The Four Colors of Business Growth

This book is a 2nd edition of "Modulation in Classical Music for Young Musicians" (April 2017): It adds a new chapter on string quartets by Haydn and Mozart. The book uses the Do, Re, Mi, Fa, Sol, La, Si notation. (Another identical book using

the A, B, C, D, E, F, G notation is also available.) Its intended audience is teenagers attending Middle and High School and students in their first two years of college. Following an introductory chapter that explains the grammar of classical music, the rest of the book uses numerous examples taken from the Preludes by Bach and the piano sonatas and string quartets by Haydn and Mozart, demonstrating how they applied the grammar principles in their works. The book is intended both for piano students and for students playing any other "classical" instrument, like the violin or the clarinet. If you know what a "scale" is and you play scales on your instrument - then you are ready to read and understand this book. The book can be used in two modes: It can be used to understand "how classical music works". An understanding of the grammar of classical music will provide the young musician with basic tools for use in the field of the Arts. But, going beyond the level of understanding, it can also be used to develop the creativity and writing skills of the young musician. Every explained example in the book - and there are many - is like a good short story from which the student can take the theme and be asked to elaborate on it, write a few variations on the theme. This is exactly how students at school acquire their writing and creativity skills in a common language: they are asked ("homework") to write short compositions about the stories discussed or books read at school or at home. One good short story at a time, day after day.

The King of Scotland is dead. As the nobles fight over succession, a boy grows to manhood in a divided land, in a family torn apart by ambition and betrayal. Civil war threatens as powerful Scottish families jostle for power, not knowing that King Edward of England, driven by an ancient prophecy, has set his own plans of conquest in motion. The boy's path will never be smooth—he will serve his enemy and betray his friends before he finds himself. But destiny is waiting to claim him. His name is Robert the Bruce, and his story begins in Insurrection.

Radio amateurs and short-wave listeners all want to achieve the very best from their HF and VHF equipment. Receivers and transmitters are available to professional standards, but very few people have the real estate to erect the sort of antenna used by a commercial radio station. Antenna guru Peter Dodd explains how, by using a variety of simple techniques, it is possible to achieve very high performance from a compact antenna. Also detailed is how to make an antenna efficient on several bands at once. The book covers end-fed and centre-fed antennas, rotary beams, loops, tuning units, VHF/UHF antennas, antenna and mast construction, transmission lines, and how to estimate and measure the performance of your antenna. Whether you have a house, bungalow or apartment, Backyard Antennas will help you find the solution to radiating a good signal on your favourite band.

Finding Our Forever

New York Times bestselling author Brenda Novak welcomes readers to the town of Silver Springs, where surprises wait around every corner! The search for her birth mother brought Cora Kelly to the New Horizons Boys Ranch. Getting a job there was easy enough, but confiding in Aiyana, the ranch's owner, that she's really her daughter? Cora's not sure she can do that, not unless she's confident the news will be welcomed. And once she gets to know Elijah Turner—Aiyana's adopted son and ranch manager—that decision becomes even more difficult. Although Elijah can't deny his deep attraction to Cora, he's always struggled with trust. Anyone with his past would, and there's something about the ranch's newest employee that isn't exactly as it seems. But if the feelings she awakes in his guarded heart are any indication, she might be just what he's long been waiting for.

21 Things to Do After You Get Your Amateur Radio License

Here is a course of action: harden, worsen, accelerate decadence. Adopt the perspective of active nihilism, exceed the

mere recognition-be it depressive or admiring-of the destruction of all values. Become more and more incredulous. Push decadence further still and accept, for instance, to destroy the belief in truth under all its forms. In this collection of essays and interviews from 1970-72, Jean-Francois Lyotard explores and drifts, as we drift, between art and politics, the "figural" and representation, silence and libidinal energy. Art becomes a deconstructing force that deals not with the signified of things but their form or plastic organization; and politics is the overturning of a mystified or alienated reality. The artists' reaction to capitalism, and their function, isn't anymore to create new good forms, but to deconstruct and accelerate their obsolescence. It is necessarily a critical activity. In his essays dealing with Freud, Lyotard develops his thought on the figural and the unconscious as a topological space. Contrasting image-figure, form-figure, and matrix-figure, Lyotard establishes links between the order of desire and the figural through the category of transgression: transgression of the object, transgression of form, transgression of space. For him, the important thing is not to produce a consistent discourse but rather to produce "figures" within reality. For there is no point in changing social reality if all it does is set up the same form. Dealing with issues of depth and appearance, the body becomes a surface of inscription for flows of libidinal energy. We need to pay more attention to the silence of bodily organs which creates a tremendous dissonance: it is this silence that must be heard as the libido wanders through our bodies. What we enjoy in art is its ability to displace us, to make us drift.

the world, with a focus on the United States, where many of the most dramatic advances in communications technology and techniques were realized. A number of entries focus on specific battles where communications superiority helped turn the tide, including Tsushima (1905), Tannenberg and the Marne (both 1914), Jutland (1916), and Midway (1942). The book also addresses a range of related topics such as codebreaking, propaganda, and the development of civilian telecommunications.
