- Conduct operational searches in buildings, vehicles, ships, and planes. - Train your dog for the specialized work of mine detection. In the high stakes realm of explosive detection, where even the smallest mistake can have fatal consequences, the margin of error is zero. Well trained dog-handler teams can play a key role in explosive detection, but only if their training is top notch. Dr. Resi Gerritsen and Ruud Haak have worked with police departments around the world to help them establish and improve their K9 explosive detection training programs, and in this book they share their expertise with handlers and trainers looking to enhance their own performance. They teach how to pick the right dog for explosive detection work, how to train the dog to detect explosives, and how to properly execute a variety of training and operational searches. They also provide some of the background knowledge you'll need about common explosives and the many factors that can influence a K9's work. Along with essential health and safety precautions for you and your dog, you'll also learn how to test and certify dogs and handlers to ensure excellent performance in the field.

The Dog Who Knew Too Much

When the complexities of modern living demanded that, for his own protection as well as his master's convenience, the dog be made controllable, the average owner sought advice from the most available source, which was, too often, some local dog-show exhibitor. Not realizing that, excepting a few praiseworthy individuals, these exhibitors were only

superficially concerned with the qualities of use and companionship, an unfortunate dog owner would accept the sight of trophies or ribbons as the credits of an expert. Growing numbers of people and dogs continued to emphasize the advantages of proper dog-behavior and when, in 1935, The American Kennel Club instituted its obedience trials, the competition necessary to focus attention on results and improvement of methods was provided. And something else was observed. It was evident that thorough obedience training does more than assure a dog's response to his master's command; capacities for learning and emotional stability could be increased and integrated as permanent qualities of character. Recently, leading magazines of both general and specialized nature have made the public aware of the trained dog's potential, and of the recreational possibilities of dog training as a hobby. Interest in dog-training classes and other activities where dogs are dignified by usefulness, rather than merely looked at, is evidence that the dog-training public has outgrown the "make a game" and "tid-bit tossing" techniques that, by not being founded on positive and proper motivations, demonstrate the inadequacy of the master, thus promoting failure of response at those times when control is most needed, as well as contributing to the dog's feeling of insecurity. Dog owners of perspective have come to want the type of obedience upon which a blind person might stake his life, and the emotional stability that is vital to dogs in the presence of small, unpredictable children. Learn how to: Master the basic skills and common procedures every decoy needs. Read dogs accurately through seven key factors. Stimulate and reward useful forms of K9 aggression. A good decoy is a K9 trainer's most valuable tool. A good decoy can make a poor dog better, a mediocre dog good, and a good dog excellent. A poor decoy, on the other hand, can have devastating effects, ruining even a good dog. Stephen Mackenzie, professor of animal science and deputy sheriff with more than 30 years' experience training and handling police dogs, shows you how to master the art of being a decoy in this revised and updated new edition. You'll learn how to communicate effectively with your canine partner and how to stimulate specific types of aggression in the dog in a safe, positive way. This guide is essential reading for all decoys, including both instructors and students. It will improve the effectiveness of all K9 personnel, handlers, and trainers. How To Achieve Precision Tracking With Your Dog

Modern police officers have an impressive number of tools at their disposal, all of which take some experience to deploy properly. Of all these tools, none is more mysterious and poorly understood than the dog. And while a K9 can be useful in subduing a suspect, 90 per cent of its work involves its nose, not its teeth. This book helps officers outside the K9 unit understand the proper use of dogs in police investigations. Stephen Mackenzie describes the different situations in which a K9 can be helpful, how

THE TOP TEN BESTSELLER: The Inspirational Life of Finn, Britain's Bravest Dog, Winner of the 2017 Daily Mirror Animal Hero of the Year Award Hertfordshire, October 5th 2016. At around 2 a.m., PC Dave Wardell and his dog, PD Finn, were trying to apprehend a robbery suspect when he turned around and attacked them. Finn was stabbed with a ten-inch-bladed knife, both through his chest, via his armpit and then - the knife bound for Dave - through the top of his head. Finn no doubt saved Dave's life, but the race was on to try and save Finn's. Dave Wardell's heartfelt memoir charts an incredible journey of friendship and loyalty. It is a celebration of the bond between one man and his dog, from when Dave collected Finn from his kennels at just nine months old, all the way through to Finn's recent and hard-earned retirement. The book charts the career of a highly trained, highly decorated dog. In his time on the job Finn tracked offenders of all kinds; found missing children; tackled

