Views on Migration in Sub-saharan Africa

This book summarizes and integrates theory and research on adolescents from a diversity of ethnic, economic, and geographic contexts. The book aims to present a more balanced picture of these understudied and misunderstood adolescents by focusing on positive, healthy development.

Global Monitoring Report 2013

The twentieth century bequeathed us a fabulous gift: thirty more years of life on average. Supersized life spans are going to radically alter society, and present an unprecedented opportunity to change our approach not only to old age but to all of life's stages. The ramifications are just beginning to dawn on us. yet in the meantime, we keep thinking about, and planning for, life as it used to be lived. In *A Long Bright Future*, longevity and aging expert Laura Carstensen guides us into the new possibilities offered by a longer life. She debunks the myths and misconceptions about aging that stop us from adequately preparing for the future

both as individuals and as a society: that growing older is associated with loneliness and unhappiness, and that only the genetically blessed live well and long. She then focuses on other important components of a long life, including finances, health, social relationships, Medicare and Social Security, challenging our preconceived notions of “old age” every step of the way.

Adolescent Diversity in Ethnic, Economic, and Cultural Contexts

Rural Poor in Rich Rural Areas

About half of the region's poor live in cities, and policy makers across Latin America are increasingly interested in policy advice on how to design programmes and policies to tackle poverty. This publication argues that the causes of poverty, the nature of deprivation, and the policy levers to fight poverty are, to a large extent, site specific. It therefore focuses on strategies to assist the urban poor in making the most of the opportunities offered by cities, such as larger labour markets and better services, while helping them cope with the negative aspects, such as higher housing costs, pollution, risk of crime and less social capital.

Global Monitoring Report (GMR) 2013 provides an annual assessment of progress towards the Millennium Development Goals (MDGs) and addresses this year's theme of rural-urban dynamics and the MDGs.

Rationalizing Rural Area Classifications for the Economic Research Service

Addressing rural youth migration at its root causes: A Conceptual Framework

Teaching with Poverty in Mind

Library of Congress Subject Headings

Distress migration is particularly acute among rural youth. Agriculture and rural development are central to the rate of rural out-migration to urban areas. The agricultural sector needs to engage youth in order to increase global food production. In doing so, agricultural transformation can balance out-migration from

rural areas and thus contribute to stable growth. This document presents the conceptual framework for distress migration of rural youth. The framework focuses on the migration of rural youth (aged 15–24), who account for a large proportion of migrants and are a particularly vulnerable group. The framework comprises three sections: 1. Analysis of the main factors determining the propensity of rural youth to migrate; 2. Assessment of the likely impacts of distress migration of rural youth in terms of rural development for local areas of origin; 3. Illustration of the most promising policies and programmes to reduce distress migration of rural youth and maximize its developmental benefits for the communities of origin.

Urban Poverty and Party Populism in African Democracies

Worldwide child and youth poverty remain the biggest barrier to achieving a better life in adulthood. Progress in lifting children out of poverty in the last decades has been slow and limited in the developing world, while the recent global economic crisis has exacerbated child poverty, youth unemployment, and social exclusion in many developed countries. This book critically examines the long-term consequences of growing up poor, the close linkages between deprivation and human rights violations in childhood and adolescence, and their effects on labor market entry and future career in a number of developing and developed countries. Drawing on multiple disciplinary perspectives, it makes a forceful case for the eradication of child poverty to take center stage in the Sustainable

Development Goals.

