Decentralization of Forest Administration in Indonesia

Sentenced to sixty-five years in a Texas prison, Damon West once had it all. He came from a great family, in a home full of God, love, support, and opportunities to reach any goal. A natural born leader, an athlete with good looks and charm, he appeared to be the all-American kid pursuing his dreams. Underneath this facade, however, was an addict in the early stages of disease. After suffering childhood sexual abuse by a babysitter at the age of nine, Damon began putting chemicals into his body to alter the way he felt. Once he was introduced to methamphetamines, however, he became instantly hooked—and the lives of so many innocent people would forever be changed by the choices he made in order to feed his insatiable meth habit. After a fateful discussion during his incarceration with a seasoned convict, Damon had a spiritual awakening. He learned that, like a coffee bean changing with the application of heat and pressure, he was capable of changing the environment around him. Armed with a program of recovery, a renewed faith, and a miraculous second chance at life, Damon emerged from over seven years of prison a changed man. His story of redemption continues to inspire audiences today.

"Kalau salesman sudah pintar, distributor harus lebih pintar. Jangan sampai penjualan salesman melebihi target, tetapi akhirnya membuat bangkrut distributor Anda. Sukses pemasaran suatu produk selain terletak pada banyaknya produk, yang dibuat produsen, sebenarnya terletak juga di pundak distributor; bagaimana distributor bisa menjualnya di saat daya beli konsumen menurun sekalipun. Distributor bisa bertahan bersama principal selama berpuluh-puluh tahun, kuncinya karena distributor bisa menerjemahkan kemauan principal. Tidaklah mudah mengikuti kemauan principal kalau distributor tidak memiliki manajemen yang baik. Distributor sering kali berangkat dari trader (pemilik toko) sehingga dalam kerja sama dengan principal, distributor menganut manajemen toko. Untuk meningkatkan penjualan, tentunya principal menginginkan manajemen distributor menjadi lebih baik. Principal berusaha membantu memperbaiki distributor trader menjadi distributor profesional. Inilah tantangan principal dan sekaligus peluang bagi trader (pemilik toko) untuk mengembangkan distributornya menjadi lebih baik. Buku ini sangat bermanfaat bagi Anda yang ingin menggeluti bisnis distributor karena:

- Membahas cara mengelola dan memberdayakan distributor secara komplet dan efektif sehingga dapat dijadikan panduan praktis para marketing manager, sales manager, dan sales supervisor yang berada di bawah payung principal serta para sales manager, sales supervisor dan salesman di bawah payung distributor.
- Berisi prospek bisnis distributor, strategi mendapatkan principal, konsep pemasaran dan strategi distribusi, manajemen piutang penjualan, audit distributor, manajemen rute kunjungan, manajemen performance sales force, sistem remunerasi sales force, dan delivery order system.
- Berisi cara menghitung sewa gudang per unit produk berdasarkan activity based costing dan menetapkan key performance indicator distribusi distributor, strategi distributor

mengelola pelanggan, sampai dengan SOP (standard operating procedures) distributor."

""Mengelola usaha tanpa mengetahui laba atau rugi, sama dengan seseorang yang berkendara tanpa panel dashboard yang berfungsi. Kita tidak tahu sisa bahan bakar dalam tangki, tidak tahu berapa kilometer kita sudah berkendara sehingga kita tidak tahu kapan harus ganti oli atau harus menjalani servis rutin. Memang ajaib, kenyataannya, banyak usaha kecil yang bisa terus bertahan (dan bahkan berkembang) tanpa tahu laba rugi usaha mereka. Sementara itu, ada juga pengusaha yang bingung, sekalipun penjualan dan produksi terus berjalan dengan baik, tetapi pemilik harus terus-menerus menambah dana segar ke dalam perusahaan. Dalam hati, pemilik bertanya-tanya apakah sebenarnya perusahaan ini menguntungkan? Hal ekstrim yang lain, ada juga usaha yang hancur (collapse) karena pemilik ternyata telah mengambil uang lebih dari laba yang bisa dihasilkan oleh perusahaan tersebut. Yang berarti, pemilik tanpa sadar, secara perlahan terus mengurangi modal usaha perusahaan mereka sendiri. Andai para pemilik ini tahu laba rugi usaha mereka, mereka akan tahu apa yang seharusnya mereka lakukan. Dalam buku ini, penulis menyajikan kasus komprehensif bagaimana mencatat transaksi penjualan, pembelian, pembayaran beban, dan lain sebagainya hingga akhirnya pemilik usaha dapat menghitung laba rugi usaha. Sebagai bonus, penulis juga menyajikan ragam laporan internal dengan memanfaatkan tabel pivot Excel, seperti laporan penjualan per salesman (sehingga mudah bagi pengelola usaha untuk menentukan komisi setiap sales) dan laporan laba kotor per produk (sehingga pengelola usaha tahu, produk mana yang sebenarnya menguntungkan, dan ada tidak produk yang sebenarnya tidak menguntungkan alias merugikan).""

