Electronic and Electrical Servicing provides a thorough grounding in the electronics and electrical principles required by service engineers servicing home entertainment equipment such as TVs, CD and DVD machines, as well as commercial equipment including PCs. In the printed book, this new edition covers all the core units of the Level 2 Progression Award in Electrical and Electronics Servicing (Consumer/Commercial Electronics) from City & Guilds (C&G 6958), plus two of the option units. For those students who wish to progress to Level 3, a further set of chapters covering all the core units at this level is available as a free download from the book's companion website or as a print-on-demand book. The book and website material also offer a fully up-to-date course text for the City & Guilds 1687 NVQs at Levels 2 and 3. The book contains numerous worked examples to help students grasp the principles. Each chapter ends with review questions, for which answers are provided at the end of the book, so that students can check their learning. Level 2 units covered in the book: Unit 1 - d.c. technology, components and circuits Unit 2 - a.c. technology and electronic components Unit 3 - Electronic devices and testing Unit 4 - Electronic systems Unit 5 - Digital electronics Unit 6 - Radio and television systems technology Unit 8 - PC technology Ian Sinclair has been an author of market-leading books for electronic servicing courses for over 20 years, helping many thousands of students through their college course and NVQs into successful careers. Now with a new co-author, John Dunton, the new edition has been brought fully up-to-date to reflect the most recent technical advances and developments within the service engineering industry, in particular with regard to television and PC servicing and technology. Level 3 units covered in free downloads at

Since Lakewood's settlement in the 1860s, it has been a community in search of an identity, fluctuating from farm center to factory town, from Denver streetcar suburb to the map's stopover point between the big city and the Front Range of the Rocky Mountains. Once known for its fruit orchards and dairy and poultry farms, Lakewood in modern times has been home to the western third of the nation's longest commercial street, Colfax Avenue, and houses more federal agencies than any community outside of Washington, DC. Most of the buildings associated with Lakewood's agricultural and manufacturing past are gone, but the can-do spirit of the men and women who forged and fashioned the city's destiny as a microcosm of western American life from the mid-19th to mid-20th centuries is recalled in these pages.

This is the second book in a series of six books, a collection of pieces by outstanding composers that were chosen from a large list by students as their favorites. Fun titles include "March of the Animals" by Louise Garrow & David Carr Glover, "March of the Spooks" by Charles Donald Porter, and "Happy Time" by Roger Grove. The 20 songs in this volume were selected and edited by David Carr Glover and promote independence of hands in playing.

"This is the magnum opus on digital printing and the book to read before color calibrating your monitor or wondering about differences in pigmented and dye-based inks. With little in the way of "how-to," the book focuses more on why and showcases eloquent photographs, including a heartbreakingly beautiful portrait of Marilyn Monroe, a naked World War II bomber tail gunner, and the inevitable "Emperor's New Clothes" work. Equally heartbreaking for far different reasons is Henry Wilhelm's essay "A History of Permanence" that includes a section called "The Totally Lost Kodacolor Era" that will leave you stunned by the corporate callousness that's described. This book not only deserves to be on the bookshelf of anybody who cares about photography, it deserves to be read." -- Joe Farace, Shutterbug Most of us know him as one member of the band Crosby, Stills, Nash and Young, but what you may not know is that at the same time Graham Nash was rocking the world, he was also pursuing a parallel career in photography and digital imaging. Nash Editions—the world's premier fine-art digital printmaking studio, which Graham co-founded with R. Mac Holbert—represents the pinnacle of those efforts. This book uses thought-provoking essays and glorious artwork to sum up not only Nash Editions' achievements but also the state of fine-art digital printmaking. After a brief history of printmaking, you'll reach the heart of the book: an essay by Holbert on the genesis of Nash Editions and fine-art digital printing (which details the studio's interactions with major artists like David Hockney); an essay by MoMA consultant Henry Wilhelm (which includes a technical comparison of traditionally and digitally prepared prints); and commentary from Nash Editions artists. The book's more than 100 illustrations include Nash Editions artwork, photos of artists in the studio, images of the machines used in digital printing, and illustrations of the proofing process.

The rapid growth of electronic commerce, along with changes in information, computing, and communications, is having a profound effect on the United States economy. President Clinton recently directed the National Economic Council, in consultation with executive branch agencies, to analyze the economic implications of the Internet and electronic commerce domestically and internationally, and to consider new types of data collection and research that could be undertaken by public and private organizations. This book contains work presented at a conference held by executive branch agencies in May 1999 at the Department of Commerce. The goals of the conference were to assess current research on the

digital economy, to engage the private sector in developing the research that informs investment and policy decisions, and to promote better understanding of the growth and socioeconomic implications of information technology and electronic commerce. Aspects of the digital economy addressed include macroeconomic assessment, organizational change, small business, access, market structure and competition, and employment and the workforce.