A Long Bright Future

Rural Child Welfare Practice

Poverty & Human Resources Abstracts

The U.S. Department of Agriculture Economic Research Service (USDA/ERS) maintains four highly related but distinct geographic classification systems to designate areas by the degree to which they are rural. The original urban-rural code scheme was developed by the ERS in the 1970s. Rural America today is very different from the rural America of 1970 described in the first rural classification report. At that time migration to cities and poverty among the people left behind was a central concern. The more rural a residence, the more likely a person was to live in poverty, and this relationship held true regardless of age or race. Since the 1970s the interstate highway system was completed and broadband was developed. Services have become more consolidated into larger centers. Some of the traditional rural industries, farming and mining, have prospered, and there has

been rural amenity-based in-migration. Many major structural and economic changes have occurred during this period. These factors have resulted in a quite different rural economy and society since 1970. In April 2015, the Committee on National Statistics convened a workshop to explore the data, estimation, and policy issues for rationalizing the multiple classifications of rural areas currently in use by the Economic Research Service (ERS). Participants aimed to help ERS make decisions regarding the generation of a county rural-urban scale for public use, taking into consideration the changed social and economic environment. This report summarizes the presentations and discussions from the workshop.

Urban Schools

Master's Thesis from the year 2015 in the subject Politics - International Politics - Topic: Development Politics, , language: English, abstract: In developing countries like Ethiopia rural-urban migration affects socio-economic realities in both urban and rural areas. This study aims at identifying the major causes and consequences of the movement of people from rural to urban areas. To achieve the objective 282 migrant household heads were selected purposively from four Kebeles of the town. Both primary and secondary data were employed and were analyzed both qualitatively and quantitatively by using SPSS version 17th. Structured questionnaires and FGD were used on the demographic and socio-economic characteristics of migrant households. Most of the migrants move to the town

alone. They had some information about the town and the decision of their migration is mostly made by themselves. However, most of them migrated decide to migrate not in planned way. A greater number of the migrants are young adults, males, and unmarried and had some form of education before they decided to migrate. There are many causes for the movement of the people to the town. Among them the search for job, to gain education and training, and problem related with land and agricultural productivity was the major one. Many of the migrants encountered problems at the initial period of adjustment and adaptation and even currently. In line with this, some useful points of recommendations for effective urban management and rural development activities are suggested.

Mobile Africa

Rural Poverty Alleviation

Natural Resource Bureaucracy and Rural Poverty

Africans arriving by rickety fishing boats to the Canary Islands, risking the passage across the Straits of Gibraltar or washed up on the Italian island of Lampedusa are

familiar examples of the recent growth in migration from Africa to Europe. There is a dark side of migration in human trafficking, but the picture of a continent on the move also includes highly skilled professionals from Nigeria and Ghana who seek employment in universities and other professions in South Africa. On the positive side migrant remittances are a major source of income in many sub-Saharan African countries, helping to sustain the lives of poor home communities. A major challenge now facing sub-Saharan Africa is how to attract skilled emigrants back for national development.

International Migration

What is poverty and how do we measure it? What is the link between inequality and poverty? What can governments do to alleviate poverty and inequality? Does economic growth reduce poverty in the long run? These are some important research questions that are addressed in this book. It brings together important researchers and university professors to offer some analytical insights into the field of poverty, inequality, and public policies. Using quantitative and qualitative research methods, the authors examine issues relating to (a) contextual, academic, and cognitive differences between rural and urban poverty; (b) the impact of inequality on poverty; (c) theoretical considerations and empirical findings about poverty and inequality with a special reference to Croatia and Pakistan; (d) the role of trade facilitation in reducing poverty in South Asia; and (e)

the impact of trade liberalization on economic growth and poverty implications with a special reference to Sri Lanka. The reader of this book will find it concise, with a clearly defined research methodology and findings, and easy to understand. Benefiting of recent statistical data and practical experience from various countries around the world, the findings and conclusions might be helpful to academia and policy makers to find better answers to poverty and inequality in the future.

