Data Mining and Machine Learning

This dynamic and engaging workbook/CD-ROM package guides users through Pacific View Regional Hospital - a multi-level, virtual hospital setting in which students meet and care for a set of highly complex and diverse patients. The VCE workbook acts as a map, guiding users through the interactive setting as they care for patients in the virtual hospital and draw connections between these nursing experiences and their textbook discussions. Each workbook lesson includes a reading assignment from Fundamental Concepts and Skills for Nursing, 2nd Edition and activities that tie in with the accompanying software. Virtual Clinical Excursions equips users with the practical knowledge and skills needed for clinical rotations, while sharpening the decision-making skills that will help them set priorities for care, collect and interpret data, prepare and administer medications, and reach conclusions about patient problems. Meaningful, real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions

about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes NCLEX examination-style questions that offer built-in testing of clinical knowledge. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. A clock icon appears under each lesson, estimating how much time it will take to complete. A linkage icon alerts the user whenever they are about to begin an exercise that connects with previous lessons. The elimination of third-party plug-ins facilitates fast and easy software installation. Flash-based technology allows for more ease of use and seamless navigation. Greater faculty support with the addition of the FAC PAC, a new instructors' website, and a radically expanded testing component. A medication administration feature enables users to select, prepare, and administer medications. Over 50 common medication errors imbedded within the software to boost clinical realism and prepare students for current practice. Management Fundamentals

Wolves belong in packs - they are social animals. They live, hunt, eat, and play together. But these social elements are learned. When a wolf is still a pup, rough-and-tumble play helps to develop its relationships with fellow pups and to establish its place in the pecking order. These pups will grow up to be members of the same pack, and what is established while they are young continues on to adulthood. Organizational behaviour in people is learned, too - and, like the wolf pups, learning is best done through practice. Fundamentals of Organizational Behaviour: Key Concepts, Skills & Best Practices sets a new standard for fundamental OB texts. Incorporating lean, efficient coverage of core OB concepts with an array of rich learning tools, this text is flexible and engaging. The Second Canadian Edition has been designed to promote active learning, integrating student friendly material with experiential exercises. Unique and engaging features of the text are combined with an integrated tool kit for mastering organizational behaviour and tackling exams. Excelling at organizational behaviour is a hands-on active process. Fundamentals of Organizational Behaviour: Key Concepts, Skills & Best Practices gives students the material, the skills, and the abilities to lead the pack.
