.

Eric Dollard is a legendary electrical engineer trained by RCA, Bell Labs and the US Navy. He is the only man alive to have successfully replicated Nikola Tesla's wireless electricity technology and is considered to be the modern living Tesla. Because of his contribution to electrical science and his advancements in a Tesla-Alexanderson type of Advanced Seismic Warning System, the Federal Government's documents in relation to this project refer to him as Dr. Eric Dollard, which confers to him an honorary PhD. His fans lovingly refer to him as Professor Dollard. The Lone Pine Writings (Part 1) and its content was developed out of the general frustration of the author when trying to teach others about his work in electrical

engineering. This collection of papers started appearing in discussion threads on Energetic Forum around 2011. At the time, Eric Dollard was living in his famous 1980 Toyota Corolla, in the harsh wastelands of Lone Pine, California. Originally, Eric wrote the material out on paper and mailed it to a colleague who transcribed the material and posted it in the forums under the pseudonym "T-REX." Each paper or letter was called a "transmission" in honor of the language of a radio operator and contained information on specific electrical engineering terms and how they are to be used. The original format of the material is retained in this edition of the book. The phenomena we call "electricity" is a dynamic, but artificial presentation of the Natural World, and because of this, its behavior follows specific rules. Understanding these specific behaviors is the key to engineering this phenomena, but developing a common language with which to describe these behaviors is the key to teaching others these engineering skills. The purpose of this book is to provide clarity for the electrical engineering community regarding the use of common terms for electrical units. The last attempt to standardize this language was made by Oliver Heaviside over 100 years ago and his effort was met by censure from the Royal Society of London. It is hoped that the release of this book will be met with a more enlightened response. Peter A. Lindemann, D.Sc. Editor, A & P Electronic Media A portion of the proceeds will go to EPD Laboratories, Inc., a 501(c)3 tax-deductible non-profit corporation that supports Eric Dollard in advancing the electrical sciences.