Migration in Sub-Saharan Africa

Despite having a number of potential attributes (such as being English-speaking, having poverty levels below that of comparable countries and a reasonably well-educated labour force), Jamaica's economic history is marked by the paradoxes of low growth in GDP and high employment despite high investment and important achievements in poverty reduction. This publication seeks to examine these issues, and topics discussed include: poverty reduction and income inequality; whether Jamaica's GDP growth has been underestimated; policy options for reducing the fiscal and debt burden, revitalising the financial system; improving education outcomes, tackling the economic costs of crime, and improving international competitiveness.

making poor haitians count

Youth Migration and Poverty Alleviation

Sustainable Growth and Economic Development

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic

achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals

- * What poverty is and how it affects students in school;
- * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain);
- * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and
- * How to engage the resources necessary to make change happen.

Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

Rural and Urban Youth Programs

Poverty, Inequality and Policy

'The greatest advantage of this book is that the analyses are undertaken from the viewpoint of standard economics, not that of political economy. . . this book is valuable for readers who wish to analyze the Malaysian economy from the viewpoint of standard economics. The book provides full data concerning every field of the Malaysian economy, from macroeconomic indices to those of labor, education, and so on, the analyses using standard techniques in econometrics and concise reviews of related policies. In particular, the analyses identifying the factors of the past high growth of the Malaysian economy in the first half of the book are very informative and are outstanding among the literature in this field. . . the book contains valuable analyses of Malaysia which accurately reflect the title. This book is suitable for economists who are newcomers to the Malaysian economy, and is also recommended for specialists on the Malaysian economy, who may be bogged down in the depths of the Malaysian political economy and wish to refresh their brains by seeing this "unique" country analyzed in the same manner as other "ordinary" countries.' - Satoru Kumagai, *The Developing Economies*

Thesaurus of Sociological Indexing Terms

In 'International Migration' a multinational, multi-disciplinary group of scholars offer

a comprehensive, up-to-date survey of global patterns of international migration which shows that the phenomenon is rooted in the expansion and consolidation of global markets rather than poverty or population growth.

The Cause and Consequences of Rural Urban Migration

Rural poverty remains a crucial part of the poverty picture in Argentina. This paper used a rural dataset collected by the World Bank in 2003. Findings show that extreme income poverty in rural areas reached 39 percent of the people or 200,000-250,000 indigent families. These families tend to: be large, and young, and to escape from poverty as they mature and children leave the household (life cycle); live largely in dispersed areas where basic service provision is often weak and delivery is difficult (in particular school attendance beyond 11 years of age falls off very rapidly compared with grouped rural or urban areas); and be more likely to be small landholders than landless laborers. The structure of poverty in rural Argentina shows that larger households are poorer than smaller households, female-headed households are poorer than male-headed households, young households/household heads are poorer than older households/household heads, the poor tend to work more in the informal sector, and a greater share of those engaged in agriculture are poor. However, poverty is by no means strictly an agricultural problem. Furthermore, the deepest poverty is among the poorly educated and young household heads with children. Without interventions to

improve their opportunities and assets, their plight is likely to worsen.

Homelessness, Health, and Human Needs

This anthology deals with the complexity, variety and experience of all the forms of mobility we witness today in Sub-Saharan Africa. Three sets of issues are being discussed. This book intends to turn the whole notion of mobility as a supposedly rupturing phenomenon on its head, emphasizing that rather through travelling connections are established and continuity is experienced. We are challenged to delve into the traveller's mind, to think and follow their multi-spatial livelihoods and to explore what it means to people if they move in a variety of spaces.

Migration, Development and Poverty Reduction in Asia

America's rural areas have always held a disproportionate share of the nation's poorest populations. Rural Poverty in the United States examines why. What is it about the geography, demography, and history of rural communities that keeps them poor? In a comprehensive analysis that extends from the Civil War to the present, Rural Poverty in the United States looks at access to human and social capital; food security; healthcare and the environment; homelessness; gender roles and relations; racial inequalities; and immigration trends to isolate the

underlying causes of persistent rural poverty. Contributors to this volume incorporate approaches from multiple disciplines, including sociology, economics, demography, race and gender studies, public health, education, criminal justice, social welfare, and other social science fields. They take a hard look at current and past programs to alleviate rural poverty and use their failures to suggest alternatives that could improve the well-being of rural Americans for years to come. These essays work hard to define rural poverty's specific metrics and markers, a critical step for building better policy and practice. Considering gender, race, and immigration, the book appreciates the overlooked structural and institutional dimensions of ongoing rural poverty and its larger social consequences.

