Effectively and confidently interpret even the most challenging radiographic study A Doody's Core Title! "should be a part of every emergency medicine resident's personal library. In addition to residents, I would highly recommend this book to medical students, midlevel providers and any other physician who is interested in improving their ability to interpret radiographic studies necessary to diagnose common emergency medicine patient complaints."--Annals of Emergency Medicine 4 STAR DOODY'S REVIEW! "The purpose is to help improve the reader's skills in ordering and interpreting radiographs. The focus is on conventional radiographs, as well as noncontrast head CT. For emergency physicians this is a vital skill, which can greatly aid in making difficult diagnoses. The book is well written and thorough in addressing how to read radiographs, as well as covering easy to miss findings. The numerous pictures and radiographs are invaluable in demonstrating the author's teaching points and in engaging the reader in the clinical cases. This well written book will be

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.

SBA for the Final FRCR 2A

This is an SBA question book aimed at the post-graduate radiology market, specifically those taking the Fellowship of the Royal College of Radiology (FRCR) part 2 ('final') exams. This is a complementary title to The Final FRCR: Complete Revision Notes, which published in 2018. Part 2 of the FRCR is itself composed of two elements. Part 2a is a series of six multiple choice exams covering the major body systems: musculoskeletal & trauma, gastrointestinal, genitourinary, head and neck, pediatrics and chest. Part 2b involves a written exam and an oral viva and is typically taken at the beginning of the fourth year of specialty training. Approximately 700-1000 trainees sit the exam each year. The SBAs would also be applicable for those studying for other exams or coming to the UK to sit the UK exams from Asia and the Middle East. Key Features Resource designed for those taking the final FRCR (UK exam) designed to be a complementary product to The Final FRCR: Complete Revision Notes. Templated question format across the six major body systems. Written by recent graduates of the FRCR exams who know how best to approach the topic. Reviewed by senior advisors.

Although there are several gaps in understanding the many issues related to neurological disorders, we know enough to be able to shape effective policy responses to some of the most common. This book describes and discusses the increasing public health impact of common neurological disorders such as dementia, epilepsy, headache disorders, multiple sclerosis, neuroinfections, neurological disorders associated with malnutrition, pain associated with neurological disorders, Parkinson's disease, stroke and traumatic brain injuries. It provides information and advice on public health interventions that may reduce their occurrence and consequences, and offers health professionals and planners the opportunity to assess the burden caused by these disorders. The clear message that emerges is that unless immediate action is taken globally, the neurological burden is likely to become an increasingly serious and unmanageable.
