Implicit Racial Bias across the Law

"The Legacy of Racism for Children: Psychology, Law, and Public Policy is the first volume to review the intersecting implications of psychology, public policy, and law with the goal of understanding and ending the challenges facing racial minority youth in America today. Proceeding roughly from causes to consequences - from early life experiences to adolescent and teen experiences - each chapter focuses on a different domain, explains the laws and policies that create or exacerbate racial disparity in that domain, reviews relevant psychological research and its implications for those laws or policies, and calls for next steps. Chapter authors examine how race and ethnicity intersect with child maltreatment (including child sex trafficking, corporal punishment, and memory for and disclosures of abuse), child dependency court decisions, custody and adoption, familial incarceration, the "school to prison pipeline," police/youth interactions, jurors' perceptions of child and adolescent victims and defendants, and U.S. immigration law and policy"--

Handbook of Multicultural Assessment offers the most comprehensive text on testing of racial and ethnic minorities in the United States. This thoroughly revised and updated edition includes the most current and state-of-the-art assessment information in a variety of psychological and educational domains. The book highlights new and innovative testing practices and expands the populations of interest to include recent immigrants and refugees. It also includes ways to overcome barriers in the assessment process as well as forensic assessment. This important resource offers an instructional text for conducting culturally competent psychological assessment for clinicians, educators, and researchers.

Culturally Responsive Cognitive - Behavioral Therapy: Assessment, Practice, and Supervision is the first book to integrate cultural influences into cognitive - behavioral therapy (CBT). This engagingly written volume describes the application of CBT with people of diverse cultures and discusses how therapists can refine cognitive - behavioral therapy to increase its effectiveness with clients of many cultures. The contributing authors examine the characteristics of

some of the most common cultural groups in the United States including American Indian, Latino, Asian, and African American, as well as groups less commonly considered in multicultural psychology books: people of Alaska Native, Arab, and Orthodox Jewish heritage. The volume also describes the use of CBT with older adults, people with disabilities, and gay and lesbian individuals, including examples of people who hold bicultural and multicultural identities. A chapter on culturally responsive assessment, with an emphasis on the most frequently used cognitive - behavioral scales, and a chapter on supervision round out this volume. Numerous case examples provide practical information grounded in an empirically supported theory, making this book a practical resource for every therapist.

Is our society color-blind? Trans-racial? Post-racial? And what—if anything—should this mean to professionals in clinical practice with diverse clients? The ambitious volume *The Concept of Race and Psychotherapy* probes these questions, compelling readers to look differently at their clients (and themselves), and offering a practical framework for more effective therapy. By tracing the racial “folk taxonomies” of eight cultures in the Americas and the Caribbean, the author elegantly defines race as a fluid construct, dependent on local social, political, and historical context for meaning but meaningless in the face of science. This innovative perspective informs

the rest of the book, which addresses commonly held assumptions about problem behavior and the desire to change, and presents a social-science-based therapy model, applicable to a wide range of current approaches, that emphasizes both cultural patterns and client uniqueness. Among the highlights of the coverage: Common elements in therapy and healing across cultures. The psychological appeal of racial concepts despite scientific evidence to the contrary. Lessons psychology can learn from anthropology. Three types of therapeutic relationships, with strategies for working effectively in each. The phenomenon of discontinuous change in brief therapy. Solution-focused therapy from a cross-cultural perspective. Thought-provoking reading for psychologists, psychiatrists, clinical social workers, and other mental health professionals as well as graduate students in these fields, *The Concept of Race and Psychotherapy* affirms the individuality—and the interconnectedness—of every client.

The Concept of Race and Psychotherapy

Despite cultural progress in reducing overt acts of racism, stark racial disparities continue to define American life. This book is for anyone who wonders why race still matters and is interested in what emerging social science can contribute to the discussion. The book explores how scientific evidence on the human mind might help to explain why racial equality is so elusive. This new evidence reveals how human mental machinery can be skewed by lurking

stereotypes, often bending to accommodate hidden biases reinforced by years of social learning. Through the lens of these powerful and pervasive implicit racial attitudes and stereotypes, *Implicit Racial Bias across the Law* examines both the continued subordination of historically disadvantaged groups and the legal system's complicity in the subordination.

