Instead of Going Out of Your Mind, Get into His. The only American to study and work with the renowned Barbara Woodhouse, Brian Kilcommons solves all those "bad dog" problems that drive owners crazy-and shows you how to raise a puppy into a happy, perfectly behaved dog. The trick is to understand how dogs think, read their body language, and, with the secrets Kilcommons shares in this book, be "fun, fair, and firm." A dog-training guide that gives you immediate results even with an adult dog, this manual trains you, as it gives owners everything they need and everything dogs need to become Good Owners, Great Dogs Includes specific tips on how to: * housebreak both puppies and adult dogs * teach your dog to come to you regardless of what he's doing * end annoying habits like jumping, food stealing, and barking * prevent aggression and, in many cases, stop it after it has become a problem * use games to teach your dog to obey and much more.

The Adventures of Princess Lau

Brave and clear, 250 new poems from the inestimable Red Hawk. He sees the human condition with open eyes, the insight of experience, and ruthless honesty. Original cover art by Gary Simmons. Noisy Little Men/ Where i work there is a noisy little man who talks too much and often speaks badly of others, hurtfully and without human feeling in the name of truth. Those who hurt and hide behind the truth are a dangerous bunch. i have done it myself and know the kind of sorrow which compels it so i try to take it like a gentleman, kindly and without harsh judgement which is not easy for a noisy little man like myself. i fear the world is full of men like me who talk all the time and say very little, while those who say little and try to say it very well are rare indeed. Hush, you noisy little man before you anger the God whose breath you squander. You do not want to anger that One; God is no gentleman.

John O'Kane delivers a gripping tale of a life dedicated to football violence and gives an unparalleled insight into the reality of being a career hooligan. With 33 criminal convictions against him, plus a further 33 cases either dropped or with a not guilty verdict, O'Kane has been remanded nine times including one charge of attempted murder when he was aged just 18. He became rapidly embroiled in a life of violence and was in and out of prison just as many times as he was in and out of a hospital bed. His was a life dedicated to the gang he founded, the Celtic Soccer Crew. O'Kane describes the extraordinary struggle of a gang of football hooligans to survive, despite discovering an unexpected enemy: the indomitable Celtic support - a support that guarded its reputation and good name with a passion O'Kane hadn't reckoned with, even as a Celtic supporter himself. But out on the streets and causing mayhem, the Celtic Soccer Crew, including, incredibly, their girlfriends, showed they were not taking grief from anyone.

Borobudur: Majestic Mysterious Magnificent

With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolize the formless world of pure knowledge and perfection.

Persuasion is better than force. This central belief behind late South Korean President Kim Dae-jung's unprecedented policy of engagement with North Korea became a key that promised to unlock half a century of conflict and provocation between North and South Korea. Kim's Sunshine Policy argued that encouraging North Korea to come out of isolation and end confrontation was better than trying to force it to change and it came to define a generation in South Korean politics, allowing millions to dare to believe that half a century of war could be brought to an end. Now this new book by Chung-in Moon, a Yonsei University professor and

former South Korean government adviser, presents a definitive analysis of how Kim developed and implemented his revolutionary policy, the challenges it faced and the mistake that Lee Myung-bak's government has made in abandoning it. Moon was a first-hand witness to the events of the Kim years, assisting in drafting the Sunshine Policy, attending the historic inter-Korean Summits in 2000 and 2007 that were fruits of its labors, and chronicling the public, political and global support for the policy. -- from <http://www.amazon.com> (May 5, 2014).

Approach your problems from the right end and begin with the answers. Then one day, perhaps you will find the final answer. "The Hermit Clad In Crane Feathers" In R. van Gullk's The Chinese Haze Hurders. It Isn't that they can't see the solution. It IS that they can't see the problem. G. K. Chesterton. The Scandal of Father Brown. "The POint of a Pin." Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics. However, the "tree" of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non-trivially) in regional and theoretical economics; algebraic geometry interacts with

physics; the Minkowsky lemma, COding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces. And In addition to this there are such new emerging subdisciplines as "experimental mathematics", "CFD", "completely Integrable systems", "chaos, synergetics and large-scale order", which are almost impossible to fit into the eXisting classificatIOn schemes.

In the twenty-fourth chapter of Genesis a beautiful young woman offers assistance to a weary traveler and his camels, and out of that simple action, a marriage results—a marriage that offers profound lessons to couples today. Bible scholar and renowned speaker Ravi Zacharias draws five points critical to the long-lasting success of every marriage from the biblical story of the marriage of Isaac and Rebekah. "Real love folds together both the emotions and the will," writes Zacharias. "Without the emotions, marriage is a drudgery; without the will, it is a mockery." Building upon that foundational truth, Zacharias goes on to explain the principles of seeking the counsel of others when finding a mate, cherishing your partner, remaining pure, becoming a man or woman of prayer, and, finally, risking everything in a relationship in order to experience God's ideal for love. Couples

everywhere, from those about to be married, to those who have been married for decades, will draw strength and wisdom for the journey of marriage as they learn from Ravi what it means to move from romance to lasting love.

