Eating Disorders

This highly respected, market-leading textbook on learning theories applied to education prepares pre-service teachers and other educators with a unique and meaningful learning experience. The sixth edition of Human Learning covers a broad-range of learning theories and key perspectives on learning related to education, including: behaviorist, cognitive, social cognitive, contextual, and developmental theories, always highlighting relationships between concepts. Additionally, the text details associationistic processes (e.g., classical and instrumental conditioning), and more complex and distinctly human processes (e.g. metacognition, self-regulated learning, critical thinking). Every chapter features key pedagogical concepts with specific applications to classroom practice, numerous concrete examples that illustrate key concepts, principles, and recommendations and dozens of proven examples help make the fundamentals of these theories comprehensible to students with little or no prior coursework in psychology. Significant updates to this textbook include: important updates to reflect the most current research and new theories in the field, expansion of the chapter on cognition and memory, re-organization of Piaget and Vygotsky content into two separate chapters, a core section on teaching critical thinking skills, and the discussion of technology-based instructed has been significantly revised and expanded in this edition.

Psychology

BUDDHIST RELIGIONS: A HISTORICAL INTRODUCTION walks you through the rich history of Buddhism and reveals how it has grown and changed over time while remaining true to the central teachings of the Buddha. And with this edition, you'll get more focused attention on the five main aspects of Buddhism: ritual, devotionism, doctrine, meditation, and practice.

Essentials of Metaheuristics

In this overview of secularism and its history, Kennedy traces, through a series of intellectual biographies of leading European thinkers such as Rousseau, Kant, Hegel, Marx, Dostoyevsky, and Solzhenitsyn, just how the Western world changed from religious to secular.

Research Methods for Business

Four years have passed since the last edition (3rd) of this book was published. In the intervening years, several reviews of this book have provided highly encouraging remarks about the value of this book in transmitting information on classification and treatment of psychiatric disorders to the audience. We are proposing to revise all chapters with an eye on accuracy and ease of use, and this is an especially timely endeavor with the upcoming publication of the Diagnostic and Statistical Manual V. All the appropriate new information on biology, etiology, diagnosis and treatment of psychiatric disorders will be added to the current proposed edition. It is our goal to recruit the same authors (if possible) who contributed to the previous edition. While all chapters will be updated (see TOC), those marked by asterisks will be the most likely to undergo more revision. Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders. Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking, new advances in genetics, biochemistry, neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia, bipolar disorder, depression and even autism. The major goal of the previous edition of this classic book was to update the busy clinician, psychiatric resident and medical student with the most up-to-date information on etiology, diagnosis and treatment of psychiatric disorders. This goal remains the focus of the fourth edition of this book. In this updated and expanded edition, the reader will be provided with the most contemporary information and literature supported by a close survey of the field. This new edition of this classic title, with its focus on biologic and medical aspects of psychiatry, will continue to be of significant help to all interested in the scientific practice of psychiatry.

Communication Matters

UNDERSTANDABLE STATISTICS: CONCEPTS AND METHODS, Eleventh Edition, is a thorough yet accessible program designed to help readers overcome their apprehensions about statistics. The authors provide clear guidance and informal advice while showing the links between statistics and the world. To reinforce this approach--and make the material interesting as well as easier to understand--the book integrates real-life data from a variety of sources, including journals, periodicals, newspapers, and the Internet. Readers also have opportunities to develop their critical-thinking and statistical literacy skills through special features and exercises throughout the text. The use of graphing calculators, Excel, MINITAB, and SPSS is covered for those who wish to learn about these helpful tools. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Six Ways of Being Religious

How do we study Christian life and thought? How have political and cultural events influenced the experiences of Christians in different places, at different times? How has the world's largest religion been lived in varied parts of the world? The Christian Experience is the first textbook to unite traditional approaches to Christianity with special attention to art, music, architecture, and lived experiences. The material, individual, and personal sides of Christianity are brought to the fore throughout this chronological survey. Every chapter begins with a "first encounter" in order to bring the subject matter to life for students, mirroring the author's approach in his successful book Experiencing the World's Religions. This book on Christianity features over 100 color images, maps, and diagrams, and each chapter ends by pointing to additional print and electronic resources. Michael Molloy considers practices, insights, and artistic creations of Christians across the centuries. The book shows how Christian belief is being practiced in our own time, and it invites readers to imagine how Christianity might evolve in the future.

