Introduction to Corporate Finance

Aristotle said 'you are what you repeatedly do'. Most of us have no idea that what we repeatedly do creates our lives, we think our future is shaped by big events, the decisions we make, the thoughts we have but, this book will show you that it is your daily actions that are the key. Over the last few decades neuroscientists and psychologists have discovered that there is more power in 'I do' than 'I think'. However, if an action is repeated enough times it becomes habit but habits lack thought, consideration and presence. To effect long-lasting meaningful change our actions need to be filled with a sense of personal meaning and power – they need to be ritualized. Creating personal ritual in our lives allows us to bring the presence of the sacred into the everyday. The rituals in this book have been designed as

symbolic acts providing a framework for anyone to use to create positive change in their lives. The 7 morning rituals are designed to help you 'wake with determination', the 7 afternoon rituals focus on 'living on purpose', and the 7 evening rituals are about 'retiring with satisfaction'.

Lasers continue to be an amazingly robust field of activity. Anyone seeking a photon source is now confronted with an enormous number of possible lasers and

laser wavelengths to choose from, but no single, comprehensive source to help them make that choice. The Handbook of Lasers provides an authoritative compilation of lasers, their properties, and original references in a readily accessible form. Organized by lasing media—solids, liquids, and gases—each section is subdivided into distinct laser types. Each type carries a brief description, followed by tables listing the lasing element or medium, host, lasing transition and wavelength, operating properties, primary literature citations, and, for broadband lasers, reported tuning ranges. The importance and value of the Handbook of Lasers cannot be overstated. Serving as both an archive and as an indicator of emerging trends, it reflects the state of knowledge and development in the field, provides a rapid means of obtaining reference data, and offers a pathway to the literature. It contains data useful for comparison with predictions and for developing models of processes, and may reveal fundamental inconsistencies or conflicts in the data.

She has made soap under the company name Soap Tree, and before her retirement from professional life, she was a historic preservation architecture consultant. Anne and her husband, Aaron Shepard, live in Friday Harbor, Washington. ////////// "Beautiful in its simplicity. . . . A definitive book for experienced as well as beginning milk soapers." -- Rebekah Bailey, The Original Soap Dish, South Whitley, Indiana "An easy to read and understand book that will take the mystery out of milk-based soapmaking and debunk some of the myths surrounding it. It contains some great basic formulas to get you started making milk soaps of any kind, and fuel to let your imagination run wild when you are ready to formulate your own creations. A good source of information for new soapmakers, and also suitable for more experienced soapmakers who want to start making milk soaps but thought it would be too difficult." -- Amanda Guilfoyle, Bodelicious Bath & Body Products, Ipswich, Queensland, Australia "As always, Anne is up to her usual excellence. This book demystifies milk soapmaking so everyone can have the luxury of a truly decadent bar of soap *easily*. . . . Debunks much of the popular wisdom that may have discouraged some soapmakers." -- Kevin M. Dunn, Author, "Scientific Soapmaking" and "Caveman Chemistry" "As uber-soapmaker Anne L. Watson demonstrates, milk soaps made properly are [rightfully] well-known for a quality of luxurious buttery softness that is undeniable. . . . Anne once again acquits herself ably as a scholar of the suds and a natural communicator." -- Wishing Willow (blog) "Full of information that milk soapers, whether novice or experienced, could use to make better milk soaps. Anne writes in a conversational style that made me feel as though I were sitting down with her in her kitchen. . . . Anne details what seems to be everything there is to know about the subject. Rather than simply offering her opinions and favorite practices, Anne did extensive testing and experimenting, learning how to make the best milk soap bars that could be made. Soapmakers will be impressed with the amount and quality of Anne's research and observations. . . . That leaves the question: Can a neophyte make good cold-process milk soap? I now say yes, with the caveat they have 'Milk Soapmaking' in hand." -- Beth Byrne, "The Saponifier," Sept.-Oct. 2010

'You be going to live in the city, Hannah?' Farmer Price asked, pushing his battered hat up over his forehead. 'Wouldn''t think you'd want to go there . . . Times like this, I would have thought your sister would try and keep you away.' Hannah is oblivious to Farmer Price's dark words, excited as she is about her first ever trip to London to help her sister in her shop 'The Sugared Plum', making sweetmeats for the gentry. Hannah does not however get the reception she expected from her sister Sarah. Instead of giving Hannah a hearty welcome, Sarah is horrified that Hannah did not get her message to stay away - the Plague is taking hold of London. Based on much research, Mary Hooper tellingly conveys how the atmosphere in London changes from a disbelief that the Plague is anything serious, to the full-blown horror of the death carts and being locked up - in effect to die - if
