Case Studies in Food Policy for Developing Countries: Policies for health, nutrition, food consumption, and poverty

The essays in this book present important perspectives on the role of Indigenous legal traditions in reclaiming and preserving the autonomy of Aboriginal communities and in reconciling the relationship between these communities and Canadian governments. Although Indigenous peoples had their own systems of law based on their social, political, and spiritual traditions, under colonialism their legal systems have often been ignored or overruled by non-Indigenous laws. Today, however, these legal traditions are being reinvigorated and recognized as vital for the preservation of the political autonomy of Aboriginal nations and the development of healthy communities.

Native Americans in Comic Books

At an earlier time, sociologists C. Wright Mills, W. E. Du Bois, and Jane Addams loudly protested injustices and inequities in American society, provided critiques and analyses of systems of oppression, and challenged sociologists to be responsible critics and constructive commentators. These giants of American sociology would have applauded the 2004 meetings of the American Sociological

Association. The theme of the meetings, Public Sociology, presided over by President Michael Burawoy, sparked lively debate and continues to be a spur for research and theory, and a focal point of ongoing discussions about what sociology is and should be. This volume advances these discussions and debates, and proposes how they can be further sharpened and developed. Some authors in this volume clarify the distinctive roles that Public Sociologists can play in the discipline, in the classroom, and in larger society. Others provide critical analyses, focusing, for example, on aspects of American society and institutions, global corporate actors, sweatshop practices, international neoliberal organizations, migration policies, and U.S. environmental policies. Others advance new ways of thinking about global interdependencies that include indigenous groups, peasants, as well as societies in industrialized and developing states, and international organizations. Still others propose visions of transformative processes and practices that are progressively affirmative, even activist — in the spirit of 'A Better World is Possible!!' This volume provides an overview of some of the major debates in sociology today and places emphasis on the importance of human rights in the 'One (globalized) World' we live in today. Authors engage these debates with spirited enthusiasm and write exceptionally clearly about those topics that may be new to American readers.

Enlightened Zeal examines the fascinating history of the Hudson's Bay Company's involvement in scientific networks during the company's two-hundred year chartered monopoly. Working from the company's voluminous records, Ted Binnema demonstrates the significance of science in the company's corporate strategies. Initially highly secretive about all of its activities, the HBC was by 1870 an exceptionally generous patron of science. Aware of the ways that a commitment to scientific research could burnish its corporate reputation, the company participated in intricate symbiotic networks that linked the HBC as a corporation with individuals and scientific organizations in England, Scotland, and the United States. The pursuit of scientific knowledge could bring wealth and influence, along with tribute, fame, and renown, but science also brought less tangible benefits: adventure, health, happiness, male companionship, self-improvement, or a sense of meaning. The first study of scientific research in any chartered company over the entire course of its monopoly, Enlightened Zeal expands our understanding of social networks in science, establishes the vast scope of the HBC's contribution to public knowledge, and will inspire new research into the history of science in other chartered monopolies.

Aboriginal and Treaty Rights in Canada

This publication sets out to examine the major challenges for indigenous peoples to obtain adequate access to and utilization of quality health care services. It provides an important background to many of the health issues that indigenous peoples are currently facing. Improving indigenous peoples' health remains a critical challenge for indigenous peoples, States and the United Nations. Indigenous peoples' health status is severely affected by their living conditions, income levels, employment rates, access to safe water, sanitation, health services and food availability. They also face destruction to their lands, territories and

resources, which are essential to their very survival. Other threats include climate change and environmental contamination. Geographical isolation and poverty results in not having the means to pay high cost for transport or treatment resulting in major structural barriers in accessing health care, further compounded by discrimination, racism and a lack of cultural understanding and sensitivity. Many health systems do not reflect the social and cultural practices and beliefs of indigenous peoples. At the same time, it is often difficult to obtain a global assessment of indigenous peoples' health status because of the lack of data. More work is required in building existing data collection systems to include data on indigenous peoples and their communities.

