Lessons on the Human Body

Black & White Edition This is a fascinating exploration of the genesis of a new breed born of necessity from the ashes of the Second World War. Donald B. Anderson looks in some detail at the formative years and the [verifiable] breeds employed in creating the Black Russian Terrier. In 2004, Anderson discovered the fabled existence of a new breed, the massive, aggressive Black [Russian] Terrier. Having been a breeder of Giant Schnauzers, he was immediately captivated by a statement proclaiming this canine to be based on the Giant Schnauzer. With little information readily available, Anderson (launching himself onto the investigative trail) decided to undertake the search for more knowledge on the evolution and development of this Stalin-era, post-WWII-Russia, military dog. Data strongly suggests that this beast was created as the result of a post World War II edict of Premier Josef Stalin's demand for a national military and gulag guard dog. With the

Stalin years fraught with secrecy and ruled by applying unbridled psychological fear on the public, discovering sources of information, and forging a spirit of mutual trust, was not to be an easy task. What Anderson discovered was an undertaking of monumental proportions, a project that could only be accomplished through the availability of unlimited government financial resources, and political commitment. A strategy was launched by a large team of Russia's foremost geneticists and cynologists to undertake massive multi-breed experimental combinations of dogs with the aim of melding a collection of the best traits into a "super" military canine. In outlining this "historical" exploration, Anderson has ferreted out evidence previously not readily available outside Russia, and has made every effort to gather, evaluate and produce an account that can be substantiated as being reasonably accurate. Anderson's stratagem was not only to describe the emerging "Black Terrier", but to include historical data on the origins of the breeds that went into its makeup, thus providing readers with a Paint by Number portrait of the big picture. Anderson portrays the evolution from the original concept of a dog of war to that of a family companion. His purpose for this eight-year odyssey was not only with writing an historical presentation for the English-speaking canine fancy, but an invitation to journey with him along a road of adventure. His chronology of the Black Russian Terrier became so massive and complex that it could only be rationally presented in a series of volumes.

Hindsight

Dante is one of the towering figures of European literature, yet there remain a surprising number of questions about his life and works; Who was the leader that would bring peace to the world, as Virgil and Beatrice prophesied in the *Commedia*? Who was Beatrice, really? Was *De Vulgari Eloquentia* truly a treatise on the art of writing? Did he need a medicinal muse? Dante scholar and translator Barbara Reynolds contends the master used cannabis to soar to greater creative heights. Besides proposing a solution to the famous prophecies, this lively, engaging, and elegantly written biography contains a provocative new idea in virtually every chapter, offering alternative interpretations of his work. Drawing from an impressive array of sources, Reynolds provides a comprehensive analysis of the poet, placing him within the context of his culture and society to deepen our understanding of a complicated man who was irritable, opinionated, and vengeful--and an extraordinary genius.

The Life of Robert Owen;

Gumilev holds a unique position in the history of Russian poetry as a result of his profound involvement with Africa. He extensively wrote both poetry and prose on the culture of the continent in general and on Ethiopia (Abyssinia, as it was called in Gumilev's time) in particular. During his abbreviated lifetime Gumilev made four trips to Northern and Eastern Africa, the most extensive of which was a 1913 expedition to Abyssinia undertaken on assignment from the St. Petersburg Imperial Museum of Anthropology and Ethnography. During that trip Gumilev collected Ethiopian folklore and ethnographic objects, which, upon his return to St. Petersburg, he deposited at the Museum. He and his assistant Nikolai Sverchkov also made more than 200 photographs that offer a unique picture of the African

country in the early part of the century. This volume collects all of Gumilev's poetry and prose written about Africa for the first time as well as a number of the photographs that he and Nikolai Sverchkov took during their trip that give a fascinating view of that part of the world in the early twentieth century. Translated by Slava I. Yastremski, Michael M. Naydan, and Maria Badanova.

Mainstream feminist discourse has failed to fully engage with commercial sex work. In a series of groundbreaking, previously unpublished essays, *The Business of Sex* corrects this lacuna. Moving beyond the traditional feminist focus on slavery and trafficking, HIV/AIDS, and other health issues, the contributors to this volume engage fully with the political and theoretical implications of sex work. Dismissing old antagonisms, they argue that feminism – thanks to its role in revolutionizing perspectives on sexuality and labour – is a natural ally for the sex workers' rights movement. In the process, these innovative scholars provocatively critique the dominant moral paradigm of heterosexual monogamy, which has created a pervasive 'victim' discourse and limited our understanding of sex work's complex realities. Drawing on first-hand stories from sex workers, this volume gives voice to newly articulated movements such as 'whore feminism' and 'queer feminism' – feminisms that have the potential to move discussions about sex work onto new and fruitful terrain. Published by Zubaan.

Meditation, of almost any style or technique, is an exercise that focuses on the body's nervous system (of which, the brain is a major part of). Calming the mind to be in the present moment; to creating higher levels of energy in the mind and body to heal (physically, mentally, and spiritually) through meditation, always involves exercising the nervous system. When we calm our thoughts, we reduce neural activity in the brain. When we relax our bodies of tension, we are using our nervous systems to do it. Neural Meditation helps one to better understand what meditation is, and how the different styles work. It can be integrated into almost any style of meditation. It answers questions like; "What style of meditation should I try? How do I know if i'm meditating? How will I know when i'm feeling energy?"

The Letters and Works of Lady Mary Wortley Montagu

Annie and Taylor fell in love. She, a waitress and he, a financial wizard. They moved to a cabin on the slopes of Maui's Haleakala, a small piece of Hawaiian heaven with a beautiful world spread at their feet. When Taylor suddenly dies, Annie's world dissolves. His death reveals who he was not. His lies profound. He'd lied about an inheritance received and lied about his name - Taylor Gordon had never existed. On a beautiful sunny day, Kensington Stone and Lloyd Moniz, fishing on Stone's yacht close to the island of Molokai, they saw and saved a woman from drowning. It was Annie Gaines. With their help, they uncovered the truth that Gordon was not who he claimed to be and discovered the benefactor of Taylor's supposed inheritance had never existed. He had been embezzling huge sums of money. Physical threats soon inundated Annie all because Gordon failed to realize, when he began stealing, that he was embezzling from the son of the notorious Gravello crime family from Sicily. Anthony Gravello wanted his money back and was quite willing to go to extremes to get it - even if it cost Annie her life.
