The Complete Book of Ayurvedic Home Remedies

History of the American Academy of Forensic Sciences, 1948-1998

Examining the world of popular healing in South Asia, this book looks at the way that it is marginalised by the state and medical establishment while at the same time being very important in the everyday lives of the poor. It describes and analyses a world of 'subaltern therapeutics' that both interacts with and resists state-sanctioned and elite forms of medical practice. The relationship is seen as both a historical as well as ongoing one. Focusing on those who exist and practice in the shadow of statist medicine, the book discusses the many ways in which they try to heal a range of maladies, and how they experience their marginality. The contributors also provide a history of such therapeutics, in the process challenging the widespread belief that such 'traditional' therapeutics are relatively static and unchanging. In focusing on these problems of transition, they open up one of the central concerns of subaltern historiography. This is an important contribution to the history of medicine and society, and subaltern and South Asian studies.

Herbal Medicines

This book offers thorough coverage of emergencies in dermatology, from the basics of critical care for dermatologic emergencies, to neonatal and pediatric emergencies, infectious emergencies, drug eruptions and HIV-AIDS-related emergencies, among many others.

Medical Marginality in South Asia

The book comprehensively discusses the mechanisms of pathogenesis and drug resistance; current diagnostics landscape of four key human pathogens; bacterial, fungal, protozoans and viral which are the causes of major infectious diseases. It also assesses the emerging technologies for the detection and quantification of these pathogens. Further, it discusses the novel opportunities to fight against these infectious diseases and to identify pertinent drug targets with novel methodologies. It also reviews the current and future insights into the control, elimination, and eradication of these infectious diseases. Importantly, the book discusses the epidemiological characteristics and various challenges in combating Ebola and Influenza diseases. Finally, the book highlights the growing role of nanotechnology and bioinformatics resources for combating the infectious diseases. In summary, the book provides the mechanistic insight of the pathogenicity, drug-resistance, therapeutic strategies and identification of the novel drug targets of Mycobacterium tuberculosis, Plasmodium, Candida, Hepatitis C and emerging viral infections.

The Illustrated London News

NanoBioMedicine

Ayurveda, which literally means "the science or knowledge of life", is the traditional medical system of India. Its origin dates back an estimated 5-10,000 years, and it is widely considered to be the oldest form of health care in the world. Ayurveda is based on the premise that disease is the natural end result of living out of harmony with our environment. 'Natural' is an important word because Ayurveda understands that symptoms of disease are the body's normal way of communicating disharmony. With this understanding of disease, Ayurveda's approach to healing becomes obvious: to reestablish harmony between a person and environment. Once reestablished, the need for the body to communicate disharmony diminishes, symptoms dissipate, and healing is said to have occurred. Through various chapters, the author Dr. Murli Manohar gives out the Ayurvedic concepts of health & treatment, diagnosis by Ayurveda, role of diet and season in health & disease, symptoms & causes, prevention & treatment, nutrition & diet, herbal therapies & nature cure for common and chronic ailments.