The Role of the Indigenous African Psyche in the Evolution of Human Consciousness

The health disparities affecting Indigenous peoples in Canada might well be understood as a national epidemic. Although progress has been made in the last decade towards both understanding and ameliorating Indigenous health inequalities, very little research or writing has expanded a social determinants of health framework to account for the unique histories and present realities of Indigenous peoples in this country. This timely edited collection addresses this significant knowledge gap, exploring the ways that multiple health determinants beyond the social--from colonialism to geography, from economy to biology--converge to impact the health status of Indigenous peoples in Canada. This unique collection, comprised largely of contributions by Indigenous authors, offers the voices and expertise of First Nations, Inuit, and Metis writers from across Canada. The multitude of health determinants of Indigenous peoples are considered in a selection of chapters that range from scholarly papers by research experts in the field, to reflective essays by Indigenous leaders. Appropriate throughout a range of disciplines, including Health Studies, Indigenous Studies, Public and Population Health, Community Health Sciences, Medicine, Nursing, and Social Work, this engaging text broadens the social determinants of health framework to better understand health inequality. Most importantly, it does so by placing front and center the voices and experiences of Indigenous peoples.

The Indigenous Welfare Economy and the CDEP Scheme

The film industry and mainstream popular culture are notorious for promoting stereotypical images of Native Americans: the noble and ignoble savage, the pronoun-challenged sidekick, the ruthless warrior, the female drudge, the princess,

the sexualized maiden, the drunk, and others. Over the years, Indigenous filmmakers have both challenged these representations and moved past them, offering their own distinct forms of cinematic expression. *Native Americans on Film* draws inspiration from the Indigenous film movement, bringing filmmakers into an intertextual conversation with academics from a variety of disciplines. The resulting dialogue opens a myriad of possibilities for engaging students with ongoing debates: What is Indigenous film? Who is an Indigenous filmmaker? What are Native filmmakers saying about Indigenous film and their own work? This thought-provoking text offers theoretical approaches to understanding Native cinema, includes pedagogical strategies for teaching particular films, and validates the different voices, approaches, and worldviews that emerge across the movement.

Encyclopedia of Women and Religion in North America: Women and religion: methods of study and reflection

In this book Arthur Manuel and Grand Chief Ronald Derrickson challenge virtually everything that non-Indigenous Canadians believe about their relationship with Indigenous Peoples and the steps that are needed to place this relationship on a healthy and honourable footing. Manuel and Derrickson show how governments are attempting to reconcile with Indigenous Peoples without touching the basic colonial structures that dominate and distort the relationship. They review the current state of land claims. They tackle the persistence of racism among non-Indigenous people and institutions. They celebrate Indigenous Rights Movements while decrying the role of government-funded organizations like the Assembly of First Nations. They document the federal government's disregard for the substance of the United Nations Declaration on the Rights of Indigenous Peoples while claiming to implement it. These circumstances amount to what they see as a false reconciliation between Indigenous and non-Indigenous Canadians. Instead, Manuel and Derrickson offer an illuminating vision of what Canada and Canadians need for true reconciliation. In this book, which Arthur Manuel and Ron Derrickson completed in the months before Manuel's death in January 2017, readers will recognize their profound understanding of the country, of its past, present, and potential future. Expressed with quiet but firm resolve, humour, and piercing intellect *The Reconciliation Manifesto* will appeal to both Indigenous and non-Indigenous people who are open and willing to look at the real problems and find real solutions.

Indigenous People and the Roles of Culture, Law and Globalization

The Sustainability of Rural Systems

This book explores the history, culture, rights and the effects of globalization on indigenous people in the Americas, Asia-Pacific, and Africa from an evaluative and critical perspective. Unlike discipline-based textbooks, this volume seeks to contribute to the social discourse around indigenism and to engage readers in a shared sense of humanity and empowerment for these groups of individuals.

Among the issues addressed are: who indigenous people are, culture and colonization, self-determination, the impact of legal theory and judicial decisions, land rights, poverty, lack of healthcare, international human rights law, tourism, treaties, and globalization. The book concludes by addressing what it means to be an indigenous person in the 21st century, and calling upon policymakers to recognize the importance of preserving indigenous people's territories, languages, cultures and collective rights.

An Indigenous Peoples' History of the United States

The Jie people of northern Uganda and the Turkana of northern Kenya have a genesis myth about Nayeche, a Jie woman who followed the footprints of a gray bull across the waterless plateau and who founded a "cradle land" in the plains of Turkana. In *Remembering Nayeche and the Gray Bull Engiro*, Mustafa Kemal Mirzeler shows how the poetic journey of Nayeche and the gray bull Engiro and their metaphorical return during the Jie harvest rituals gives rise to stories, imagery, and the articulation of ethnic and individual identities. Since the 1990s, Mirzeler has travelled to East Africa to apprentice with storytellers. *Remembering Nayeche and the Gray Bull Engiro* is both an account of his experience listening to these storytellers and of how oral tradition continues to evolve in the modern world. Mirzeler's work contributes significantly to the anthropology of storytelling,

the study of myth and memory, and the use of oral tradition in historical studies.

