The Devil's Punchbowl

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis
"McQuarrie's book is extremely well written, the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark Kearley, Florida State University
This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-new illustrations, it is available in a soft-cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series of descriptive chemistry Interchapters, a Student Solutions Manual, and an optional state-of-the-art Online Homework program. For adopting professors, an Instructor's Manual and a CD of the art are also available.

How To Build & Power Tune Weber & Dellorto DCOE, DCO/SP & DHLA Carburetors 3rd Edition

As long as the human species has existed, men and women have had to contend with the unpredictable forces of nature. Geographer Barry A. Vann brings a unique perspective to this age-old struggle in this illuminating overview of human population shifts and their precarious relationship with climate change and geography. Vann takes us on a journey along the migration routes of the earliest modern humans and tells why our ancestors chose to settle down in places that can be best described as natural utopias. In the religiously oriented worldview of ancient peoples, such places took on a sacred aura of divine favor. Similarly, destructive events such as volcanic eruptions and earthquakes were interpreted as expressions of divine wrath. Vann shows how the ancient texts of the Bible and the Qur'an offer glimpses of past climates that were distinctly different from the climate of our time. He also discusses the rise of technology as a means of controlling the threatening features of the natural world. Though technology has enabled humanity to cope with hostile climates, it has also created a false sense of security. Vann notes that population clusters are increasing in dangerous areas and that no technology can protect vulnerable groups from major-category hurricanes, tornadoes, or earthquakes. Finally, he considers our current anxieties regarding global warming, pointing out that this focus has obscured a good deal of historical and geological evidence for a return of another ice age. The Forces of Nature offers a challenging perspective on the precarious balance between fragile human communities and their often-threatening environments.

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, The Victory Motorcycle.

Fundamentals of Freehand Longarm Quilting

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Neuropeptides and peptide hormones represent the largest class of chemical messengers that transmit information from one cell to another. In this review, several decades of research on peptides in cell-cell signaling are summarized, with a focus on neuropeptide discovery, biosynthesis, and function. In addition to covering the well-studied aspects of neuropeptides, emerging concepts are discussed, including classical versus non-classical neuropeptides and direct versus indirect neuropeptides. Other potential functions for peptides in intercellular and intracellular signaling are also discussed.

Two thousand years after the Jewel of Peace ended the devastating Wizard Wars, chaos stalks the land again. The tyrant Broman lusts to take up the Stone and twist the world into his personal plaything. The Wizard Ord desires to find the Spirit that can control the weapon and manipulate it to his will. It falls to the humble mountaineer Geret to take up the mantle of a millenia-old battle and tame the Spirit he unwittingly inherits. As war savages the land anew and pits nation against nation, hope hangs by the thinnest thread; a mountaineer with Spirit against a centuries-old Wizard willing to use the Stone to smash the world asunder.