Guerrilla Prince: The Untold Story Of Fi

This review lays out a research perspective on earnings quality. We provide an overview of alternative definitions and measures of earnings quality and a discussion of research design choices encountered in earnings quality research. Throughout, we focus on a capital markets setting, as opposed, for example, to a contracting or stewardship setting. Our reason for this choice stems from the view that the capital market uses of accounting information are fundamental, in the sense of providing a basis for other uses, such as stewardship. Because resource allocations are ex ante decisions while contracting/stewardship assessments are ex post evaluations of outcomes, evidence on whether, how and to what degree earnings quality influences capital market resource allocation decisions is fundamental to understanding why and how accounting matters to investors and others, including those charged with stewardship responsibilities. Demonstrating a link between earnings quality and, for example, the costs of equity and debt capital implies a basic economic role in capital allocation decisions for accounting information; this role has only recently been documented in the accounting literature. We focus on how the precision of financial information in capturing one or more underlying valuation-relevant constructs affects the assessment and use of that information by capital market participants. We emphasize that the choice of constructs to be measured is typically contextual. Our main focus is on the precision of earnings, which we view as a summary indicator of the overall quality of financial reporting. Our intent in discussing research that evaluates the capital market effects of earnings quality is both to stimulate further research in this area and to encourage research on related topics, including, for example, the role of earnings quality in contracting and stewardship.

Since the collapse of Soeharto's New Order regime in May 1998, Indonesia's national, provincial, and district governments have engaged in an intense struggle over how authority and the power embedded in it, should be shared. How this ongoing struggle over authority in the forestry sector will ultimately play out is of considerable significance due to the important role that Indonesia's forests play in supporting rural livelihoods, generating economic revenues, and providing environmental services. This book examines the process of forestry sector decentralization that has occurred in post-Soeharto Indonesia, and assesses the implications of more recent efforts by the national government to recentralize administrative authority over forest resources. It aims to describe the dynamics of decentralization in the forestry sector, to document major changes that occurred as district governments assumed a greater role in administering forest resources, and to assess what the ongoing struggle among Indonesia's national, provincial, and district governments is likely to mean for forest sustainability, economic development at multiple levels, and rural livelihoods. Drawing from primary research conducted by numerous scientists both at CIFOR and its many Indonesian and international partner institutions since 2000, this book sketches the sectoral context for current governmental reforms by tracing forestry development and the changing structure of forest administration from Indonesia's independence in 1945 to the fall of Soeharto's New Order regime in 1998. The authors further examine the origins and scope of Indonesia's decentralization laws in order to describe the legal-regulatory framework within which decentralization has been implemented both at the macro-level and specifically within the forestry sector. This book also analyses the decentralization of Indonesia's fiscal system and describes the effects of the country's new fiscal balancing arrangements on revenue flows from the forestry sector, and describes the dynamics of district-level timber regimes following the adoption of Indonesia's decentralization laws. Finally, this book also examines the real and anticipated effects of decentralization on land tenure and livelihood security for communities living in and around forested areas, and summarizes major findings and options for possible interventions to strengthen the

forestry reform efforts currently underway in Indonesia.

Asia and the Pacific have become the growth engine of the world economy with the contribution of two-third of the global growth. The book discusses current issues in economics, business, and accounting in which economic agents, as individuals, entrepreneurs and professionals, as well as countries in the Asia and Pacific regions compete and collaborate with each other and with the rest of the globe. Areas covered in the book include economic development and sustainability, labor market competition, Islamic economic and business, marketing, finance, accounting standard compliances, and taxation. It will help shed light on what business and economic scholars in regions have done in terms of research and knowledge development, as well as the new frontiers of research that have been explored and opening up. Earnings Quality

Productivity in the U.S. Services Sector

The services industries—which include jobs ranging from flipping hamburgers to providing investment advice—can no longer be characterized, as they have in the past, as a stagnant sector marked by low productivity growth. They have emerged as one of the most dynamic and innovative segments of the U.S. economy, now accounting for more than three-quarters of gross domestic product. During the 1990s, 19 million additional jobs were created in this sector, while growth was stagnant in the goods-producing sector. Here, Jack Triplett and Barry Bosworth analyze services sector productivity, demonstrating that fundamental changes have taken place in this sector of the U.S. economy. They show that growth in the services industries fueled the post-1995 expansion in the U.S. productivity and assess the role of information technology in transforming and accelerating services productivity. In addition to their findings for the services sector as a whole, they include separate chapters for a diverse range of industries within the sector, including transportation and communications, wholesale and retail trade, and finance and insurance. The authors also examine productivity measurement issues, chiefly statistical methods for measuring services industry output. They highlight the importance of making improvements within the U.S. statistical system to provide the more accurate and relevant measures essential for analyzing productivity and economic growth.

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two-semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

The Change Agent

In *Authoritarian Modernization in Indonesia's Early Independence Period*, Farabi Fakhri offers a historical analysis of the foundational years leading to Indonesia's New Order state (1966-1998) during the early independence period. The study looks into the structural and ideological state formation during the so-called Liberal Democracy (1950-1957) and Sukarno's Guided Democracy (1957-1965). In particular, it analyses how the international technical aid network and the dominant managerialist ideology of the period legitimized a new managerial elite. The book discusses the development of managerial education in the civil and military sectors in Indonesia. The study gives a strongly backed argument that Sukarno's constitutional reform during the Guided Democracy period inadvertently provided a strong managerial blueprint for the New Order developmentalist state.