Congressional Record

Essential Evidence-Based Medicine

Parkinson's disease (PD) is one of the most common neurodegenerative disorders and it is caused by a loss of dopamine (DA) producing neurons in the basal ganglia in the brain. The PD patient suffers from motor symptoms such as tremor, bradykinesia and rigidity and treatment with levodopa (LD), the precursor of DA, has positive effects on these symptoms. Several factors affect the availability of orally given LD. Gastric emptying (GE) is one factor and it has been shown to be delayed in PD patients resulting in impaired levodopa uptake. Different enzymes metabolize LD on its way from the gut to the brain resulting in less LD available in the brain and more side effects from the metabolites. By adding dopa decarboxylase inhibitors (carbidopa or benserazide) or COMT-inhibitors (e.g. entacapone) the bioavailability of LD increases significantly and more LD can pass the blood-brain-barrier and be converted to DA in the brain. It has been considered of importance to avoid high levodopa peaks in the brain because this seems to induce changes in postsynaptic dopaminergic neurons causing disabling motor complications in PD patients. More continuously given LD, e.g. duodenal or intravenous (IV) infusions, has been shown to improve these motor complications. Deep brain stimulation of the subthalamic nucleus (STN DBS) has also been proven to improve motor complications and to make it possible to reduce the LD dosage in PD patients. In this doctoral thesis the main purpose is to study the pharmacokinetics of LD in patients with PD and motor complications; in blood and subcutaneous tissue and study the effect of GE and PD stage on LD uptake and the effect of continuously given LD (CDS) on LD uptake and GE; in blood and cerebrospinal fluid (CSF) when adding the peripheral enzyme inhibitors entacapone and carbidopa to LD infusion IV; in brain during STN DBS and during oral or IV LD treatment. To conclude, LD uptake is more favorable in PD patients with less severe disease and GE is delayed in PD patients. No obvious relation between LD uptake and GE or between GE and PD stage is seen and CDS decreases the LD levels. Entacapone increases the maximal concentration of LD in blood and CSF. This is more evident with additional carbidopa and important to consider in avoiding high LD peaks in brain during PD treatment. LD in brain increases during both oral and IV LD treatment and the DA levels follows LD well indicating that PD patients still have capacity to metabolize LD to DA despite probable pronounced nigral degeneration. STN DBS seems to increase putaminal DA levels and together with IV LD treatment also increases LD in brain possibly explaining why it is possible to decrease LD medication after STN DBS surgery. Parkinsons sjukdom (PS) är en av de vanligaste s.k. neurodegenerativa sjukdomarna och orsakas av förlust av dopamin(DA)producerande nervceller i hjärnan. Detta orsakar motoriska symptom såsom skakningar, stelhet och förlångsammade rörelser. Levodopa (LD) är ett ämne, som kan omvandlas till DA i hjärnan och ge symptomlindring och det är oftast förstahandsval vid behandling av patienter med PS. Flera faktorer påverkar tillgängligheten av LD, bl.a. den hastighet som magsäcken tömmer sig med och denna verkar förlångsammad hos personer med PS vilket ger sämre tillgänglighet av LD i blodet och därmed i hjärnan. LD bryts även ner i hög grad av olika enzym ute i kroppen vilket leder till mindre mängd LD som hamnar i hjärnan och till fler nedbrytningsprodukter som orsakar biverkningar. Tillägg av enzyminhämmare leder till ökad mängd LD som kan nå hjärnan och omvandlas till DA. Det anses viktigt att undvika höga toppar av LD i hjärnan då dessa verkar bidra till utvecklandet av besvärliga motoriska komplikationer hos patienter med

PS. Om LD ges mer kontinuerligt, exempelvis som en kontinuerlig infusion in i tarmen eller i blodet, så minskar dessa motoriska komplikationer. Inopererande av stimulatorer i vissa delar av hjärnan (DBS) har också visat sig minska dessa motoriska komplikationer och även resultera i att man kan minska LD-dosen. Huvudsyftet med den här avhandlingen är att studera LD hos patienter med PS; i blod och fettvävnad då LD ges i tablettform och se om det finns något samband med LD-upptag och hastigheten på magsäckstömningen (MT) och om kontinuerligt given LD påverkar LD-upptaget eller MT; i blod och i ryggmärgsvätska då enzymhämmarna entakapon och karbidopa tillsätts LD; i hjärna vid behandling med DBS och då LD ges både som tablett och som infusion i blodet.

Sammanfattningsvis kan vi se att LD-upptaget är mer gynnsamt hos patienter med PS i tidigare skede av sjukdomens komplikationsfas. MT är förlångsammad hos patienter med PS och det är inget tydligt samband mellan LD-upptag och MT eller mellan MT och sjukdomsgrad. Kontinuerligt given LD minskar LDnivåerna.

Enzymhämmaren entakapon ökar den maximala koncentrationen av LD i blod och ryggmärgsvätska och effekten är mer tydlig vid tillägg av karbidopa vilket är viktigt att ta i beaktande vid behandling av PS för att undvika höga toppar av LD i hjärnan. LD ökar i hjärnan då man behandlar med LD i tablettform och som infusion i blodet och DA-nivåerna i hjärnan följer LD väl vilket visar på att patienter med PS fortfarande kan omvandla LD till DA trots trolig uttalad brist av de DA-producerande nervcellerna i hjärnan. DBS verkar öka DA i vissa områden i hjärnan och tillsammans med LD-infusion i blodet verkar det även öka LD i hjärnan och det kan förklara varför man kan sänka LDdosen efter DBS-operation.

Colonialism, Maasina Rule, and the Origins of Malaitan Kastom

This work contains Aristototele's views on what makes a good human life. It has served as an influence on the history of ideas and offers insights into the human condition.

