Business Education World

Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses,

financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

BoogarLists | Directory of International Business Schools

Business education is a critical ingredient in establishing a viable middle class of managers in transitioning and developing economies. Compiled in association with the Center for International Business Education and Research, this comprehensive examination of business and management education, pedagogical models, and curricula innovations in institutions around the world is the first such work to emphasize emerging markets.

Rethinking the MBA

Free Money for Graduate School, published in 1990, is a book by Laurie Blum, author of the Free Money series.

The Best Southeastern Colleges

Barron's guide to graduate business schools

Examines the state of research of online and blended learning in business disciplines with the intent of identifying opportunities for meaningful future research and enhancing the practice of online teaching in business schools. The book evaluates research from business disciplines such as accounting, economics, finance, information systems (IS), management, marketing, and operations/supply chain management. The author reports on topics attracting interest from scholars in the respective disciplines, the methods commonly used to examine those topics, and the most noteworthy conclusions to date from that research. Written by a leading scholar on online learning in the business disciplines The author is the current editor of the leading Learning and Education journal Focused on online and blended learning in business schools

Don't Pay for Your MBA

Look around your office. Turn on the TV. Incompetent leadership is everywhere, and there's no denying that most of these leaders are men. In this timely and provocative book, Tomas Chamorro-Premuzic asks two powerful questions: Why is it so easy for incompetent men to become leaders? And why is it so hard for competent people--especially competent women--to advance? Marshaling decades of rigorous research, Chamorro-Premuzic points out that although men make up a majority of leaders, they underperform when compared with female leaders. In fact, most organizations equate leadership potential with a handful of destructive personality traits, like overconfidence and narcissism. In other words, these traits

may help someone get selected for a leadership role, but they backfire once the person has the job. When competent women--and men who don't fit the stereotype--are unfairly overlooked, we all suffer the consequences. The result is a deeply flawed system that rewards arrogance rather than humility, and loudness rather than wisdom. There is a better way. With clarity and verve, Chamorro-Premuzic shows us what it really takes to lead and how new systems and processes can help us put the right people in charge.

Rethinking the MBA

REA's Authoritative Guide to the Top 100 Business Schools

Peterson's(R) Graduate Programs in Business, Education, Information Studies, Law & Social Work 2021 contains more than 10,000 graduate programs across all of the relevant disciplines; including accounting and finance, business management, education, law, library and information sciences, marketing, social work, and many more. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate program, school, or department as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the graduate series.

Graduate School of Business

Who needs a mountain of debt? Each year, the nation's top business schools are flooded with applications from people eager to pursue their MBA dreams. But those aspirations come at a steep price. According to U.S. News and World Report, the average debt load for graduates of NYU's Stern School of Business, MIT's Sloan School of Management, and other top business schools exceeds \$100,000. Like most, author Laurie Pickard couldn't shoulder that. But she faced a dilemma: despite two degrees and a Peace Corps stint, she needed a business education to land her dream job in international development. She decided to take her education into her own hands, and found that some of those same prestigious business schools offer MOOCs (massive online open courses) for low or even no cost. By picking the right classes from the best schools, she gained the skills--without all the debt. In *Don't Pay for Your MBA*, Pickard shows self-starters, career changers, and budding entrepreneurs how to navigate the expanding universe of online education. Building on her popular No-Pay MBA blog, Pickard reveals how to: Define your goals and tailor a curriculum that works for you * Master the language of business * Build a strong network * Choose a concentration and deepen your expertise * Showcase your nontraditional education in a way that attracts offers Self-directed learning fills gaps in your training, positions you for promotions, and opens up new opportunities. Why pay exorbitant tuition when you can MOOC your way to success?

Summaries of Studies and Research in Business Education

The Truth About Colleges—from the REAL Experts: Current College Students Inside this book, you'll find profiles of 100 great colleges in the Southeast, including schools you've heard about and great colleges that aren't as widely recognized. There is simply no better way to learn about a college than by talking to its students, so we asked thousands of them to speak out about their schools. Sometimes hilarious, often provocative, and always telling, the students' opinions will arm you with rare insight into each college's academic load, professors, libraries, dorms, social scene, and more.

Peterson's Guide to Graduate Programs in Business, Education, Health & Law 1994

"Business Schools Face Test of Faith." "Is It Time to Retrain B-Schools?" As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of *Rethinking the MBA*, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors:

- Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education
- Provide case studies showing how leading MBA programs have begun reinventing themselves for the better
- Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies

Rich with examples and thoroughly researched, *Rethinking the MBA* reveals why and how business schools must define a better pathway for the future.

Peterson's Graduate Programs in Business, Education, Health,

Information Studies, Law and Social Work

In today's society, it is not only desirable but essential for a business to take on a global edge. The best way to ensure a successful future is to educate business students about global policies currently at play. *Diverse Contemporary Issues Facing Business Management Education* discusses the issues that are facing both large and small corporations and the students who are seeking employment there. Questioning not only what changes globalization has brought to the business world, but what ways our education system will have to change to keep up, this book is an essential reference source for business owners, educators, students, or anyone interested in the future globalization of the business market.

Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work

Climate change poses challenges as well as opportunities for businesses and, broadly speaking for the entire economy. Businesses will be challenged to provide services or products with less harmful influence on the climate; respond to a changing policy, regulatory, and market environment; and provide new services and products to help address the challenges of a changing climate. Many businesses are beginning to see climate change as another context within which they need to consider their core functions of strategy, finance, operations, marketing, and their regulatory environments, a context that poses both risks and opportunities. *Climate Change Education: Preparing Current and Future Business Leaders* is the summary of a workshop hosted by the National Research Council's Board on Science Education in March 2013 to explore issues associated with teaching climate change-related topics in business schools. The workshop focused on major gaps in understanding of climate and sustainability education in postsecondary professional schools of business. The workshop also connected the topic of climate education for current and future business leaders with a broader discussion on climate change education and how they influence and can benefit each other. This report discusses the role that business schools could play in preparing future corporate leaders for the challenges and opportunities that climate change poses.

