In the 1980s, a research team led by Parisian scientists identified several unique DNA sequences, or haplotypes, linked to sickle cell anemia in African populations. After casual observations of how patients managed this painful blood disorder, the researchers in question postulated that the Senegalese type was less severe. The Enculturated Gene traces how this

genetic discourse has blotted from view the roles that Senegalese patients and doctors have played in making sickle cell "mild" in a social setting where public health priorities and economic austerity programs have forced people to improvise informal strategies of care. Duana Fullwiley shows how geneticists, who were fixated on population differences, never investigated the various modalities of self-care that people developed in this context of biomedical scarcity, and how local doctors, confronted with dire cuts in Senegal's health sector, wittingly accepted the genetic prognosis of better-than-expected health outcomes. Unlike most genetic determinisms that highlight the absoluteness of disease, DNA haplotypes for sickle cell in Senegal did the opposite. As Fullwiley demonstrates, they allowed the condition to remain officially invisible, never to materialize as a health priority. At the same time, scientists' attribution of a less severe form of Senegalese sickle cell to isolated DNA sequences closed off other explanations of this population's measured biological success. The Enculturated Gene reveals how the notion of an advantageous form of sickle cell in this part of West Africa has defined--and obscured--the nature of this illness in Senegal today. What Has Not Yet Left

New York Times Bestseller It promises to be a busy week for Hannah Swensen. Not only is she whipping up treats for the chamber of commerce booth at the Tri-County fair, she's also judging the baking contest; acting as a magician's assistant

for her business partner's husband; trying to coax Moishe, her previously rapacious feline, to end his hunger strike, and performing her own private carnival act by juggling the demands of her mother and sisters. With so much on her plate, it's no wonder Hannah finds herself on the midway only moments before the fair closes for the night. After hearing a suspicious thump, she goes snooping--only to discover Willa Sunquist, a student teacher and fellow bake contest judge, dead alongside an upended key lime pie. But who would want to kill Willa and why? Now Hannah needs to crank up the heat, hoping that Willa's killer will get rattled and make a mistake. If that happens she intends to be there, even if it means getting on a carnival ride that could very well be her last. . . "Yummy. . .Fluke has developed a charming supporting cast who all feel like friends by the time the murder is solved. The dozens of tempting recipes Fluke includes are an added treat." --Publishers Weekly

The Enculturated Gene

An excerpt taken from the poem "The Arsonist's Wife Has Not Yet Left Him" Nothing left to live for, the man told the reporters and all of us, his neighbors, gathered around him. He brushed ash from his face and looked back at the bare, wet-black rafters of his new house still smoking. You never forget this, he said, wiping at the lines dragging soot down both cheeks.

Chronoschisms

Laura and Charlie Rider have been married for twelve years. They share their nursery business in rural Wisconsin, their love for their animals, and their zeal for storytelling. Although Charlie's enthusiasm in the bedroom has worn Laura out, although she no longer sleeps with him, they are happy enough going along in their routine. Jenna Faroli is the host of a popular radio show, and in Laura's mind is "the single most famous person in the Town of Dover." When Jenna happens to cross Charlie's path one day, and they begin an e-mail correspondence, Laura cannot resist using Charlie to try out her new writing skills. Together, Laura and Charlie craft florid, strangely intimate messages that entice Jenna in an unexpected way. The "project" quickly spins out of control. The lines between Laura's words and Charlie's feelings are blurred and complicated, Jenna is

transformed in ways that deeply disturb her, and Laura is transformed in her mind's eye into an artist. The transformations are hilarious and poignant, and for Laura Rider, beyond her wildest expectations.

Literary Anecdotes Of The Eighteenth Century; Comprizing Biographical Memoirs Of William Bowyer And Many Of His Learned Friends

Winner of a "Discovery"/The Nation Award Winner of the 1999 PEN/Joyce Osterweil Award for Poetry Some Ether is one of the more remarkable debut collections of poetry to appear in America in recent memory. As Mark Doty has noted, "these

poems are more than testimony; in lyrics of ringing clarity and strange precision, Flynn conjures a will to survive, the buoyant motion toward love which is sometimes all that saves us. Some Ether resonates in the imagination long after the final poem; this is a startling, moving debut."

Venous Thromboembolism

Pulmonary thromboembolism in Japan is currently associated with a high mortality rate and remains a concern for patients and medical staff alike. Moreover, as the mechanisms of the condition have been elucidated, it has become clear that much work needs to be done in the field to achieve acceptable results in this country. Thus, Japan has regularly played host to the International Symposium on Pulmonary Thromboembolism . At the most recent symposium, in Sendai, the epidemiology and the treatment of pulmonary thromboembolism, traveler's thrombosis, and the prevention of deep vein thromboembolism were discussed, particularly with reference to the differences between Japan and Western countries. The fruits of the collaboration between that assembly of international specialists can be found in this collection of work. It provides an in-depth look at the current concepts that guide the treatment and prevention of the disease, and at the problem areas that must be improved upon.

Stranded in Harmony

Walter McCloud is a boy with dreams unlike most. Introduced as a child to the genius of Balanchine and the lyricism of Tchaikovsky, Walter has always aspired to be a dancer. As he grows older, it becomes clear that despite his desire, he lacks the talent, and he faces the painful knowledge that his more gifted friends have already surpassed him. Soon, however, that pain is overshadowed when his older brother, Daniel, finds a strange lump on his neck and Walter realizes that a happy family can change overnight. The year that follows transforms the McClouds, as they try to hold together in the face of the fearful consequences of Daniel's illness, and Walter makes discoveries about himself and his friendships that will change him forever. Decades later, after Walter has left home and returned, he must come to terms with the memories of that year, and grapple once and for all with the challenge of carving out a place for himself in this all-too-familiar world. A moving story of the torments of sexuality and the redemptive power of family and friendship, *The Short History of a Prince* confirms Jane Hamilton's place as a preeminent novelist of our time.

Comfort for the Afflicted, Under Every Distress; with Suitable Devotions. By William Dodd..

Annie Katchinska

The Open Spaces Society was founded in 1865 as the Commons Preservation Society. Its founders and early members included Sir Robert Hunter and Octavia Hill, who founded the National Trust 30 years later along with Canon

Rawnsley. Celebrating 150 years since its foundation, the society's aim over the last century has been to preserve commons for the enjoyment of the public and protect the historical rights-of-way network through England and Wales. Early successes included saving Hampstead Heath from gravel extraction, Epping Forest, Wimbledon Common, Ashdown Forest and the Malvern Hills, among many other places. This book charts the history of the society, including its association with the National Trust, and highlights the kind of work it has been doing over the last 150 years to save our public spaces. Its work is largely unheard of and yet it affects everyone in Britain, whether we realise it or not. Anyone interested in nature, walking, cycling or visiting National Trust properties will be fascinated to read about this little-known society.
