From Magical Child to Magical Teen

This is not an ordinary history book. As readers will realise quite early on, Neagu Djuvara has the audacity to tackle some of the most delicate and controversial issues in Romanian history under the guise of light storytelling. With the addition of illustrations, the book becomes better and easier to understand: we are offered the chance to see how ancient artefacts discovered by archaeologists actually look like, or catch a glimpse of the world of barbarians and medieval warriors depicted in wonderful illuminated manuscripts. As we get nearer to the modern age, the imagery becomes even richer and we get to know Romania's princes and monarchs, their allies and their enemies, the politicians - good and bad - their triumphs, tribulations or even tragedies; and sometimes even the common people going about their daily lives. The photographic discourse focuses on the most important documents, even if their condition is not optimal. You will also find images of pottery, jewellery and weaponry, some of them from unexpected sources, often unknown to the public, accompanied by detailed captions that complement the information provided in the text itself. Together, the story and illustrations intertwine to form a new, enhanced historical account - and hopefully, one not lacking in originality.

Soul & Spirit

Overloaded? I'll bet you are. We all lead busy lives. You fall into bed exhausted at the end of the day, feeling that you've got a lot done. Perhaps you are getting lots

done. But is it stuff that really matters? Or is it just stuff? It's time to wise up. You will never clear that list. Get used to the idea that some things will never get done. Not delayed. Not rescheduled. Not re-prioritized. But simply dropped. And from now on, instead of trying to clear that endless to-do list, you're going to do a much smarter thing. You're going to just do the important stuff. And the brilliant thing is, you already have the power to do this. That power is to do less. Soon enough, you'll have the space to enjoy the moment, be creative, find new or better ways of doing things, get ideas, and spot opportunities you would have missed when you were running around. In short - you'll be happier. Much happier. As soon as you stop doing, the power of doing less will begin to flow.

A Brief Illustrated History of Romanians

Based on breakthrough studies, Cohen's program reveals how people with diabetes can reduce their need for prescription medication and minimize the disease's

effect on the body. Most doctors consider diabetes a one-way street--once you have it, your only option is to manage the symptoms with a restricted diet, close monitoring of blood sugar, and expensive medications. Pharmacist Suzy Cohen shows that diabetes can be treated instead through safe, natural means, like food and vitamins, rather than strictly relying on prescription drugs. She shifts the focus away from glucose management to a whole body approach, using supplements, minerals, and dietary changes to lose weight, repair cell damage, improve insulin function, and reduce the side effects from prescription drugs, many of which rob nutrients from the body and cause additional symptoms. This 5-step program uses natural alternatives, such as drinking nutrition-packed green drinks, adding vitamin D and anti-inflammatory supplements, increasing fiber intake, and including minerals in the diet to help restore the body's own supply of insulin. Diabetes without Drugs explains how patients can protect their heart, kidneys, eyesight, and limbs from the damage often caused by diabetes and shows the impact that the right foods and the right supplements can make in reducing blood sugar levels, aiding weight loss, and restoring vibrant health to everyone with diabetes.

Physiotherapy for Children

A groundbreaking perspective on Nature's plan for full human creativity and intelligence during the teen years • Shows what is at the core of today's serious social and psychological problems • Explores the sexual and spiritual stage of adolescent development • Details the connection between adolescent brain and heart development and the issue of nature vs. nurture • By the author of *Magical Child* (250,000 copies sold) Something is supposed to happen during the adolescent years--something greater than MTV, video games, and the Internet. Joseph Chilton Pearce describes this something as the natural mandate for post-biological development--the development of the sexual and spiritual senses and expansion of our growth process outside of our bodies and into the physical world that surrounds us. Though first written in the mid 1980s, the message of *From Magical Child to Magical Teen* is even more compelling and helpful today--especially for those who live with and work with adolescents. Drawing on the stages of development outlined by Swiss biologist Jean Piaget and the brain research of neuroscientist Paul MacLean, Pearce demonstrates how nature has built into us an agenda for the intelligent unfolding of our lives. He offers a

powerful critique of contemporary child-rearing practices and a groundbreaking alternative to existing perspectives on adolescence so we can unleash our greatest potential, as well as that of our children, in order to experience our fullness in the manner nature intended all along.