From Higher Aims to Hired Hands

This directory provides detailed profiles of the top 100 graduate schools of business in the United States and abroad. A quick-reference chart presents important comparative data at a glance. In addition, information on admissions, applications procedures, financial aid, the GMAT, and pre-admission advice is given in introductory essays.

Diverse Contemporary Issues Facing Business Management Education

Peterson's Graduate Programs in Business 2011

Do business schools actually make good on their promises of "innovative," "outside-the-box" thinking to train business leaders who will put society ahead of money-making? Do they help society by making better business leaders? No, they don't, Steven Conn asserts, and what's more they never have. In throwing down a gauntlet on the business of business schools, Conn's *Nothing Succeeds Like Failure* examines the frictions, conflicts, and contradictions at the heart of these enterprises and details the way business schools have failed to resolve them. Beginning with founding of the Wharton School in 1881, Conn measures these schools' aspirations against their actual accomplishments and tells the full and disappointing history of missed opportunities, unmet aspirations, and educational mistakes. Conn then poses a set of crucial questions about the role and function of American business schools. The results aren't pretty. Posing a set of crucial questions about the function of American business schools, *Nothing Succeeds Like Failure* is pugnacious and controversial. Deeply researched and fun to read, *Nothing Succeeds Like Failure* argues that the impressive façades of business school buildings resemble nothing so much as collegiate versions of Oz. Conn pulls back the curtain to reveal a story of failure to meet the expectations of the public, their missions, their graduates, and their own lofty aspirations of producing moral and ethical business leaders.

Peterson's Guide to Graduate Programs in Business, Education, Health, and Law, 1990

Business Education Forum

Peterson's Graduate Programs in the Biological Sciences 2012 contains a wealth of information on accredited institutions offering graduate degree programs in these fields. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. National Business Education Quarterly

Provides wide-ranging information on the graduate and professional programs offered by accredited colleges and universities in the United States, U.S. territories, and Canada and by those institutions outside the U.S. that are accredited by U.S. accrediting bodies. The overview volume contains information on institutions as a whole, while the other books are devoted to specific academic and professional

fields.

Business Education in Emerging Market Economies

Making Global MBAs

Business Education in Emerging Market Economies discusses the impact of business education on emerging markets and explores curricular innovation, pedagogical approaches, and strategic alliances in the context of industrializing economies. Emerging markets contain 80% of the world's population and some 75% of its trade growth in the foreseeable future, according to the U.S. Department of Commerce. The potential economic growth of these emerging markets has prompted a need to understand their dynamics, business institutions and educational systems. Many American universities, for example, have responded to the demand of their students and business partners by educating them about the exciting opportunities and lurking threats in these industrializing economies. This book contains multiple chapters designed to educate American students about the curricular innovations and course development occurring in emerging markets.

Free Money For Graduate School

Graduate Programs in Business, Education, Information Studies, Law & Social Work 2020

A generation of aspiring business managers has been taught to see a world of difference as a world of opportunity. In *Making Global MBAs*, Andrew Orta examines the culture of contemporary business education, and the ways MBA programs participate in the production of global capitalism through the education of the business subjects who will be managing it. Based on extensive field research in several leading US business schools, this groundbreaking ethnography exposes what the culture of MBA training says about contemporary understandings of capitalism in the context of globalization. Orta details the rituals of MBA life and the ways MBA curricula cultivate both habits of fast-paced technical competence and “softer” qualities and talents thought to be essential to unlocking the value of international cultural difference while managing its risks. *Making Global MBAs* provides an essential critique of neoliberal thinking for students and professionals in a wide variety of fields.

Online and Blended Business Education for the 21st Century

Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work 2011 contains more than 14,000 graduate programs in 158 disciplines-

It enables libraries to provide a foundational reference for researchers, educators, administrators, and others in the context of instructional systems and technology"--Provided by publisher.

Graduate Programs in Business, Education, Information Studies, Law & Social Work 2021

Business and Management Education in Transitioning and Developing Countries: A Handbook

Is management a profession? Should it be? Can it be? This major work of social and intellectual history reveals how such questions have driven business education and shaped American management and society for more than a century. The book is also a call for reform. Rakesh Khurana shows that university-based business schools were founded to train a professional class of managers in the mold of doctors and lawyers but have effectively retreated from that goal, leaving a gaping moral hole at the center of business education and perhaps in management itself. Khurana begins in the late nineteenth century, when members of an emerging managerial elite, seeking social status to match the wealth and power they had accrued, began working with major universities to establish graduate business education programs paralleling those for medicine and law. Constituting business as a profession, however, required codifying the knowledge relevant for practitioners and developing enforceable standards of conduct. Khurana, drawing on a rich set of archival material from business schools, foundations, and academic associations, traces how business educators confronted these challenges with varying strategies during the Progressive era and the Depression, the postwar boom years, and recent decades of freewheeling capitalism. Today, Khurana argues, business schools have largely capitulated in the battle for professionalism and have become merely purveyors of a product, the MBA, with students treated as consumers. Professional and moral ideals that once animated and inspired business schools have been conquered by a perspective that managers are merely

agents of shareholders, beholden only to the cause of share profits. According to Khurana, we should not thus be surprised at the rise of corporate malfeasance. The time has come, he concludes, to rejuvenate intellectually and morally the training of our future business leaders.

Why Do So Many Incompetent Men Become Leaders?

Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work contains a wealth of information on colleges and universities that offer graduate work in these fields.