GLOBAL ISSUES ON RURAL AND URBAN CONFLICT VIOLENCE IN THE 21ST CENTURY

Abstract: This paper analyzes poverty in Haiti based on the first Living Conditions Survey of 7,186 households covering the whole country and representative at the regional level. Using a USD1 a day extreme poverty line, the analysis reveals that 49 percent of Haitian households live in absolute poverty. Twenty, 56, and 58 percent of households in metropolitan, urban, and rural areas, respectively, are poor. At the regional level, poverty is especially extensive in the northeastern and

northwestern regions. Access to assets such as education and infrastructure services is highly unequal and strongly correlated with poverty. Moreover, children in indigent households attain less education than children in nonpoor households. Controlling for individual and household characteristics, location, and region, living in a rural area does not by itself affect the probability of being poor. But in rural areas female headed households are more likely to experience poverty than male headed households. Domestic migration and education are both key factors that reduce the likelihood of falling into poverty. Employment is essential to improve livelihoods and both the farm and nonfarm sector play a key role.

The Urban Poor in Latin America

Poverty and Exclusion Among Urban Children

This report adopts a decent work perspective to approach the challenge of promoting employment and reducing poverty in rural areas by examining issues of employment, social protection, rights and social dialogue in rural areas in an integrated way.

Evaluation of the Rural Agroindustry Development Programme

(PRODAR)

Sub-Saharan Africa's rural population is growing rapidly, and more young people are entering the labour market every year. This raises serious policy questions. Can rural economies absorb enough job seekers? Could better-educated youth transform Africa's rural economies by adopting new technologies and starting businesses? Are policymakers responding to the youth employment challenge? Or will there be widespread unemployment, social instability, and an exodus to cities and abroad? Youth and Jobs in Rural Africa: Beyond Stylized Facts uses survey data to build a nuanced understanding of the constraints and opportunities facing rural youth in Africa. Addressing the questions of Africa's rural youth is currently hampered by major gaps in our knowledge and stylized facts from cross-country trends or studies that do not focus on the core issues. Youth and Jobs in Rural Africa takes a different approach, drawing on household and firm surveys from selected African countries with an explicit focus on rural youth. It argues that a balance between alarm and optimism is warranted, and that Africa's "youth bulge" is not an unprecedented challenge. Jobs in rural areas are limited, but agriculture is transforming and youth are participating, adopting new technologies and running businesses. Governments have adopted youth employment as a priority, but policies often do not address the specific needs of rural populations. Youth and Jobs in Rural Africa emphasizes that by going beyond stylized facts and drawing on more granular analysis, we can design effective policies to turn Africa's youth

problem into an opportunity for rural transformation.

Youth and Jobs in Rural Africa

Poverty in the Nonmetropolitan South

Publisher Description

Vision 2010

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

Promotion of Rural Employment for Poverty Reduction

The Road to Sustained Growth in Jamaica

Drawn from real stories of rural child welfare practice, Rural Child Welfare Practice displays lessons learned from people working in the services field of child welfare. The casebook has 18 chapters illustrating rural child welfare practice rewards, challenges, strategies, and practice wisdom. Case vignettes include racial, ethnic, religious, sexual orientation, and rural diversity, with particular attention to working with Native Americans/American Indians as well as First Nation (Canada) and Aborigine (Australia) people. The book also covers a wide range of child welfare services - such as protective services, kinship care, and adoption - through a variety of perspectives. It is particularly useful for students, professionals, and educators exploring what today's rural child welfare experts say must happen to engage in effective rural child welfare practice with children and families.
