The Real ACT, 3rd Edition

As seen on PBS's POV An unprecedented guide to helping black boys achieve success at every stage of their lives—at home, at school, and in the world Regardless of how wealthy or poor their parents are, all black boys must confront and surmount the “achievement gap”: a divide that shows up not only in our sons' test scores, but in their social and emotional development, their physical well-being, and their outlook on life. As children, they score as high on cognitive tests as their peers, but at some point, the gap emerges. Why? This is the question Joe Brewster, M.D., and Michèle Stephenson asked when their own son, Idris, began struggling in a new school. As they filmed his experiences for their award-winning documentary American Promise, they met an array of researchers who had not only identified the reasons for the gap, but had come up with practical, innovative solutions to close it. In Promises Kept, they explain • how to influence your son's brain before he's even born • how to tell the difference between authoritarian and authoritative discipline—and why it matters • how to create an educational program for your son that matches his needs • how to prepare him for explicit and implicit racism in school and in the wider world • how to help your child develop resilience, self-discipline, emotional intelligence, and

a positive outlook that will last a lifetime Filled with innovative research, practical strategies, and the voices of parents and children who are grappling with these issues firsthand, Promises Kept will challenge your assumptions and inspire you to make sure your child isn't lost in the gap. Praise for Promises Kept "The authors offer a plethora of information and advice geared toward the specific developmental needs of black boys. . . . Thorough and detailed, this guidebook is also a call to action. As Brewster sees it, when people of color remain complacent, they not only break a tacit promise to future generations to achieve social equity, they also imperil the futures of both the nation and the planet. A practical and impassioned parenting guide."—Kirkus Reviews "A penetrating look at the standard practices, at school and at home, that contribute to the achievement gap between the races and the sexes that seems to put black boys at a disadvantage. [Brewster and Stephenson] debunk myths and offer ten parenting and education strategies to improve the prospects for black boys to help them overcome racial stereotypes and low expectations. . . . This is a practical and insightful look at the particular challenges of raising black males."—Booklist

Graphic novels are an excellent medium to motivate today's youth to become independent learners and thinkers. This practical guide shows secondary school teachers how to incorporate graphic novels into content area instruction as a tool for meeting the needs of diverse learners and achieving the goals of the Common Core State Standards. The authors provide instructional guidelines with classroom examples that demonstrate how graphic novels can be used to expand content knowledge and literacy in science, social studies, math, and English/language arts. Teachers will appreciate the book's specific suggestions for selecting graphic novels and for employing responsive practices that will build students' reading, writing, speaking, listening, and media competencies. "The range and complexity of graphic novels being published right now is simply amazing to me. . . . They are part of what should be a balanced array of texts that all can read, enjoy, and learn from. In this volume, the authors point to this proliferation, as well as the educative potential of graphic novels. After reading its pages, I feel others will agree with me that they have done an excellent job pointing out how graphic novel creators such as Jim Ottaviani and Larry Gonick communicate much about history, science, and mathematics while also making connections to comprehension and thinking skills that accompany both literacy and content-specific learning." —From the Foreword by Stergios Botzakis, assistant professor of adolescent literacy in the Theory and Practice in Teacher Education

Department at The University of Tennessee, Knoxville
“The authors have set forth on a task I feel long is overdu—connecting the literacy potential of graphic novels to the content areas. This book is a wonderful contribution to the field of content area literacy studies.” —Michael D. Boatright, assistant professor, Department of English, Western Carolina University

Book Features: Advice for selecting and evaluating graphic novels. Teaching strategies for each of the four major content domains. Guidance for aligning instruction with the Common Core State Standards. A list of educational graphic novels organized by content area. Study group questions. And more!