Enlightened Zeal

The expansion of the British Empire during the eighteenth and nineteenth centuries created the greatest mass migration in human history, in which the Irish and Scots played a central, complex, and controversial role. The essays in this volume explore the diverse encounters Irish and Scottish migrants had with Indigenous peoples in North America and Australasia. The Irish and Scots were among the most active and enthusiastic participants in what one contributor describes as "the greatest single period of land theft, cultural pillage, and casual genocide in world history." At the same time, some settlers attempted to understand Indigenous society rather than destroy it, while others incorporated a romanticized view of Natives into a radical critique of European society, and others still empathized with Natives as fellow victims of imperialism. These essays investigate the extent to which the condition of being Irish and Scottish affected settlers' attitudes to Indigenous peoples, and examine the political, social, religious, cultural, and economic dimensions of their interactions. Presenting a variety of viewpoints, the editors reach the provocative conclusion that the Scottish and Irish origins of settlers were less important in determining attitudes and behaviour than were the specific circumstances in which those settlers found themselves at different times and places in North America, Australia and New Zealand. Contributors include Donald Harman Akenson (Queen's), John Eastlake (College Cork), Marjory Harper (Aberdeen), Andrew Hinson (Toronto), Michele Holmgren (Mount Royal), Kevin Hutchings (Northern British Columbia), Anne Lederman (Royal Conservatory of Music), Patricia A. During the past several decades, the Aboriginal population of Canada has become so urbanized that today, the majority of First Nations and Métis people live in cities. Home in the City provides an in-depth analysis of urban Aboriginal housing, living conditions, issues, and trends. Based on extensive research, including interviews with more than three thousand residents, it allows for the emergence of a new, contemporary, and more realistic portrait of Aboriginal people in Canada's urban centres. Home on the City focuses on Saskatoon, which has both one of the highest proportions of Aboriginal residents in the country and the highest percentage of Aboriginal people living below the poverty line. While the book

details negative aspects of urban Aboriginal life (such as persistent poverty, health problems, and racism), it also highlights many positive developments: the emergence of an Aboriginal middle class, inner-city renewal, innovative collaboration with municipal and community organizations, and more. Alan B. Anderson and the volume's contributors provide an important resource for understanding contemporary Aboriginal life in Canada.

Indigenous Peoples Participation in European Union Development Policies

Historically, the conservation of forests and wildlife has focused on the creation of national parks and reserves. However, only 9% of protected areas are larger than 14,000 hectares, likely making them too small to conserve ecosystem services and prevent loss of wide-ranging keystone species such as elephant and leopard. New approaches are needed that extend conservation beyond protected area boundaries into areas where economic considerations prevail. The book describes one such emerging model of conservation: the integration of the private sector into partnerships to protect biodiversity and improve forest management. While such partnerships are being created in nearly every sector of resource extraction, detailed analyses of how such partnerships work and whether they benefit biodiversity conservation are rare. Using a case study from the Congo Basin, the book examines principles of conservation and partnership, and provides technical and methodological details to replicate an innovative conservation model. It presents concrete solutions for expanding conservation across multi-use landscapes, a necessary action as industry expands to all the corners of the globe.

Tracing the Roles of Soft Law in Human Rights

Debates the crucial issue of how Indigenous self-determination and the rights agenda, which argues for the unique and inherent rights of Indigenous Australians, sits with, or in opposition to, the mutual obligation theories of the Howard government's welfare reform.

Public Sociologies Reader

This book examines the interaction of the dimensions of economy, society, and environment in the context of rural systems. It embraces a wide range of topics, including globalization and reregulation in sustainable food production, conservation and sustainability, the development of sustainable rural communities, and sustainable rural-urban interaction. It is relevant to advanced-level students, teachers, researchers, policymakers and agency workers.

This distinctive work addresses the status of women in the areas of education, work force, marriage and divorce, the Constitution, abortion and contraceptives, public office, military service, and health care. The countries selected reflect a representative pool of the world's cultures, religions, traditions, races, laws, and politics. Hepburn and Simon present the weaknesses, strengths, and progress or digression of each of the selected nations, painting a clear picture of how much more progress must occur in order to set men and women on equal footing. *Women's Roles and Statuses the World Over* is intended to serve scholars and general audiences alike as a handbook providing empirical data and comprehensive references on the social issues, problems, and practices that affect women today.