The Adventures of Princess Lau. Niceness rules! An animated film for your mind. The Adventures of Princess Lau is the most deeply shallow comedy novel released this year. A book written with a child-like innocence, Princess Lau brings to life a world that enthralls and entraps the reader. A young and beautiful Chinese Princess with a very determined attitude and no idea. A miniature dragon, a handsome god and a great white shark are catapulted into a world of oddness full of strange creatures, an evil dark Lord and a wizard who lives at #664 Yellow Brick Road (the number of the neighbor of the beast). With a twist that will make you want to read the book again just to check what the heck really happened. Imagine The Matrix with The Hitchhiker's Guide to the Galaxy mated with Lord of the Rings without the Hobbits and you still have no idea what The Adventures of Princess Lau is really about. Don't forget Chick Norris. The toughest, most roundhouse being in this or any other universe. Posted by Bater_1973 Quirky, silly, cheesy, and funny, with a fast-moving entertaining plot and imaginative characters. This book dives

right in and takes the reader on a fantasy ride. Vivid detail expertly crafted by the author creates high definition visions in the mind's eye. A friend read this and had the same response. This book is unique. - Mountaineer Seattle Not only is this a truly original story, but the author has a huge talent for beating the English language into hilarious submission. Sly and witty, this is tremendous fun and you won't find anything else like it. Think of Princess Lau as Alice in Wonderland's cousin: they both went through the looking glass, but took different paths. - BBC Addict Houston "This is a most excellent adventure." Bill and Ted. Some books are unique. The Adventures of Princess Lau is such a book. A gentle, kind, hilarious and sly fantasy novel of love, laughter, loyalty, loss, alliteration, dragons and magic, Princess Lau takes the reader on a fantasy ride into the dragon's lair - and far beyond. Like all good fairy tales. More than just another of many fantasy books, this novel delights all ages as one of those fairy tales for kids and adults that bear re-reading many times. Indeed, you will get to dance with dragons! Multi-layered, simple and yet laughably profound, Princess Lau contains a twist that nobody has yet guessed before the final page reveal. Will you be the first person to deduce the incredible secret of The Adventures of Princess Lau? May all her readers live long and prosper!

BSAVA Manual of Feline Practice

This new addition to the BSAVA Foundation Manual series serves to provide an easily accessible source of practical advice on the management of common feline problems encountered in first-opinion practice. It begins with an introduction to important general issues in effective feline practice, including handling techniques, principles of examination and how to ensure a cat-friendly practice. Gold-standard preventive healthcare guidelines focusing on a life-stage approach and a discussion on therapeutics including antibiotic use, analgesia and anaesthesia follow. The main part of the Manual comprises problem-oriented sections that

focus on the investigation and initial management of, first, emergencies and then other common presentations such as alopecia, polydipsia and seizures. The final systems-based section gives more detailed information on the management of the disorders commonly seen in general practice. The Manual gives enough information for any vet to deal very competently with commonly seen feline problems, also providing guidance on where to go for further information if required. Where appropriate, guidelines are also given for when referral should be considered, and for situations where financial limitations may exist. A unique feature of this Manual are the many 'Quick Reference Guides' (QRGs) provided throughout, which present practical techniques and treatments in easy-to-follow step-by-step guides, with clear colour photographs illustrating each step whenever possible. The international panel of authors were carefully chosen for their practical expertise and passion in different areas of feline practice. The practical and easy-to-follow advice provided in this Manual makes it essential reading for all new graduates and first-opinion vets who see feline cases, as well as veterinary students and veterinary nurses worldwide.

Nonlinear Stochastic Operator Equations deals with realistic solutions of the nonlinear stochastic equations arising from the modeling of frontier problems in many fields of science. This book also discusses a wide class of equations to provide modeling of problems concerning physics, engineering, operations research, systems analysis, biology, medicine. This text discusses operator equations and the decomposition method. This book also explains the limitations, restrictions and assumptions made in differential equations involving stochastic process coefficients (the stochastic operator case), which yield results very different from the needs of the actual physical problem. Real-world application of mathematics to actual physical problems, requires making a reasonable model that is both realistic and solvable. The decomposition approach or model is an approximation method to solve a wide range of problems. This book explains an inherent feature of real systems—known as nonlinear behavior—that occurs frequently in nuclear reactors, in physiological systems, or in cellular growth. This text also discusses stochastic operator equations with linear boundary conditions. This book is intended for students with a mathematics background, particularly senior undergraduate and graduate students of advanced mathematics, of the physical or engineering sciences.