Buddhist Religions

After experiencing a crisis of faith, Sage Bennet looked to the practices of the world's religions for help. In Wisdom Walk, she beautifully outlines nine of these teachings, making them accessible without diminishing them, while exploring the essential beliefs of each tradition. From Hinduism: Create a home altar. From Buddhism: Meditate and find peace. From Islam: Surrender to prayer. From Christianity: Forgive yourself and others. From Judaism: Make time for the Sabbath. From Native American spirituality: Let nature be your teacher. From Taoism: Go with the flow. From New Thought: Catch God's vision of your life. From all traditions: Offer yourself in service to others. Wisdom Walk provides a simple, easy-to-follow guide for bringing the world's spiritual traditions into your own life through practical, powerful rituals.

Understandable Statistics

This text gives students a framework for their comparative study of religion that includes full, in-depth descriptions of each "way of being religious."

Breastfeeding and Human Lactation

Ethical issues relating to research and the aspects of business, data collection, and data analysis are integrated throughout the book. * The issues in cross-national research in sampling and data collection are thoroughly discussed. * The qualitative-quantitative aspects of research are brought together through a case study on the final chapter.

Reconnecting Reading and Writing

Human Communication is an integrated program that helps students practice communication skills, build confidence in public speaking, and achieve success in their introductory communication course. With McGraw-Hill LearnSmart in Connect Communication, students separate what they know from what they think they know, following a continually adaptive learning path toward mastery of key concepts. Additionally, Connect provides students with the resources they need to construct well-planned speeches while its highly flexible speech capture tool saves instructors valuable time in managing assignments and evaluating student speeches. Rooted in current scholarship and with an eye on practical, everyday communication scenarios, Human Communication is designed to make introductory communication studies immediate and relevant to students. Following their writing mantra, "Make it Smart. Keep it Real," the authors strike a balance of definitive theory and everyday application that resonates with the challenges and goals of today's typical basic course.

Opening the Cage

The images in this textbook are in color. There is a less-expensive non-color version available - search for ISBN 9781680922363. Psychology is designed to meet scope and sequence requirements for the single-semester introduction to psychology course. The book offers a comprehensive treatment of core concepts, grounded in both classic studies and current and emerging research. The text also includes coverage of the DSM-5 in examinations of psychological disorders. Psychology incorporates discussions that reflect the diversity within the discipline, as well as the diversity of cultures and communities across the globe.

Killing Hope

Revised and updated by a new editorial team, the Sixth Edition of this text will remain the leading reference on the clinical

care of the newborn. It provides complete, authoritative information on the biology of the newborn and the pathophysiology and management of diseases during the neonatal period. This edition has five new chapters on the role of telemedicine in neonatology, the impact of labor and delivery on the fetus, fetal determinants of adult disease, breast feeding, and control of breathing and apnea. Also included is a full-color insert illustrating key signs and symptoms, selected imaging techniques, and dermatologic conditions.

WHO Guidelines for Indoor Air Quality

The picture on the front of this book is an illustration for Totakahini: The tale of the parrot, by Rabindranath Tagore, in which he satirized education as a magnificent golden cage. Opening the cage addresses mathematics education as a complex socio-political phenomenon, exploring the vast terrain that spans critique and politics. Opening the cage includes contributions from educators writing critically about mathematics education in diverse contexts. They demonstrate that mathematics education is politics, they investigate borderland positions, they address the nexus of mathematics, education, and power, and they explore educational possibilities. Mathematics education is not a free enterprise. It is carried on behind bars created by economic, political, and social demands. This cage might not be as magnificent as that in Tagore's fable. But it is strong. Opening the cage is a critical and political challenge, and we may be surprised to see what emerges.

From Cloister to Commons

Michael Molloy's multi-dimensional examination of religions, combined with Connect Religion's skills-based activities, provides an intimate learning experience for students. Experiencing the World's Religions integrated program supports today's students and provides skills that extend beyond the Introduction to Religion course, engaging both non-majors and majors in the subject. The goal of the 6th edition is to better meet the Introduction to Religion course challenges of building student engagement, developing critical analysis skills, and building writing skills. The 6th edition of Experiencing the World's Religions continues to include primary sources, current examples, and coverage of women, to ensure students are introduced to unfamiliar religions in ways that are accessible, inviting, and intriguing. Experiencing these concepts and cultures is the hallmark of Michael Molloy's approach. His pedagogy and activities are now fully integrated and assessable within Connect Religion, to make for an increased understanding of the most important and memorable elements of each religion. Writing activities in Connect Religion, tied to chapter narrative, offer students the chance to develop their critical analysis skills and put their informed opinions on religion into writing. The result is greater student engagement and greater course success.

