Annotation Written in straightforward "user" language, this book provides an authoritative, yet practical guide for the engineer or technician involved in specifying, applying, maintaining or operating variable frequency drives (VFDs). A comprehensive overview of starting controls and their application to various types

of induction motors provides a valuable assessment of the advantages and disadvantages of each type of control. You'll find a helpful discussion of some of the latest electronic "smart" motor controllers, as well as a section covering the attributes and capabilities of the "wound-rotor motor," including how to configure a basic control system for it. A basis is given to compare motor torque and operating characteristics using "starters." The presentation provides a detailed evaluation of the most common versions of variable frequency drives. Current trends in addressing harmonic problems created by VFDs are discussed, along with use of new IGBT technology. Other topics include sizing and applying of VFDs, controlling enclosure heat, and energy saving opportunities.

In the early 1970s, Nancy Rexroth began photographing the rural landscapes, children, white frame houses, and domestic interiors of southeastern Ohio with a plastic toy camera called the Diana. Working with the camera's properties of soft

focus and vignetting, and further manipulating the photographs by deliberately blurring or sometimes overlaying them, Rexroth created dreamlike, poetic images of "my own private landscape, a state of mind." She called this state IOWA because the photographs seemed to reference her childhood summer visits to relatives in Iowa. Rexroth self-published her evocative images in 1977 in the book IOWA, and the photographic community responded immediately and strongly to the work. Aperture published a portfolio of IOWA images in a special issue, The Snapshot, alongside the work of Robert Frank, Garry Winogrand, Lee Friedlander, and Emmet Gowin. The International Center for Photography, the Corcoran Gallery of Art, and the Smithsonian Institution included IOWA images in group exhibitions. Forty years after its original publication, IOWA has become a classic of fine art photography, a renowned demonstration of Rexroth's ability to fashion a world of surprising aesthetic possibilities using a simple, low-tech dollar camera. Long out of print and highly prized by photographers and photobook collectors, IOWA is now available in a hardcover edition that includes twenty-two previously unpublished images. Accompanying the photographs are a new foreword by Magnum photographer and book maker Alec Soth and an essay by internationally acclaimed curator Anne Wilkes Tucker, who affirms the continuing power and importance of IOWA within the photobook genre. New postscripts by Nancy Rexroth and Mark L. Power, who wrote the essay in the first edition, complete the volume.

Fate throws a curveball at the San Francisco ex-husband-and-wife legal team of Mike Daley and Rosie Fernandez, when Mike picks up the phone and hears the voice of Leon Walker. This is not good news-because Walker was the one who ruined their marriage. Years ago, he and his brother participated in a stickup that left a man dead. Through a series of (some said) questionable maneuvers, Mike got the charges dropped, but he and Rosie fought about it all the time and it finally drove a wedge between them. Now, a Silicon Valley venture capitalist has been found dead in a dumpster on San Francisco's skid row. The new murder has been pinned on Walker, but he not only tells Mike he is innocent, he says he is a dying man and doesn't want to go to his grave proclaimed a murderer. Dogged investigation, courtroom nimbleness, and a healthy dose of luck usually have helped Mike before, but it looks like it'll take more than that to prevail this time, and his time is running out-both on his client and, just maybe, on his partnership. Filled with wonderful characters and suspense and more than a touch of humor, Reasonable Doubt is, like the author's first three books, a page-turner.