Indigenous Peoples

2015 Recipient of the American Book Award *The first history of the United States told from the perspective of indigenous peoples* Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative.

The Reconciliation Manifesto

Soft law increasingly shapes and impacts the content of international law in multiple ways, from being a first step in a norm-making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties. This is especially true in the area of human rights. While relatively few human rights treaties have been adopted at the UN level in the last two decades, the number of declarations, resolutions, conclusions, and principles has grown significantly. In some areas, soft law has come to fill a void in the absence of treaty law, exerting a degree of normative force exceeding its non-binding character. In others areas, soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes. Despite these developments, little attention has been paid to soft law within human rights legal scholarship. Building on a thorough analysis of

Bookmark File PDF Indigenous People And The Roles Of Culture Law And Globalization Comparing The Americas Asia Pacific And Africa

relevant case studies, this volume systematically explores the roles of soft law in both established and emerging human rights regimes. The book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights, but also helps to unsettle and critically question certain political and doctrinal beliefs. Following introductory chapters that lay out the general conceptual framework, the book is divided in two parts. The first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards, its progressive and regressive effects, and the role that different actors play in the incubation process. The second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms. These chapters examine the relationship between soft and hard law, the role of different actors in formulating new soft law, and the potential for eventual codification.

State of the World's Indigenous Peoples

Contains papers presented at a conference entitled "Roles and perspectives in the law" held in April 2002 at Victoria University of Wellington Law School honouring Sir Ivor Richardson upon his retirement as President of the Court of Appeal. Covers eight distinct and contrasting areas of law, the juxtaposition of which illustrates the underlying principles, tensions, and values that run through the law. Includes sections on taxes and commercial regulation.

Indigenous Development in the Andes

This work takes an in-depth look at the world of comic books through the eyes of a Native American reader and offers frank commentary on the medium's cultural representation of the Native American people. It addresses a range of portrayals, from the bloodthirsty barbarians and noble savages of dime novels, to formulaic secondary characters and sidekicks, and, occasionally, protagonists sans paternal white hero, examining how and why Native Americans have been consistently marginalized and misrepresented in comics. Chapters cover early representations of Native Americans in popular culture and newspaper comic strips, the Fenimore Cooper legacy, the "white" Indian, the shaman, revisionist portrayals, and Native American comics from small publishers, among other topics.

Women's Roles and Statuses the World Over

For millennia, plants and their habitats have been fundamental to the lives of Indigenous Peoples - as sources of food and nutrition, medicines, and technological materials - and central to ceremonial traditions, spiritual beliefs, narratives, and language. While the First Peoples of Canada and other parts of the world have developed deep cultural understandings of plants and their environments, this knowledge is often underrecognized in debates about land rights and title, reconciliation, treaty negotiations, and traditional territories. *Plants, People, and Places* argues that the time is long past due to recognize and accommodate Indigenous Peoples' relationships with plants and their ecosystems. Essays in this volume, by leading voices in philosophy, Indigenous law, and environmental

sustainability, consider the critical importance of botanical and ecological knowledge to land rights and related legal and government policy, planning, and decision making in Canada, the United States, Sweden, and New Zealand. Analyzing specific cases in which Indigenous Peoples' inherent rights to the environment have been denied or restricted, this collection promotes future prosperity through more effective and just recognition of the historical use of and care for plants in Indigenous cultures. A timely book featuring Indigenous perspectives on reconciliation, environmental sustainability, and pathways toward ethnoecological restoration, *Plants, People, and Places* reveals how much there is to learn from the history of human relationships with nature.

The Rio Declaration on Environment and Development

Indigenous peoples are an intrinsic part of countries like Australia, New Zealand, Canada, Finland, USA, India, Russia and almost all parts of South America and Africa. A considerable amount of research has been done during the twentieth century mainly by anthropologists, sociologists and linguists in order to describe, and document their traditional life style for the protection and safeguarding of their established knowledge, skills, languages and beliefs. These communities are engaging and adapting rapidly to the changing circumstances partly caused by post modernisation and the process of globalization. These have led them to aspire to better living standards, as well as preserving their uniqueness, approaches to environment, close proximity to social structures and communities. For at least the last two decades, patterns of increased economic activity by indigenous peoples in many countries have been viewed to be significantly on the rise. *Indigenous People and Economic Development* reveals some of the characteristics of this economic activity, 'coloured' by the unique regard and philosophy of life that indigenous people around the world have. The successes, difficulties and obstacles to economic development, their solutions and innovative practices in business - all of these elements, based on research findings, are discussed in this book and offer an inside view of the dynamics of the indigenous societies which are evolving in a globalised and highly interconnected contemporary world.