Moving Away from the Death Penalty

Human Communication

Thinking Literature across Continents finds Ranjan Ghosh and J. Hillis Miller—two thinkers from different continents, cultures, training, and critical perspectives—debating and reflecting upon what literature is and why it matters. Ghosh and Miller do not attempt to formulate a joint theory of literature; rather, they allow their different backgrounds and lively disagreements to stimulate generative dialogue on poetry, world literature, pedagogy, and the ethics of literature. Addressing a varied literary context ranging from Victorian literature, Chinese literary criticism and philosophy, and continental philosophy to Sanskrit poetics and modern European literature, Ghosh offers a transnational theory of literature while Miller emphasizes the need to account for what a text says and how it says it. Thinking Literature across Continents highlights two minds continually discovering new paths of communication and two literary and cultural traditions intersecting in productive and compelling ways.

Terrorism and Organized Hate Crime

Featuring a unique, consistent, and modular chapter structure--"Teachings," "History," and "Way of Life"--and numerous pedagogical features, Invitation to World Religions, Third Edition, invites students to explore the world's great religions with respect and a sense of wonder. This chapter structure enables students to navigate each religion in a consistent and systematic way and to make comparisons between religions. The book describes the essential features of each religion and shows how they have responded to basic human needs and to the cultural contexts in which they developed. The authors also encourage students to develop an appreciation for what religious beliefs and practices actually mean to their adherents.

Essentials of Nursing Research

Alphabetically arranged and followed by an index of terms at the end, this handy reference of literary terms is bound to be of invaluable assistance to any student of English literature.

The Collapse of Complex Societies

Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations. He then

develops a new and far-reaching theory.

Secularism and its Opponents from Augustine to Solzhenitsyn

This volume, like its series companions, goes beyond simple "how-to" to discuss the implementation of service-learning within religious studies and what that discipline contributes to the pedagogy of service learning. The volume contains both theoretical and pedagogical essays by scholar-teachers in religious studies education, plus a resource guide.

Human Learning

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

A Glossary of Literary Terms

Software Studies

Capital punishment is irrevocable. It prohibits the correction of mistakes by the justice system and leaves no room for human error, with the gravest of consequences. There is no evidence of a deterrent effect of the death penalty. Those sacrificed on the altar of retributive justice are almost always the most vulnerable. This book covers a wide range of topics, from the discriminatory application of the death penalty, wrongful convictions, proven lack of deterrence effect, to legality of the capital punishment under international law and the morality of taking of human life.

The Medical Basis of Psychiatry

The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was "CALL communities and Culture". Between the 24th and 27th August 2016, over 135 presentations were

delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.

Invitation to World Religions

Experiencing the World's Religions Loose Leaf

The Witch Trade

Communication Matters: Because great communicators are made, not born. Through Communication Matters's highly interactive program, students learn that our instincts aren't as good as we think they are and develop the skills needed to become effective communicators. The program prompts students to question their assumptions, helps them to move beyond their personal daily communication experiences, and challenges them to think critically about why and how they communicate in the ways they do. Connect for Communication Matters, Second Edition, reflects our increasingly diverse, interactive, and digital world by using hands-on features. Through an interactive eBook, a suite of student videos for public speaking, and dynamic online activities, students are urged to consider which choices are likely to be effective and which less so. LearnSmart, McGraw-Hill's adaptive learning system, assesses students' knowledge of course content and maps out personalized study plans for success. The result: Students are able to internalize core communication principles, adapt their communication behavior more effectively, and actively apply those strategies to all aspects of their lives.

Thinking Literature across Continents

This eighth edition of Essentials of Nursing Research, written by AJN awardwinning authors, along with its accompanying Study Guide for Essentials of Nursing Research, student learning ancillaries, and instructor teaching materials present a unique learningteaching package that is designed to teach students how to read and critique research reports, and to appreciate the application of research findings to nursing practice. New to this edition: New text organization with separate sections on quantitative and qualitative research offer greater continuity of ideas to better meet the needs of students and faculty. New online chapter supplements for every chapter expand student's knowledge of research topics New chapter on mixed methods research, which involves the blending of qualitative and quantitative data in a single inquiry, responds to the surge of interest in this type of research Increased emphasis on evidencebased practice (EBP) especially in the areas of asking wellworded questions for EBP and searching for such evidence guides the reader from theory to application.

Enhanced assistance for instructors with numerous suggestions on how to make learning about and teaching research methods more rewarding.

The World's Wisdom

Discusses eating disorders, including the various types of eating disorders, dealing with the disorder, and how to overcome an eating disorder.

Involved

Autoethnography: Process, Product, and Possibility for Critical Social Research by Sherick A. Hughes and Julie L. Pennington provides a short introduction to the methodological tools and concepts of autoethnography, combining theoretical approaches with practical “how to” information. Written for social science students, teachers, teacher educators, and educational researchers, the text shows readers how autoethnographers collect, analyze, and report data. With its grounding in critical social theory and inclusion of innovative methods, this practical resource will move the field of autoethnography forward.