In this provocative and original exploration of Black males and the legal establishment, Carlyle Van Thompson illuminates the critical issues defining Black male subjectivity. Since the days of Black people's enslavement and the days of Jim Crow segregation, Black males have been at odds with the legal and extra-legal restrictions that would maintain white supremacy and white male privilege. Grounded in the voices of Frederick Douglass and David Walker, who challenged hegemonic systems designed to socio-economically disenfranchise Black people, *Black Outlaws* examines legal aspects with regard to Black males during the period of segregation. By critically looking at Richard Wright's *The Outsider*, Chester Bomar Himes' *The Third Generation*, Walter Mosley's *Devil in a Blue Dress*, and Ernest J. Gaines' *A Lesson Before Dying* - all of which examine Black males during the Jim Crow period - Thompson investigates the challenges that Black males confront and surmount in their journeys to establish their individual and collective agency. *Black Outlaws* helps decipher

The goal of cultural psychology is to explain the ways in which human cultural constructions -- for example, rituals, stereotypes, and meanings -- organize and direct human acting, feeling, and thinking in different social contexts. A rapidly growing, international field of scholarship, cultural psychology is ready for an interdisciplinary, primary resource. Linking psychology, anthropology, sociology, archaeology, and history, *The Oxford Handbook of Culture and Psychology* is the quintessential volume that unites the variable perspectives from these disciplines. Comprised of over fifty contributed chapters, this book provides a necessary, comprehensive overview of contemporary cultural psychology. Bridging psychological, sociological, and anthropological perspectives, one will find in this handbook: - A concise history of psychology that includes valuable resources for innovation in psychology in general and cultural psychology in particular - Interdisciplinary chapters including insights into cultural anthropology, cross-cultural psychology, culture and conceptions of the self, and semiotics and cultural connections - Close, conceptual links with contemporary biological sciences, especially developmental biology, and with other social sciences - A section detailing potential methodological innovations for cultural psychology

By comparing cultures and the (often differing) human psychological functions occurring within them, *The Oxford Handbook of Culture and Psychology* is the ideal resource for making sense of complex and varied human phenomena.

These new ways of thinking about cultural identity have implications for strategies for legal reform, as well as for progressive thinking generally about theory, culture and politics.

Racial Disproportionality in Child Welfare

In this remarkable collaboration, one of the nation's leading civil rights lawyers joins forces with one of the world's foremost cultural psychologists to put American constitutional law into an American cultural context. By close readings of key Supreme Court opinions, they show how storytelling tactics and deeply rooted mythic structures shape the Court's decisions about race, family law, and the death penalty. *Minding the Law* explores crucial psychological processes involved in the work of lawyers and judges: deciding whether particular cases fit within a legal rule ("categorizing"), telling stories to justify one's claims or undercut those of an adversary ("narrative"), and tailoring one's language to be persuasive without appearing partisan ("rhetorics"). Because these processes are not unique to the law, courts' decisions cannot rest solely upon legal logic but must also depend vitally upon the underlying culture's storehouse of familiar tales of heroes and villains. But a culture's stock of stories is not changeless. Amsterdam and Bruner argue that culture itself is a dialectic constantly in progress, a conflict between the established canon and newly imagined "possible worlds." They illustrate the swings of this dialectic by a masterly analysis of the Supreme Court's race-discrimination decisions during the past century. A passionate plea for heightened consciousness about the way law is practiced and made, *Minding the Law* will be welcomed by a

professors: law is a storytelling enterprise thoroughly entrenched in culture. Whereas critical legal theorists have talked among themselves for the past two decades, Amsterdam and Bruner seek to engage all of us in a dialogue. For that, they should be applauded.

