When Michael Symon found out he had rheumatoid arthritis and external lupus, he suspected that what he ate--or didn't eat--could make a profound difference in how he felt. So he committed to a food reset on The Chew--no red meat, white flour, sugar, dairy, or alcohol. He recorded his results using social media to share his experience with his hundreds of thousands of fans--and what happened next was incredible--after a few days, he felt amazing. Michael discovered that dairy, sugar, and processed flours are his triggers, and that by avoiding them, his inflammation essentially vanished. Viewers connected with his journey and asked him to share his recipes. From Ginger and Chile-Roast Chicken to a dairy-free Mac and Cheese, Spaghetti Squash with Arugula Pesto to an Apple and Cherry Oat Crisp, Michael came up with more than 125 incredible recipes to satisfy his cravings without aggravating his body. The recipes in Fix It with Food provide guidance to both identifying food triggers and creating a meal plan that works around whatever ingredient causes your discomfort.

The single greatest lesson parents teach their kids isn't anything they say--it's what they do. And while most parents would say they want to raise compassionate kids, they might be surprised to discover just how little they're actually modeling the behaviors they hope to pass on--qualities such as unconditional love, gentleness, forgiveness, patience, gratitude, humility, and more. In this unique book, Sami Cone shows parents a new way to look at molding their children, one in which focusing on adding good behaviors and attitudes is more powerful than eliminating bad ones. Grounding her advice in Scripture--specifically the twelve characteristics found in Colossians 3:12-17--Cone offers plenty of stories from her own life to show these principles in action. And she offers practical things parents can do right now to create a home and family that exhibits love, harmony, and generosity of spirit in a self-centered world.

Jamie Glowacki—potty-training expert, Pied Piper of Poop, and author of the popular guide, *Oh Crap! Potty Training*—shares her proven 6-step plan to help you toilet train your preschooler quickly and successfully. Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it's done. Her 6-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20–30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: **** How do I know if my kid is ready? ** Why won't my child poop in the potty? ** How do I avoid "potty power struggles"? ** How can I get their daycare provider on board? ** My kid was doing so well—why is he regressing? ** And what about nighttime?!** *Oh Crap! Potty Training* can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the ANSWERS you need to do it once and be done with diapers for good.

The latest scientific research on home birth, breastfeeding, sleep training, vaccines, and other key topics—to help parents make their own best-informed decisions. In the era of questionable Internet "facts" and parental oversharing, it's more important than ever to find credible information on everything from prenatal vitamins to screen time. The good news is that parents and parents-to-be no longer need to rely on an opinionated mother-in-law about whether it's OK to eat sushi in your third trimester, an old college roommate for sleep-training "rules," or an online parenting group about how long you should breastfeed (there's a vehement group for every opinion). Credible scientific studies are out there – and they're "bottom-lined" in this book. The ultimate resource for today's science-minded generation, *The Informed Parent* was written for readers who prefer facts to "friendly advice," and who prefer to make up their own minds, based on the latest findings as well as their own personal preferences. Science writers and parents themselves, authors Tara Helle and Emily Willingham have sifted through thousands of research studies on dozens of essential topics, and distill them in this essential and engaging book. Topics include: Home birth * Labor induction * Vaginal birth vs. Cesarean birth * Circumcision * Postpartum depression * Breastfeeding * Vaccines * Sleep training * Pacifiers * SIDS * Bed-sharing * Potty training * Childhood obesity * Food sensitivities and allergies * BPA and plastics * GMOs vs. organic foods * The hygiene hypothesis * Spanking * Daycare vs. other childcare options Full reference information for all citations in the book is available online at <http://theinformedparentbook.com/book-references/> From the Trade Paperback edition.
