In 1888, William Edwards wrote "The Art of Boxing and Manual of Training" with the help of his friend and former ring opponent, Arthur Chambers. One of the earliest American books on the subject, "The Art of Boxing and Manual of Training" features detailed boxing techniques as well as tips on diet and exercise. The book also includes the various rules governing ringcraft, most notably the American Fair-Play Rules. The inclusion of these rules resulted in the book's inclusion in a landmark 1895 Supreme Court case pitting the state of Louisiana against boxing in New Orleans. This deluxe edition contains additional material including William Edwards' obituary and newspaper reports of the Louisiana court case.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