--Daniel R. Williams, *New York Law Journal Reviews* of this book: In *Minding the Law*, Anthony Amsterdam and Jerome Bruner show us how the Supreme Court creates the magic of inevitability. They are angry at what they see. Their book is premised on the conviction that many of the choices made in Supreme Court opinions 'lack any justification in the text' Their method is to analyze the text of opinions and to show how the conclusions reached do not always follow from the logic of the argument. They also show how the Court casts its rhetoric like a spell, mesmerizing its audience, and making the highly contingent shine with the light of inevitability. --Mitchell Goodman, *News and Observer* (Raleigh, North Carolina) *Reviews* of this book: What do controversial Supreme Court decisions and classic age-old tales of adultery, villainy, and combat have in common? Everything--at least in the eyes of [Amsterdam and Bruner]. In this substantial study, which is equal parts dense and entertaining, the authors use theoretical discussions of literary technique and myths to expose what they see as the secret intentions of Supreme Court opinions Studying how lawyers and judges employ the various literary devices at their disposal and noting the similarities between legal thinking and classic tactics of storytelling and persuasion, they believe, can have 'astonishing consciousness-retrieving effects' The agile minds of Amsterdam and Bruner, clearly storehouses of knowledge on a range of

subjects, allow an approach that might sound far-fetched occasionally but pays dividends in the form of gained perspective--and amusement. --Elisabeth Lasch-Quinn, Washington Times Reviews of this book: Stories and the way judges-intentionally or not-categorize and spin them, are as responsible for legal rulings as logic and precedent, Mr. Amsterdam and Mr. Bruner said. Their novel attempt to reach into the psyche of members of the Supreme Court is part of a growing interest in a long-neglected and cryptic subject: the psychology of judicial decision-making. --Patricia Cohen, New York Times Most law professors teach by the 'case method,' or say they do. In this fascinating book, Anthony Amsterdam--a lawyer--and Jerome Bruner--a psychologist--expose how limited most case 'analysis' really is, as they show how much can be learned through the close reading of the phrases, sentences, and paragraphs that constitute an opinion (or other pieces of legal writing). Reading this book will undoubtedly make one a better lawyer, and teacher of lawyers. But the book's value and interest goes far beyond the legal profession, as it analyzes the way that rhetoric--in law, politics, and beyond--creates pictures and convictions in the minds of readers and listeners. --Sanford Levinson, author of Constitutional Faith Tony Amsterdam, the leader in the legal campaign against the death penalty, and Jerome Bruner, who has struggled for equal justice in education for forty years, have written a guide to demystifying legal reasoning. With clarity, wit, and immense learning, they reveal the semantic tricks lawyers and judges sometimes use--consciously and unconsciously--to justify the results they want to reach. --Jack Greenberg, Professor of Law, Columbia

Correctional Mental Health is a broad-based, balanced guide for students who are learning to treat criminal offenders in a correctional mental health practice. Featuring a wide selection of readings, this edited text offers a thorough grounding in theory, current research, professional practice, and clinical experience. It emphasizes a biopsychosocial approach to caring for the estimated 20% of all U.S. prisoners who have a serious mental disorder. Providing a balance between theoretical and practical perspectives throughout, the text also provides readers with a big-picture framework for assessing current correctional mental health and criminal justice issues, offering clear strategies for addressing these challenges.

Cross-Cultural Analysis is the sequel to Culture's Consequences, the classic work published by Geert Hofstede, one of the most influential management thinkers in today's times. Hofstede's original work

introduced a new research paradigm in cross-cultural analysis: studying cultural differences through nation-level dimensions (complex variables defined by intercorrelated items). This paradigm has been subsequently used by hundreds of prominent scholars all over the world and has produced solid results. This new text takes the next step: It critically examines in one comprehensive volume the current, prevalent approaches to cross-cultural analysis at the level of nations that have been developed since Hofstede's work, offering students and researchers the theoretical and practical advantages and potential pitfalls of each method. The book is structured into four distinct parts. Parts I and II focus on the main theoretical and statistical issues in cross-cultural analysis using Hofstede's approach and the different research methods now associated with it. Part II consists of presentations of all well-known (and some lesser known) large-scale cross-cultural studies since Hofstede's work that have explained cross-cultural variation in terms of dimensional models. Part III summarizes the main conclusions to be drawn from the presentations in Part II and I explains how the proposed models have contributed to our practical understanding of cross-cultural diversity.