Hammer of Thor

This book provides a comprehensive overview of the recent trends in various Nanotechnology-based therapeutics and challenges associated with its development. Nanobiotechnology is an interdisciplinary research that has wide applications in the various fields of biomedical research. The book discusses the various facets of the application of Nanotechnology in drug delivery, clinical diagnostics, Nanomedicine and treatment of infectious and chronic diseases. The book also highlights the recent advancements on important devices and applications that are based on Nanotechnology in medicine and brief the regulatory and ethical issues related to nanomedical devices. It also reviews the toxicological profile of various nanomaterials and emphasizes the need for safe nanomaterials for clinical use. Finally, the book discusses the recent developments of potential commercial applications of Nanotechnology.

The Publishers Weekly

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The

Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Breeder's Gazette

Bibliography of the History of Medicine

'Homegardens' are integrated tree-crop-animal production systems, often established on small parcels of land surrounding homesteads, and primarily found in tropical environments. This multi-authored volume contains peer-reviewed chapters from the world's leading researchers and professionals in this topic. It summarizes the current state of knowledge on homegarden systems, with a view to using this knowledge as a basis for improving both homegardens and other similar multistrata agroforestry systems.

Traditional, Complementary and Alternative Medicine

Based on the ancient healing tradition from India that dates back thousands of years, The Complete Book of Ayurvedic Home Remedies offers natural alternatives to conventional medicines and treatments with practical advice and easy-to-follow instructions. Dr. Vasant Lad, a leading authority in this field, has created an invaluable guide to treating common ailments and chronic problems with strategies tailored to your personal needs based on your dosha. Dr. Lad first explains the principles behind the science of Ayurveda, exploring the physical and psychological characteristics of each of the three doshas, or mind-body types--vata, pitta, and kapha. Once you have determined which type or combination of types you are, Dr. Lad helps you to begin your journey to the ultimate "state of balance" and well-being. Dr. Lad explains why certain imbalances often result in illness and shows you how to restore your body to natural order. You'll learn which traditional Ayurvedic remedies--herbal teas and formulas, essential oils, meditation, yoga--offer relief from a variety of conditions, such as cold and flu symptoms, headaches, toothaches, sore throats, high cholesterol, vision problems, anxiety, and depression. Dr. Lad also shows you how to use diet and specific Ayurvedic techniques to prevent future illness and to promote body consciousness and healthy living. The Complete Book of Ayurvedic Home Remedies enables us all to experience the benefits of Ayurveda's healing properties that have been refined over thousands of years. All of the herbs, foods, and oils Dr. Lad recommends can be found in local health food stores or through

mail-order catalogs. Complete with an extensive glossary and resource list, this is the definitive guide to natural, safe, and effective remedies, everyday keys to a lifetime of vitality and well-being. From the Trade Paperback edition.

Hamdard Pharmacopoeia of Eastern Medicine

They live among us. We know they are there. No government can control them; no authority can stop them. Some are evil. Some are good. All are powerful. They inhabit our myths and fairy tales. But what if they were real, the witches, wizards, and fairy godmothers? What if they were called "adepts" and used talismans to increase their power? The most powerful talisman in the world is The Hammer of Thor and Hitler stole it from its rightful owners, the Valkyrie. When American adept Francis Kader is reluctantly drawn into the effort to retrieve the Hammer from the Nazis, he begins a journey that leads him to a confrontation with Thor himself. Can a mere human hope to defeat an immortal god?

Levodopa pharmacokinetics -from stomach to brain

Herbal Home Remedies

This book is a political history of the island of Malaita in the British Solomon Islands Protectorate from 1927, when the last violent resistance to colonial rule was crushed, to 1953 and the inauguration of the island's first representative political body, the Malaita Council. At the book's heart is a political movement known as Maasina Rule, which dominated political affairs in the southeastern Solomons for many years after World War II. The movement's ideology, *kastom*, was grounded in the determination that only Malaitans themselves could properly chart their future through application of Malaitan sensibilities and methods, free from British interference. *Kastom* promoted a radical transformation of Malaitan lives by sweeping social engineering projects and alternative governing and legal structures. When the government tried to suppress Maasina Rule through force, its followers brought colonial administration on the island to a halt for several years through a labor strike and massive civil resistance actions that overflowed government prison camps. David Akin draws on extensive archival and field research to present a practice-based analysis of colonial officers' interactions with Malaitans in the years leading up to and during Maasina Rule. A primary focus is the place of knowledge in the colonial administration. Many scholars have explored how various regimes deployed "colonial knowledge" of subject populations in Asia and Africa to reorder and rule them. The British imported to the Solomons models for "native administration" based on such an approach, particularly schemes of indirect rule developed in Africa. The concept of "custom" was basic to these schemes and to European understandings of Melanesians, and it was made the lynchpin of government policies that granted limited political roles to local ideas and practices. Officers knew very little about Malaitan cultures, however, and Malaitans seized the opportunity to transform custom into *kastom*, as the foundation for a new society. The book's overarching topic is the dangerous road that colonial ignorance paved for policy makers, from young cadets in the field to high officials in distant Fiji and London. Today *kastom* remains a powerful concept

