Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

A Requiem for a Brand

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

Mitsubishi Lancer EVO I to X

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to

find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons

far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
