As World War II paralyzed many of Electrolux's manufacturing plants, the company reorganized some of its production facilities and made air filters and steel fittings for the Swedish defence forces. Following the end of the war, the company continued on its path to dominating the household appliance industry by introducing the first household washing machine in 1951 and the first household dishwasher in 1959. Acquisitions of other companies played an important role in the growth of Electrolux throughout the past 90 years and it helped the company become a global player in the industry. It has acquired over 300 companies from various countries throughout the world providing Electrolux with better production capabilities and access to large mature markets and established brand names, such as Eureka, Frigidaire and Kelvinator. Following years of acquisitions, in 1997, Electrolux began a two-year restructuring program in an effort to improve its bottom line. It divested several of its sectors including industrial products, sewing machines and vending machines, the company laid off 11,000 employees and closed 23 plants and 50 warehouses. Following its success in the European markets, Electrolux-branded appliances were introduced in North America in 2004. Hans Stråberg was appointed Electrolux's President & CEO in 2002 and remains in that position today. The company is currently the world's second largest appliance maker, behind Whirlpool. Electrolux has over 50,000 employees in over 50

countries around the world. Its headquarters are in Stockholm, Sweden.

Energy Efficiency in Household Appliances

Just a Spoonful of Laughter Helps the Medicine Go Down

There is widespread interest throughout the world in improving appliance energy efficiency. Methods to reach that end include energy labeling, energy efficiency standards and market conditioning (e.g, energy efficient procurement and DSM programs). Energy efficiency standards, which started out as an action to reduce demand for energy in individual countries, has now become a subject of regional and even worldwide dimension, particularly in the context of global climate change mitigation. Mandatory energy efficiency standards are in place for some appliances in China, Canada, Mexico, the Philippines and the United States. Standards for refrigerator/freezers will take effect in Australia and the European Union in 1999. Voluntary energy efficiency standards are in place for refrigerators in Brazil, India and Korea and for air conditioners in India, Japan and Korea. Table I showed potential global energy use reductions from codes and standards in buildings. If individual country data can be assembled, a more accurate approach to estimating potential reductions in energy use and carbon emissions would be to perform a bottom-up analysis for energy using equipment on an end-use basis in as many large developing countries as possible. The impact of standards would be assessed as more efficient appliances replaced existing stock models and new purchases that increased saturation rates were made at higher efficiencies than would otherwise be the case. This approach would show the slow but steady buildup of

annual energy savings from efficiency standards or other programs to improve energy efficiency.

Did you child just get hearing aids?Is your child feeling self-conscience about their hearing loss?Bessie Needs Hearing Aids" is a children's book that will help children with hearing loss understand the process, and that they are not alone. Written and illustrated by a teenage girl who went through this process, so it will resonate with children just learning of hearing issues, or coping with wearing hearing aids. The book received numerous accolades so it was decided to make it available to all, in order to possibly help other children with hearing loss.When a child goes through the process of getting hearing aids, it is scary for them and difficult for a parent to explain. This is a story of Bessie, the bunny, who was so excited to start school only to have the kids get frustrated that she was not hearing them properly. Bessie

visits the audiologist and learns about hearing aids and the happy results of getting hear aids.

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No