Multicultural Approaches in Caring for Children, Youth, and Their Families

Drinking from the Same Well is designed for those who seek a praxis-oriented theological grounding in the exploration of cross-cultural perspectives in the field of pastoral care and counseling. It traverses the broad terrain of cultural analysis and also explores in depth a number of discrete cross-cultural issues in pastoral counseling, related to communication, conflict, empathy, family dynamics, suffering, and healing. Cultural analysis and theological reflection are situated alongside numerous case studies of persons and situations that enliven the concepts being discussed, and readers are invited to engage personally with the material through a variety of focus questions and reflective exercises. This book can serve as a helpful textbook for seminarians and a useful guide for pastors and priests, church study groups, multicultural parishes, and anyone engaged in helping ministries with persons from other cultures. The goal is to develop culturally competent pastoral caregivers by providing a comprehensive and practical overview of the generative themes and challenges in cross-cultural pastoral care.

Over the past two decades, virtually all areas of family law have undergone major doctrinal and theoretical changes - from the definition of marriage, to the financial and parenting consequences of divorce, to the legal construction of parenthood. An equally important set of changes has transformed the resolution of family disputes. This 'paradigm shift' in family conflict resolution has reshaped the practice of family law and has fundamentally altered the way in which disputing families interact with the legal system. Moreover, the changes have important implications for the way that family law is understood and taught. This volume examines the contours of this paradigm shift in family conflict resolution and explores its implications for family law scholarship and practice. The interdisciplinary compilation includes contributions from lawyers, legal academics, social scientists and mental health professionals. As the articles in the volume demonstrate, the transformation in family conflict resolution holds considerable promise for disputing families, but it also raises a number of challenges. These challenges include concerns about the institutional competence of courts, the surrender of fact-finding and decision-making to individuals without legal training, the loss of autonomy and privacy for family members subject to continuing court oversight and the disjunction between problem-solving justice and authoritative legal norms. By exploring both the promise of the new paradigm and its potential pitfalls, this volume engages family law scholars and offers insights to judges, practitioners and policy makers responsible for serving families in conflict.

This handbook describes ways in which society shapes the mental health of its members, and shapes the lives of those who have been identified as mentally ill. The text explores the social conditions that lead to behaviors defined as mental illness, and the ways in which the concept of mental illness is socially constructed around those behaviors. The book also reviews research that examines socially conditioned responses to mental illness on the part of individuals and institutions, and ways in which these responses affect persons with mental illness. It evaluates where the field has been, identifies its current location and plots a course for the future.

Handbook of Multicultural Assessment

Historically, relatively few investigations in neuropsychology have been sensitive to the analysis of cultural variables. This handbook will assist the neuropsychologist interested in cultural competence and help increase understanding of the link between cultural competence in assessment and intervention and good treatment outcomes. The handbook authors provide an in-depth discussion of the current status of multicultural training in neuropsychology; specific information on diverse groups (age, gender, ethnicity, etc.), assessment instruments, and clinical populations (HIV infected, seizure disorders, brain injuries); and unique analysis of immigration patterns, forensics, and psychopharmacology. This volume is the first to summarize the cultural data available in neuropsychology. A valuable resource for clinical neuropsychologists, school psychologists and rehabilitation professionals.

a useful text in clinical law teaching as well as other courses aimed at finding alternative, humanistic approaches to legal practice. The incidence of alcoholism, substance abuse and depression among lawyers, as well as widespread dissatisfaction with the practice of law, underscore the importance of developing healthy, healing alternatives to traditional, largely adversarial, law practice. Despite increasing interest in alternatives to traditional legal practice, embodied in what Professor Susan Daicoff has characterized as The Comprehensive Law Movement, and including schools of thought such as Therapeutic Jurisprudence, there currently exists no compendium of the competencies needed for such practice. In addition, there is little in the literature of the Comprehensive Law Movement that explores the particular challenges of cross-cultural representation. This book is intended to fill that void.

It critiques many of the existing social welfare acts and policies in terms of their treatment of children of color, and it provides best practices for each decision point in the child welfare process and for cultural competency measures and training. The text offers extensive measurement instruments that agencies can use to assess and correct institutional racism.
