An Introduction to Stochastic Modeling, Student Solutions Manual (e-only)

From the bestselling author of *In Her Shoes*, *All Fall Down* and the forthcoming novel *Who Do You Love*, *Good in Bed* is a funny and tender story full of heart. *Cannie Shapiro* never wanted to be famous. The smart, sharp, plus-sized reporter was perfectly happy writing about other people's lives for her local newspaper. And for the past twenty-eight years, things have been tripping along nicely for *Cannie*. Sure, her mother has come charging out of the closet, and her father has long since dropped out of her world. But she loves her job, her friends, her dog and her life. She loves her apartment and her commodious, quilt-lined bed. She has made a tenuous peace with her body and she even felt okay about ending her relationship with her boyfriend *Bruce*. But now this 'Loving a larger woman is an act of courage in our world,' *Bruce* has written in a national woman's magazine. And *Cannie* - who never knew that *Bruce* saw her as a larger woman, or thought that loving her was an act of courage - is plunged into misery, and the most amazing year of her life.

This book gives an up-close look at Mercedes-Benz roadsters, convertibles, and two-and four-seat coupes from the mid-1950s to present. With roadsters, starting with the 300SL's from the mid-1950 and continuing through the current SLK's - up to the 2003 model year. Everybody seems to want a late model 560SL. Why not an early 450SL for half the money? The joy and pride of ownership is the same, trust me. Or how about one of the former longtime underdogs, an SLC? Also they start to appreciate, a few of them even very fast, faster than a mint 560SL. If any of this is of interest, then this new book (published already earlier as e-book) is for you. It does not only deal with development and history, it also comes with a comprehensive buyer's guide for both the SL and SLC. This includes a look at their price development over the past years. Another focus has been the VIN and data card, so that you have a better understanding, how they were equipped and to which market they have been shipped first. Superb recent photography from the author's collection can help you to find the right car or it might even serve as reference in a restoration project. Naturally the paint and interior upholstery options, full technical details plus the annual production history of each model are covered. As a bonus, rare insights into the R107's almost unknown rally history are given. **FREE BONUS:** When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W111 or W198 or R107 for example) the author has covered in one of his books. Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far

more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Time & Tide

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. *Transitions to Alternative Vehicles and Fuels* assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several

scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

Barbara Gittings: Gay Pioneer is the first full-length biography of the woman who has been called the mother of the gay-rights movement, Barbara Gittings. Her work in the LGBT movement spanned from the late 1950s until her death in 2007. Her partner in life, Kay Lahusen, photographed many of the movement's biggest actions during the 1960s, and more than 270 photos accompany this biography. This book is available in both color and B&W editions, and in color on Kindle by July 2015. Gittings was active in a wide range of pre- and post-Stonewall groups, including the Daughters of Bilitis. She served as editor of DOB's newsletter, The Ladder. She worked with Frank Kameny on many protests and legal cases fighting government discrimination. She also was among the leaders of the push to change the American Psychiatric Association diagnosis of homosexuality as an illness, and among those pushing the American Library Association to be more inclusive of gays. The book is available in both B&W and color editions on Amazon, and also in color on Kindle. "Baim's book, the first full-length biography of Barbara Gittings, demonstrates why Frank Kameny, who earned the right to be considered a father of the gay civil-rights movement, so aptly deemed Gittings its mother. As Baim shows, more than any lesbian leader of the 20th

century, Gittings kept her eyes sharply focused on the prize of civil rights for gay people." - From the Foreword by Lillian Faderman "This first and deeply moving biography of Barbara Gittings, pioneer of lesbian political activism, dramatically evokes a past of open, outrageous anti-homosexual discrimination. Today's radically different world was first imagined and then begun to be built by daring activists like Gittings." - Jonathan Ned Katz, Co-Director, OutHistory.org "Tracy Baim brings Gittings to life in this captivating and inspiring biography. Skillfully combining Gittings' own words with accounts of her activist campaigns, this biography makes clear how much Gittings accomplished. A committed activist for five decades, Barbara Gittings truly changed the world. " - Author and Historian John D'Emilio (In a New Century: Essays on Queer History, Politics, and Community Life) "Barbara Gittings just about leaps from the pages of Tracy Baim's celebratory biography of the gay rights movement's happiest warrior. Determined, persistent, persuasive, and wicked-smart, Barbara wielded her smile like a machete, demolishing all demagogues and fools who got in the way of what she knew to be true about herself and the rest of us. How lucky were we that she was born at a time when we so desperately needed her to help blaze our path to freedom." - Eric Marcus, author of Making Gay History "Tracy Baim has captured the life and legacy of the mother of gay liberation in America with this book. Barbara Gittings would have loved it. Another incredible book on our history!" - Reverend Troy Perry "Gittings understood early on the critical role America's libraries would play in changing hearts and minds about gay issues. In an age before the

Internet, she dedicated her life to making good information available to all through her leadership in the Gay Task Force of the American Library Association. This powerful biography tells a story that libraries across the nation can celebrate." - John Cunningham, Retired Chief of Branch and Regional Libraries, The Free Library of Philadelphia

MERCEDES-BENZ, the Modern SL Cars, the R107 and C107

As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence,

for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

If you search for a car that can hold its own, when parked next to a Porsche 911 Cabrio, don't look any further. Because the SL R230 is regarded by many as the best looking SL that has left Stuttgart after the famous SL Gullwing. On top it is immense fun to drive, with powerful V8s and V12s to match the looks. Like the drive-train they are almost bullet-proof. Early cars suffered from quality problems that could spoil the fun factor somewhat. But all in all the R230 plays its GT role rather well, even with six-cylinder engines. And the AMG versions are true sports cars. This book with comprehensive buyer's guide can help you to find the right one, if the R230 interests you. It was

already published as e-book in 2012 and has been completely revised in Nov.2015. The book explains the VIN and data card in great detail, discusses the SBC, ABC systems and looks at potential problems with the vario-roof. Superb photography and an enjoyable test-drive in the splendid SL65 AMG are other highlights. It ends with a detailed list of the cars' technical specifications and annual production history of each model. But, beyond the ways in which it has actively restructured our daily lives, the mobile has changed our sense of ourselves and the way we see the world. The relationship between public and private space, how we view time and space, how we rely on and negotiate social networks - all are

increasingly centred on this small piece of technology. Mobile Communications presents a succinct, challenging, and accessible overview of the transformations and challenges presented by this most personal, yet most overlooked technology.

This book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and, importantly, vice versa. This ranges from the neuroendocrine control of eating to the effects of life-threatening disease on eating behavior. The importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food/cognitive axis can be profound. The complex interrelationship between

neuropsychological processing, diet, and behavioral outcome is explored within the context of the most contemporary psychobiological research in the area. This comprehensive psychobiology- and pathology-themed text examines the broad spectrum of diet, behavioral, and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathological processes.
