Harley-Davidson Service-repair Handbook, Sportster Series, 1959-1977

For Harley-Davidson aficionados, the very name

Sportster conjures an image of a fire-breathing mechanical beast scorching the world's tarmac image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.

This text challenges the orthodox view of marketing communication. Using references to communication studies, cultural studies, and critical management studies, the focus of managing marketing communication is shifted from message-making to relationship-building. This textbook provides a contemporary examination of marketing as a social process. The scope of communication theory is broadened and a two-way conception of communication is introduced. The existing model of marketing communication is replaced with a new and exciting concept, that integrates the relational and social emphases of the twenty-first century. "Marketing Communication" investigates the problems of organizing and locating marketing in a business corporation, management responsibility for planning and decision making, and the role of the marketing communication manager in contemporary society.
