In an era of raging commoditization and eroding profit margins, survival depends on resilience: staying one step ahead of your customers. Sure, most companies say they're "customer-focused," but they don't deliver solutions to customers' thorniest problems. Why? Because they're stymied by the rigid "silos" they're organized around. In *Reorganize for Resilience*, Ranjay Gulati reveals how resilient companies prosper both in good times and bad, driving growth and increasing profitability by immersing themselves in the lives of their customers. This book shows how resilient organizations cut through internal barriers that impede action, build bridges between warring divisions, and transform former competitors into collaborators. Based on more than a decade of research in a variety of industries, and filled with examples from companies including Cisco Systems, La Farge, Starbucks, Best Buy, and Jones Lang LaSalle, Gulati explores the five levers of resilience:

- **Coordination:** Connect, eradicate, or restructure silos to enable swift responses.
- **Cooperation:** Foster a culture that aligns all employees around the shared goals of customer solutions.
- **Clout:** Redistribute power to "bridge builders" and customer champions.
- **Capability:** Develop employees' skills at tackling changing customer needs.
- **Connection:** Blend partners' offerings with yours to provide unique customer solutions.

It is now understood that biotechnology may hold the key to feeding the world through genetically engineered improvement of major agricultural crops. This work provides benchmarks of the current state of scientific development of horticultural biotechnology and also the increasing pace at which new applications from this field are being put to the test for commercial potential. The success of molecular genetic manipulation and tissue culture work in certain model systems such as the tomato and some ornamental flowers establishes a useful starting point for discussing the fundamental and applied aspects of plant biotechnology. Among the case studies presented are: gene transfer and isolation; genome structure; flower development; biotic stress; abiotic stress; and commercial applications.

Reorganize for Resilience

Ezekiel 25-32 contains some of the most virulent speeches directed against the neighboring nations of Judah. Assuming the opposing statuses between the nations and Judah, some emphasize that the destruction of the nations in chapters 25-32 means the upcoming salvation of God's people. Presupposing the nations as judged according to a separate standard of morality, others render the judgment executed upon the nations irrelevant to that upon Judah. Are these then the only two readings of Ezekiel's oracles against the nations? In this study, Lydia Lee postulates a third way to perceive the rhetorical roles of the nations in Ezek 25-32. Unravelling the intricate connections between the oracles against the nations and those against Judah, Lee argues that Ezek 25-32 contains a daring message directed not only against the foreign nations, but also

against Judah's land, temple, and nation. In the end, Lee places Ezek 25-32 in a broader context, considering how samples of its early reception within the prophetic book affirm or transform the bleak message about the oblique judgment for the house of Judah.

This book offers unique insights into the Psalms and sketches a variety of interpretive possibilities. The exposition of Psalm texts against the background of their different historical and/or cultic settings in the ancient Near East sets a firm basis for their reapplication in the liturgy today. In the history of interpretation the Psalms have also proven themselves to be natural texts for liturgical use. This scholarly effort thus portrays in various ways the importance of the Psalms for their reviving interpretation and application in the liturgy. Contributors include: Marcel Bernhard, Georg P. Braulik, Brian Doyle, Alphonso Groenewald, Dirk J. Human, Jorg Jeremias, Louis C. Joner, Jurie H. le Roux, Eckhart Otto, Nick A. Schuman, Stephanus D. Snyman, Hans-Ulrich Steymans, Pieter M.