on Malaita, but continued confusion regarding its origins, history, and meanings hampers understandings of contemporary Malaitan politics and of Malaitan people's ongoing, problematic relations with the state.

The Nicomachean Ethics

Discovering Homeopathy

This full-color reference offers practical, evidence-based guidance on using more than 120 medicinal plants, including how to formulate herbal remedies to treat common disease conditions. A body-systems based review explores herbal medicine in context, offering information on toxicology, drug interactions, quality control, and other key topics. More than 120 herbal monographs provide quick access to information on the historical use of the herb in humans and animals, supporting studies, and dosing information. Includes special dosing, pharmacokinetics, and regulatory considerations when using herbs for horses and farm animals. Expanded pharmacology and toxicology chapters provide thorough information on the chemical basis of herbal medicine. Explores the evolutionary relationship between plants and mammals, which is the basis for understanding the unique physiologic effects of herbs. Includes a body systems review of herbal remedies for common disease conditions in both large and small animals. Discusses special considerations for the scientific research of herbs, including complex and individualized interventions that may require special design and nontraditional outcome goals.

Anticancer Agents from Natural Products

The Caducean

The Church Standard

This is the first book to address public health issues in traditional, complementary and alternative medicine (TCAM). It presents state-of-the-art reviews of TCAM research in a range of priority public health areas such as malaria and HIV and in such common ailments as skin conditions and orthopedic injury in developing countries. Contributions analyze policy trends in areas such as financing of TCAM and education and training in this field as well as selected case studies of model TCAM projects. Important chapters on research methodology, ethical and safety issues, and intellectual property rights pertaining to traditional medicine are also presented. Public financing for TCAM is a test of the commitment of governments, and the book includes an analysis from the World Health Organization's (WHO) Global Atlas data of the worldwide trends in this area. With safety concerns foremost in the minds of both policy makers and the public, the book offers a global overview of policy and legislative trends in this field as well as an important set of guidelines for pharmacovigilance and TCAM products. Sample Chapter(s). Chapter 1: Introduction (1,729 KB). Contents: Foreword (Allan Rosenfield); Policy:

Introduction (Gerard Bodeker & Gemma Burford); Policy and Public Health Perspectives on Traditional, Complementary and Alternative Medicine: An Overview (Gerard Bodeker, Fredi Kronenberg & Gemma Burford); Financing Traditional, Complementary and Alternative Health Care Services and Research (Gemma Burford, Gerard Bodeker & Chi-Keong Ong); Training (Gerard Bodeker, Cora Neumann, Chi-Keong Ong & Gemma Burford); Safety: Issues and Policy (Gilbert Shia, Barry Noller & Gemma Burford); Pharmacovigilance of Herbal Medicines: A United Kingdom Perspective (Joanne Barnes); Medicinal Plant Biodiversity and Local Healthcare: Sustainable Use and Livelihood Development (Gerard Bodeker & Gemma Burford); Home Herbal Gardens OCo A Novel Health Security Strategy Based on Local Knowledge and Resources (G Hariramamurthi, P Venkatasubramanian, P M Unnikrishnan & D Shankar); Humanitarian Responses to Traditional Medicine for Refugee Care (Cora Neumann & Gerard Bodeker); Public-Private Partnerships: A Case Study from East Africa (Patrick Mbindyo); Public Health Issues: Priority Diseases and Health Conditions: Malaria (Merlin L Willcox & Gerard Bodeker); HIV/AIDS: Traditional Systems of Health Care in the Management of a Global Epidemic (Gerard Bodeker, Gemma Burford, Mark Dvorak-Little & George Carter); An Overview of Clinical Studies on Complementary and Alternative Medicine in HIV Infection and AIDS (Jianping Liu); Skin and Wound Care: Traditional, Complementary and Alternative Medicine in Public Health Dermatology (Gemma Burford, Gerard Bodeker & Terence J Ryan); Traditional Orthopaedic Practices: Beyond OCyBonesettingOCO (Gemma Burford, Gerard Bodeker & Jonathan Cohen); Research: Clinical Trial Methodology (Ranjit Roy Chaudhury, Urmila Thatte & Jianping Liu); Ethical Issues in Research (Merlin L Willcox, Gerard Bodeker & Ranjit Roy Chaudhury); Intellectual Property Rights (Gerard Bodeker); Epilogue (Gerard Bodeker & Gemma Burford). Readership: Public health specialists and departments; health policy departments in ministries of health and universities; colleges of traditional and complementary medicine; World Health Organization and affiliated institutions; medical schools as a background text on TCAM."

