## Equity and Quality in Education Supporting Disadvantaged Students and Schools

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

## **Oxford English for Careers: Tourism 2: Student's Book**

The demands of today's society for greater specialization have brought about a profound transformation in the humanities, which are not immune to the competitive pressure to meet new challenges that are present in other sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope of disciplines such as the sciences, professions, or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation, lexicology and terminology, and ICT research and teaching of specialized languages.

## **Technology 1**

Teaching English for Tourism initiates a sustained academic discussion on the teaching and learning of English to tourism professionals, or to students who aspire to build a career in the tourism industry. Responding to a gap in the field, this is the first book of its kind to explore the implications of research in English for tourism (EFT) within the field of English for specific purposes. This edited volume brings together teachers and researchers of EFT from diverse national and institutional contexts, focusing on connecting current research in EFT contexts to classroom implications. It considers a wide range of themes related to the teaching of EFT, including theoretical concepts, methodological frameworks, and specific teaching methods. The book explores topics relating to the impact of changing technologies, the need for cultural understanding, and support for writing development, among others. Teaching English for Tourism explores this growing

area of English for specific purposes and allows for researchers and practitioners to share their findings in an academic context. This unique book is ideal reading for researchers, post-graduate students, and professionals working in the fields of English language teaching and learning.

## **The Scorpion God**

## **Oxford English for Careers Technology for Engineering and Applied Sciences: Student Book**

This volume responds to the growing need for intercultural approaches to teaching and learning languages. The central premise is that the aim of intercultural language teaching and learning is to foster effective communication and effective learning in spaces between cultures in order to prepare learners for global citizenship, but that the corresponding models and methods must emerge from the bottom-up in order to meet the needs of each unique context. The book offers a collection of successful experiences rooted in praxis. It shares the activities, methods, models, and approaches which have been developed within specific contexts. Thus, it offers an example of how to adopt an “intercultural perspective” in teaching and learning. The editors and contributors share the conviction that the experiences detailed here can be informative to the realities of all readers in the same way that their own practices have been informed by others.

## **Multiple Voices in Academic and Professional Discourse**

This book explores the phenomenon of suicide tourism. As more countries legally permit assisted suicide and do not necessarily bar the participation of non-residents, suicide tourism is becoming a larger and more complex global issue. The book sets out the parameters for future debate by first contextualizing the practice and identifying its treatment under international and domestic law. It then analyses the ethical ramifications, weighing up where the state's responsibilities lie, and addressing the controversial roles of accompanying persons. The book goes on to offer a sociological and cultural analysis of suicide tourism, including interviews with the various stakeholders: policy makers, assisted suicide associations, and medical and patients' organizations, in Switzerland, Germany, France, Italy, and the UK. The book concludes with a summary of the legal, ethical, political, and sociological dimensions of suicide tourism.