Benefits Beyond Boundaries

This book offers a synthesis of spiritual ethics, ecological information, common sense education, and a call for worldwide liberation of women, and all indigenous peoples. It addresses the urgent problems facing humanity and the rest of our planet; such as, disrespect for nature, negative culture domination, scientific corruption, organized crime, mis-education, racial pathology, and information selectively hidden from the general public. Furthermore, it encourages solutions to these problems. The positive potentials towards repairing our world are integrated through each chapter; such as, the authors girl inclusive version of the International Children's Rights Proclamation, vs. the European male centered

version currently in play through today's U.N. Information on the worldwide sex-slave trade is included to help expose this injustice.

Annotation. The global tourism industry continues a trend of sustained growth, moving more people and generating domestic and foreign revenues, often at the expense of the social and ecological integrity of destination regions. As a result, tourism policy makers have been forced to consider a variety of new approaches to ensure that the environment, local people, tourists, and business remain unaffected by the negative impacts of the industry.

Roles and Perspectives in the Law

As indigenous peoples in Latin America have achieved greater prominence and power, international agencies have attempted to incorporate the agendas of indigenous movements into development policymaking and project implementation. Transnational networks and policies centered on ethnically aware development paradigms have emerged with the goal of supporting indigenous cultures while enabling indigenous peoples to access the ostensible benefits of economic globalization and institutionalized participation. Focused on Bolivia and Ecuador, *Indigenous Development in the Andes* is a nuanced examination of the

Bookmark File PDF Indigenous People And The Roles Of Culture Law And Globalization Comparing The Americas Asia Pacific And Africa

complexities involved in designing and executing “culturally appropriate” development agendas. Robert Andolina, Nina Laurie, and Sarah A. Radcliffe illuminate a web of relations among indigenous villagers, social movement leaders, government officials, NGO workers, and staff of multilateral agencies such as the World Bank. The authors argue that this reconfiguration of development policy and practice permits Ecuadorian and Bolivian indigenous groups to renegotiate their relationship to development as subjects who contribute and participate. Yet it also recasts indigenous peoples and their cultures as objects of intervention and largely fails to address fundamental concerns of indigenous movements, including racism, national inequalities, and international dependencies. Andean indigenous peoples are less marginalized, but they face ongoing dilemmas of identity and agency as their fields of action cross national boundaries and overlap with powerful institutions. Focusing on the encounters of indigenous peoples with international development as they negotiate issues related to land, water, professionalization, and gender, *Indigenous Development in the Andes* offers a comprehensive analysis of the diverse consequences of neoliberal development, and it underscores crucial questions about globalization, governance, cultural identity, and social movements.

Indigenous Legal Traditions

Irish and Scottish Encounters with Indigenous Peoples

The international community has long grappled with the issue of safeguarding the environment and encouraging sustainable development, often with little result. The 1992 Rio Declaration on Environment and Development was an emphatic attempt to address this issue, setting down 27 key principles for the international community to follow. These principles define the rights of people to sustainable development, and the responsibilities of states to safeguard the common environment. The Rio Declaration established that long term economic progress required a connection to environmental protection. It was designed as an authoritative and comprehensive statement of the principles of sustainable development law, an instrument to take stock of the past international and domestic practice, a guide for the design of new multilateral environmental regimes, and as a reference for litigation. This commentary provides an authoritative and comprehensive overview of the principles of the Declaration, written by over thirty inter-disciplinary contributors, including both leading practitioners and academics. Each principle is analysed in light of its origins and rationale. The book investigates each principle's travaux préparatoires setting out the main points of controversy and the position of different countries or groups. It analyses the scope and dimensions of each principle, providing an in-depth understanding of its legal effects, including whether it can be relied before a domestic or international court. It also assesses the impact of the principles on subsequent soft law and treaty development, as well as domestic and international jurisprudence. The authors demonstrate the ways in which the principles interact with each other, and finally provide a detailed analysis of the shortcomings and future potential of each principle. This book will be of vital importance to practitioners, scholars, and students of international environmental law and sustainable development.