Buka's Emergencies in Dermatology

Pathogenicity and Drug Resistance of Human Pathogens

This is an ideal introductory text on Evidence Based Medicine (EBM) for medical students and all health-care professionals.

The Athenaeum

Depicting Basque mutual aid societies, language courses, musical and dance troupes, cuisine classes, community activities, sport, political involvement, and ties to homeland institutions are just a few of the ingredients which mix to compose the chapters of this work. Readers will learn about the history and reasons why Basques left the Pyrenees of northern Spain and southern France from the personal experiences of political and economic exiles' oral histories. Original archival research allows us to discover the features of the early 1900s Centro Vasco-Americano, the Basque Government-in-exile Delegation in New York, and the development of Basque organizations. "Basqueness" is being redefined in this

transnational cosmopolitan community, and with the pioneer spirit of their ancestors, latter generation Basques are nurturing and promoting Basque culture and identity to the world.

The Modern Woodman

Dana Ullman, one of the leading advocates of homeopathic medicine, has produced a comprehensive, lucid introduction to this branch of complementary medicine, covering the history and the philosophy of homeopathy as well as scientific evidence supporting its effectiveness for a variety of conditions. A detailed discussion of the effectiveness and the limits of homeopathy in the treatment of infectious disease, allergies, chronic diseases, psychological conditions and dentistry, as well as its applications in pregnancy and labor, women's health, pediatrics and sports medicine follows.

Tropical Homegardens

"In a post-truth, fake news world, we are particularly susceptible to the claims of pseudoscience. When emotions and opinions are more widely disseminated than scientific findings, and self-proclaimed experts get their expertise from Google, how can the average person distinguish real science from fake? This book examines pseudoscience from a variety of perspectives, through case studies, analysis, and personal accounts that show how to recognize pseudoscience, why it is so widely accepted, and how to advocate for real science. Contributors examine the basics of pseudoscience, including issues of cognitive bias; the costs of pseudoscience, with accounts of naturopathy and logical fallacies in the anti-vaccination movement; perceptions of scientific soundness; the mainstream presence of "integrative medicine," hypnosis, and parapsychology; and the use of case studies and new media in science advocacy."--Back cover.

Disenchanted India

India is frequently represented as the quintessential land of religion. Johannes Quack challenges this representation through an examination of the contemporary Indian rationalist organizations: groups who affirm the values and attitudes of atheism, humanism, or free-thinking. Quack shows the rationalists' emphasis on maintaining links to atheism and materialism in ancient India and outlines their strong ties to the intellectual currents of modern European history. At the heart of Disenchanted India is an ethnographic study of the organization "Andhashraddha Nirmulan Samiti" (Organization for the Eradication of Superstition), based in the Indian State of Maharashtra. Quack gives a nuanced account of the Organization's specific "mode of unbelief." He describes the group's efforts to encourage a scientific temper and to combat beliefs and practices that it regards as superstitious. Quack also shows the role played by rationalism in the day-to-day lives of the Organization's members, as well as the Organization's controversial position within Indian society. Disenchanted India contributes crucial insight into the nature of rationalism in the intellectual life and cultural politics of India.

Pseudoscience

The Cambridge History of Medicine surveys the rise of medicine in the West from classical times to the present. Covering both the social and scientific history of medicine, this 2006 volume traces the chronology of key developments and events, engaging with the issues, discoveries, and controversies that have characterized medical progress.