Tactical Tracker Teams was written to help K-9 handlers and tactical units to prepare and execute a high risk manhunt safely and effectively. Based upon personal experience and years of teaching, Schettler offers realistic recommendations and practical guidelines to assist in the planning and preparation for a fugitive hunt. High risk trailing is a team operation—no matter if conducted by an assigned tactical tracking team or a hastily assembled patrol team. This book will benefit everyone involved with the tracking team, including handlers, cover officers, supervisors, operational commanders and support personnel. Tactical Tracker Teams is not a “this is my way, this is the only way” instructional book. Schettler admits making mistakes—some that could have cost him his life. However, those mistakes have made him a better trainer and the lessons learned are readily and openly shared in this book.

In 1953, there were zero canine programs on any American police force. In 1989, there were more than 2,000 programs with over 7,000 police handler dog teams. In 1953, the Royal Canadian Mounted Police had the nation's only program with 20 teams but in 1989 there were 46 programs with 300 teams. These are dramatic program expansions. There have been controversial issues of using dogs; the pros and cons of using dogs for specialized functions are thoroughly analyzed in this book. Clearly identified are the elements to be assessed as a prelude to implementing a canine patrol unit, with the essential features critical to a unit's organization, operation, and ultimate success.

K9 Personal Protection

Ronin was a modern police bloodhound who worked the streets of California hunting criminals and missing persons for 10 years. He was the first full-time municipal police bloodhound in the state of California. What can I write about my bloodhound, Ronin without giving away too much of the book? That is really a good question. I have to write just enough to get you interested, I suppose. So let's seehmmmm Well, Ronin was a Bloodhound and uncommon one at that. His real AKC name was Bo's Mongo Dog. I got him at about 11 weeks of age from Susanville, CA, with the intention of training him to be a man hunter. The problem was, I had no idea what I was looking for and had no experience with bloodhounds. So, perhaps, in a way, Ronin found me. We seemed to bond right off the bat and there was something about him that I knew was really special from the beginning. I did not know it then, but he was going to change my life forever. Ronin was what is referred to as a "Red" bloodhound with black accents on the muzzle and around the eyes. Bloodhounds can also be found in a light brown color called "liver" and "black & tan"; the latter being the most well known. Unlike many of his brethren, Ronin was relatively tight faced with shorter ears than normal. His skin was not quite as loose either. The breed standard for show dogs nowadays is

Get Free Police K9 Tracking A Guide For Training Deploying The Police Tracking Dog

a really baggy faced dog with drooping eyes, jowls, and skin that weighs in at about 100-125 pounds. In his hay day, Ronin weighed in at about 105. Simply based on his appearance, Ronin would probably never win a dog show but that was never his job to begin with. He was a working dog and his lean, tight frame actually helped his career from a physical standpoint. History tells us that the Bloodhound is the ultimate nose vacuum for human scent and that they can often hunt down people who have been missing for many days. The line between the myths and the facts about Bloodhounds has always been a little fuzzy. The simple truth is that the bloodhound was a dog bred for a purpose at one time and that purpose was to hunt animals and later humans. Along the way, the breed encountered the show ring and things began to change a bit. The working bloodhound was considered a tracking dog. This title has recently changed to what is known as "Trailing." Trailing is a descriptive word for the art of allowing a dog to follow human scent wherever human scent might be, on the ground or in the air. It can also be taken one step further by adding scent discrimination to the equation. Each and every animal, human or otherwise, produces a distinctive odor based on species and other sub-determining factors such as infirmity, relative age, sex, and certain individual identifying traits. The amount of odor produced is dependant upon several primary factors, mental condition such as fear or anger, exertion, and relative health issues. Because of scent discrimination and the tenacity for the job, a good trailing bloodhound can be an incredible asset in any criminal or missing person investigation as long as it is used in accordance with its capabilities. Ronin

Get Free Police K9 Tracking A Guide For Training Deploying The Police Tracking Dog

turned out to be one of those really good assets and was used on hundreds of real cases throughout California and later, other States as well. Ronin also turned out to be quite a celebrity and because of his work we often found ourselves on the evening news and, occasionally, even CNN. We worked some very interesting cases over the years, many of which I write about in Red Dog Rising. Turn the page and try one on for size!