Autoethnography

Abby and Spike are drawn into a world of witches, hidden caverns, fabulous boats, captive children, lost parents, and a quest to find Ice Dust - the source of magical power. With their strange new companions - Captain Starlight, Benbow the giant albatross, and Sir Chadwick Street, flamboyant Master of the Light Witches - they hurtle through perilous seas, face fearsome monsters, and do battle with an enemy darker and dirtier than they could ever have imagined.

Experiencing the World's Religions

This book is based on the power of stories to support children in all areas of their lives. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories, and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school, to four- and five-year-olds developing historical thinking, to children who are refugees or asylum-

seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. "this work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere." "Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years." "The writing style is scholarly, yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story "look like"." Mary Renck Jalongo, Journal and Book Series Editor Springer Indiana, PA, USA

Story in Children's Lives: Contributions of the Narrative Mode to Early Childhood Development, Literacy, and Learning

"Reconnecting Reading and Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college, draw[ing] on broad perspectives from history and international work to help readers understand how and why reading should be re-united with writing in college and high school classrooms. It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction. [The book] also examines research in such areas as basic writing, second language learning, and information literacy to integrate reading in writing classrooms, as well as the impact of the new Common Core State Standards in K-12 schools and the digital revolution on the teaching of reading and writing together. [It] offers practical advice on useful textbooks and appropriate classroom practices"--Publisher description.

Studying Religion: An Introduction Through Cases

In response to the current terrorist threat, law enforcement agencies at every level have expanded technological and intelligence-gathering initiatives in order to support new tactical, investigative and deployment strategies. The demand for homeland security requires that agencies hire professional and specially-trained criminal and intelligence a

Leadership Roles and Management Functions in Nursing

A world Bible for our time from Buddhist, Hindu, Confucian, Taoist, Jewish, Christian, Islamic, and primal religion sources! In this perfect companion to Huston Smith's bestselling *The World's Wisdom*, Philip Novak distills the most powerful and elegant expressions of the wisdom of humankind. Authentic, poetic translations of key texts are coupled with insightful introductions and "grace notes."

CALL communities and culture - short papers from EUROCALL 2016

Human lactation has evolved to produce a milk composition that is uniquely-designed for the human infant. Not only does human milk optimize infant growth and development, it also provides protection from infection and disease. More recently, the importance of human milk and breastfeeding in the programming of infant health has risen to the fore. Anchoring of infant feeding in the developmental origins of health and disease has led to a resurgence of research focused in this area. Milk composition is highly variable both between and within mothers. Indeed the distinct maternal human milk signature, including its own microbiome, is influenced by environmental factors, such as diet, health, body composition and geographic residence. An understanding of these changes will lead to unravelling the adaptation of milk to the environment and its impact on the infant. In terms of the promotion of breastfeeding, health economics and epidemiology is instrumental in shaping public health policy and identifying barriers to breastfeeding. Further, basic research is imperative in order to design evidence-based interventions to improve both breastfeeding duration and women's breastfeeding experience.

Avery's Neonatology

This collection of short expository, critical and speculative texts offers a field guide to the cultural, political, social and aesthetic impact of software. Experts from a range of disciplines each take a key topic in software and the understanding of software, such as algorithms and logical structures.

The Christian Experience

In this companion volume to *The Universe Next Door*, James W. Sire offers his refined definition of a worldview and addresses key questions about the history of worldview thinking, the existential and intellectual formation of worldviews, the public and private dimensions of worldviews and how worldview thinking can help us navigate an increasingly pluralistic universe.

Wisdom Walk

In *Killing Hope*, William Blum, author of the bestselling *Rogue State: A Guide to the World's Only Superpower*, provides a devastating and comprehensive account of America's covert and overt military actions in the world, all the way from China in the 1940s to the invasion of Iraq in 2003 and - in this updated edition - beyond. Is the United States, as it likes to claim, a global force for democracy? *Killing Hope* shows the answer to this question to be a resounding 'no'.

Naming the Elephant

Involved: Writing for College, Writing for Your Self helps students to understand their college experience as a way of advancing their own personal concerns and to draw substance from their reading and writing assignments. By enabling students to understand what it is they are being asked to write{u2014}from basic to complex communications{u2014}and how they can go about fulfilling those tasks meaningfully and successfully, this book helps students to develop themselves in all the ways the university offers. This edition of the book has been adapted from the print edition, published in 1997 by Houghton Mifflin. Copyrighted materials{u2014}primarily images and examples within the text{u2014}have been removed from this edition. --
