The Training and Responsibilities of the Midwife

"The narratives in this book offer rare and much-needed insight into the lived experiences and contributions of the largest cadre of global health workers: The nurses who have dedicated their careers and their lives to serving the world's poor." --Paul Farmer, MD, PhD, Kolokotronis University Professor Harvard University; Co-Founder, Partners in Health Global health nursing--as a career or as a time-limited experience in personal and professional growth--is a rapidly growing specialty area. This unique book presents firsthand accounts from nurses at all professional levels, who share their life-changing experiences and insights with nurses interested in the global health arena. Written with compassion and humor, their stories emphasize the practical, challenging, and rewarding aspects of global health nursing. Contributors describe their motivation for working in global health, along with the rewards and challenges. The authors discuss the importance of approaching global nursing with humility, respect, and appreciation for what they will learn from their colleagues. They describe how global health work has enhanced their ability to provide quality care to diverse populations, which include recent immigrants living in the United States. In addition to these vivid accounts, the book discusses the parameters of global health nursing, how to prepare for this nursing experience, key resources, global nursing research, and nurses as global health consultants. Woven throughout the book are descriptions of how these nurses have encouraged--through teaching and mentoring--the next generation of global health nurses. The book also provides coverage of domestic global health initiatives. Key Features: Presents firsthand accounts of the practical, challenging, and rewarding aspects of global health nursing Describes assumptions challenged and lessons learned Written for nurses at all stages of professional life Discusses varied opportunities in global health nursing, which includes research and consulting Covers domestic global health initiatives Assists faculty to prepare themselves and their students for global health endeavors

A History of Nursing in Kenya

The Kenya Gazette is an official publication of the government of the Republic of

Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Women's International Network News

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Annual Report

Most accounts of health and healthcare in Africa are written by foreigners. African Health Leaders: Making Change and Claiming the Future redresses the balance. Written by Africans, who have themselves led improvements in their own countries, the book discusses the creativity, innovation and leadership that has been involved tackling everything from HIV/AIDs, to maternal, and child mortality and neglected tropical diseases. It celebrates their achievements and shows how, over three generations, African health leaders are creating a distinctively African vision of health and health systems. The book reveals how African Health Leaders are claiming the future - in Africa, but also by sharing their insights and knowledge globally and contributing fully to improving health throughout the world. It illustrates how African leadership can enable foreign agencies and individuals working in Africa to avoid all those misunderstandings and misinterpretations of culture and context which lead to wasted efforts and frustrated hopes. African Health Leaders challenges Africans to do more for themselves; build on success; tackle weak governance, corrupt systems and low expectations and claim the future. It sets out what Africa needs from the rest of the world in the spirit of global solidarity - not primarily in aid, but through investment, collaboration, partnership and co-development. It concludes with a vision for improvement based on three foundations: an understanding that 'health is made at home'; the determination to offer access to health services for everyone; and an insistence on the pursuit of quality.

Social Welfare: Its Role in the Development of Kenya

South African nurses care for patients in London, hospitals recruit Filipino nurses to Los Angeles, and Chinese nurses practice their profession in Ireland. In every industrialized country of the world, patients today increasingly find that the nurses who care for them come from a vast array of countries. In the first book on international nurse migration, Mireille Kingma investigates one of today's most important health care trends. The personal stories of migrant nurses that fill this book contrast the nightmarish existences of some with the successes of others. Health systems in industrialized countries now depend on nurses from the developing world to address their nursing shortages. This situation raises a host of thorny questions. What causes nurses to decide to migrate? Is this migration

voluntary or in some way coerced? When developing countries are faced with nurse vacancy rates of more than 40 percent, is recruitment by industrialized countries fair play in a competitive market or a new form of colonialization? What happens to these workers—and the patients left behind—when they migrate? What safeguards will protect nurses and the patients they find in their new workplaces? Highlighting the complexity of the international rules and regulations now being constructed to facilitate the lucrative trade in human services, Kingma presents a new way to think about the migration of skilled health-sector labor as well as the strategies needed to make migration work for individuals, patients, and the health systems on which they depend.

The Future of Nursing

In more than a metaphorical sense, the womb has proven to be an important site of political struggle in and about Africa. By examining the political significance—and complex ramifications—of reproductive controversies in twentieth-century Kenya, this book explores why and how control of female initiation, abortion, childbirth, and premarital pregnancy have been crucial to the exercise of colonial and postcolonial power. This innovative book enriches the study of gender, reproduction, sexuality, and African history by revealing how reproductive controversies challenged long-standing social hierarchies and contributed to the construction of new ones that continue to influence the fraught politics of abortion, birth control, female genital cutting, and HIV/AIDS in Africa.