Tracking originated with man's need for food; he needed to understand what he was following and what the rewards would be if he was successful. Little has changed over time about the terms of tracking. We still track game for sport and food, but we have also found other uses for tracking. Border police patrol to stop illegal immigrants from entering their country; the military tracks down wanted terrorists or enemy forces. Tracking has become a military skill. In the SAS Tracking Handbook, former SAS soldier and British Empire Medal (BEM) award-winner Barry Davies teaches not only how to survive in the outdoors with the skills of tracking, but how to use these skills from a military standpoint. Included in this book are many helpful tips on topics including: The types of dogs used for tracking. Traps for catching wild animals. Modern military tracking. Using your surroundings to your advantage. And much more. The success or failure of the modern tracker is dependent on the personal skills of the individual tracker. Training is vital in learning tracking skills, and continuous exercise the best way to interpret signs. These skills are rarely found, but they remain hidden deep within all of us. So whether you're already a skilled tracker or a novice in the field, the SAS Tracking Handbook will be your guide to mastering this old and respected art.

The Tao of Trailing is not simply an advanced training manual on working a trailing/tracking dog but more importantly it is Jeff's philosophical approach to working with dogs in general. K9 work is more than a matter of learning rules or theory. One cannot master K9 deployment by a training program alone. Like martial arts, working a dog takes a certain style or panache; an individual component unique not only to the handler but the dog alike and in partnership. The relationship between a handler and his or her K9 is formed with blood, sweat, tears, and a lot of time. And of course, Jeff will impart to the reader his love and passion: The Hunt!

pets or working dog. Use proven techniques to: - Train your puppy with basic exercises to prepare for future obedience training. - Correct common problem behaviors, such as barking, bolting, and chewing. - Progress from basic to advanced exercises to ensure your dog is always learning. Obedience is the foundation of any reliable, well-trained dog. Without obedience, working dogs are ineffective in operations and pet dogs can be annoying and possibly a danger to themselves or others. In K9 Obedience Training, certified animal behavior consultant and veteran search and rescue (SAR) dog handler and trainer Susan Bulanda shares the secrets of building an effective obedience training program. SAR dogs need "thinking" obedience: they sometimes need to exercise intelligent disobedience in the field. You can use the same training program for any working or pet dog. For trainers who demand the best obedience training for future working dogs, Susan's techniques lay the groundwork for success. And pet owners who want to help their dog be easy to be around will find lots of training tips and exercises too, along with straightforward advice on proper handling, grooming, and teaching simple tricks.

Professional Schutzhund trainers and instructors Resi Gerritsen and Ruud Haak bring their years of knowledge and experience together in this book, K9 Schutzhund Training. Appropriate for training dogs for both protection work and for international sport dog certification and competition, this is designed to be an especially practical training method. Founded on the idea that effective training can only happen when a good bond and good communication exist between handler and dog, this method allows individual handler-dog teams to progress at their own speed. Different breeds and individual dogs may require different lengths of time and repetition to effectively learn to perform the exercises contained in this book. While many trainers claim a dog can be trained to perform to this level in only a few weeks, the authors show that effective, long-lasting results can only be achieved with time and patience. The three sections of this book focus on tracking, obedience and protection.

Two brutal murders, a menacing band of poachers, and a fearsome creature on the loose in the mountains plunge Mattie Cobb and her K-9 partner Robo into a sinister vortex. An explosion outside a community dance sends Mattie Cobb and Cole Walker reeling into the night, where they discover a burning van and beside it the body of outfitter Nate Fletcher. But the explosion didn't kill Nate--it was two gunshots to the heart. The investigation leads them to the home of rancher Doyle Redman, whose daughter is Nate's widow, and the object of one of their suspect's affection. But before they can make an arrest, they receive an emergency call from a man who's been shot in the mountains. Mattie and Robo rush to the scene, only to be confronted by the ominous growl of a wild predator. As new players emerge on the scene, Mattie begins to understand the true danger that's enveloping Timber Creek. They journey into the cold, misty mountains to track the animal--but discover something even more deadly in Tracking Game, the fifth installment in Margaret Mizushima's Timber Creek K-9 mysteries.
