Martin Heidegger's work is pivotal in the history of modern European philosophy. The New Heidegger presents a comprehensive and stimulating overview of, and introduction to, the work of one of the most influential and controversial philosophers of our time. Heidegger has had an extraordinary impact on contemporary philosophical and extra-philosophical life: on deconstruction, hermeneutics, ontology, technology and techno-science, art and architecture, politics, psychotherapy, and ecology. The New Heidegger takes a thematic approach to Heidegger's work, covering not only the seminal Being and Time, but also Heidegger's lesser known works. Lively, clear and succinct, the book requires no prior knowledge of Heidegger and is an essential resource for anyone studying or teaching the work of this major modern philosopher.

The New Heidegger

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven

and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Most organizations are stuck in a rut. On one hand, they understand all the good things that will come with growth. On the other, they're petrified that growth means change, and change means risk, and

risk means death. Nobody wants to screw up and ruin a good thing, so most companies (and individuals) just keep trying to be perfect at the things they've always done. In 2003, Seth Godin's Purple Cow challenged organizations to become remarkable—to drive growth by standing out in a world full of brown cows. It struck a huge chord and stayed on the Business-Week bestseller list for nearly two years. You can hear countless brainstorming meetings where people refer to purple cows and say things like, "That's not good enough. We need to create a big moo!" But how do you create a big moo—an insight so astounding that people can't help but remark on it, like digital TV recording (TiVo) or overnight shipping (FedEx), or the world's best vacuum cleaner (Dyson)? Godin worked with thirty-two of the world's smartest thinkers to answer this critical question. And the team—with the likes of Tom Peters, Malcolm Gladwell, Guy Kawasaki, Mark Cuban, Robyn Waters, Dave Balter, Red Maxwell, and Randall Rothenberg on board—created an incredibly useful book that's fun to read and perfect for groups to share, discuss, and apply. The Big Moo is a simple book in the tradition of Fish and Don't Sweat the Small Stuff. Instead of lecturing you, it tells stories that stick to your ribs and light your fire. It will help you to create a culture that consistently delivers remarkable innovations.
