The English Teacher's Handbook

Michael Barber, former chief advisor on delivery to British Prime Minister Tony Blair, provides steps to achieving public education reform in this practical field guide.

Developing Linguistic Corpora

Devastated when her best friend moves away, sixteen-year-old Jessica Darling feels isolated at school and at home, as she struggles to deal with her father's obsession with her track meets, her boy-crazy peers, and her own nonexistent love life.

Sloppy Firsts

The Muhammad cartoon crisis of 2005–2006 in Denmark caught the world by surprise as the growing hostilities toward Muslims had not been widely noticed. Through the methodologies of media anthropology, cultural studies, and communication studies, this book brings together more than thirteen years of research on three significant historical media events in order to show the drastic changes and

emerging fissures in Danish society and to expose the politicization of Danish news journalism, which has consequences for the political representation and everyday lives of ethnic minorities in Denmark.

The Annoying Difference

A linguistic corpus is a collection of texts which have been selected and brought together so that language can be studied on the computer. Today, corpus linguistics offers some of the most powerful new procedures for the analysis of language, and the impact of this dynamic and expanding sub-discipline is making itself felt in many areas of language study. In this volume, a selection of leading experts in various key areas of corpus construction offer advice

in a readable and largely non-technical style to help the reader to ensure that their corpus is well designed and fit for the intended purpose. This guide is aimed at those who are at some stage of building a linguistic corpus. Little or no knowledge of corpus linguistics or computational procedures is assumed, although it is hoped that more advanced users will find the guidelines here useful. It is also aimed at those who are not building a corpus, but who need to know something about the issues involved in the design of corpora in order to choose between available resources and to help draw conclusions from their studies.
