popular D5000 and creates a nice bridge between the more beginner-level D3100 and the high-end D7000. This book has one goal: to teach D5100 owners how to make great shots using their new Nikon camera. Users learn how to use the D5100 to create the type of photos that inspired them to buy the camera in the first place. Everything in the book is in service of creating a great image. Starting with the top ten things users need to know about the camera, photographer Rob Sylvan carefully guides readers through the operating features. Owners get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-chapter assignments.

While the number of assignments available in many photographic specialties is decreasing, there are still relatively untapped growth areas for still photographers and videographers. One of these specialty fields is legal photography. Legal photography involves working closely with lawyers in law firms to provide photographic or video documentation relevant to their civil, not criminal, cases. It can involve a range of other photographic specialties from macro photography to architectural photography. No matter what is involved in a legal photography assignment, it is generally interesting and presents a new, unique set of problems to solve. Legal photography is far more technical than creative, but it is also in demand and is financially rewarding. Civil cases brought to arbitration or jury trial

range from simple to complex. Common to all cases is the need to present evidence in a fair and accurate manner. In this book, readers will learn how to take responsibility for ensuring that the images captured and delivered for presentation are a “fair and accurate representation” of the observed scene. That responsibility begins with the choice and use of the proper equipment (e.g., camera type, sensor size, capture mode, the correct focal-length lens for the job), through the techniques used during image capture (exposure, lighting, camera angle, camera-to-subject distance, white balance, etc.), to the processing of the captures for output. Sholik also points out that documentation is required for each step to ensure all parties that the representation is indeed fair and accurate—and the details of how this can be accomplished are outlined in this book as well. Also covered is information about how to proceed should you be asked to give testimony as to the accuracy of your work and information about the requirements to be deemed an “expert witness.” For most photographers, doing assignments in the field of legal photography is the easy part. Getting the assignments can be more of a challenge, so the process of marketing yourself as a legal photographer is covered.

Award-winning photographer Stuart Franklin's exploration of how we, as humans, are driven to visually document our experiences and the world around us. Stuart Franklin took one of the most powerful photographs of the twentieth century - the 'tank man' in Tiananmen Square, Beijing, 1989. From his insightful position as a photographer, Franklin explores why we are driven to visually document our

experiences and the world around us. He focuses on photography but traces this universal need through art, literature and science. Looking at photojournalism, war photography and work recording our culture, Franklin identifies some of its driving impulses: curiosity, outrage, reform and ritual; the search for evidence, for beauty, for therapy; and the immortalization of memory. As our understanding of 'documentary' continues to expand, Franklin considers photographic staging - where, perhaps, the future of the genre may lie: in search of truth over fact. "This book traces what I shall call the documentary impulse. Here I mean the passion to record, with fidelity, the moments we experience and wish to preserve, the things we witness and might want to reform; or simply the people, places or things we find remarkable Photography (and journalism) practised respectfully has the power to educate us all towards a greater understanding and empathy towards others."
